Single Page Web Applications Michael Mikowski, Josh

Powell, 2013-09-19 Summary In Single Page Web Applications

you'll learn to build modern browser-based apps that take advantage of stronger client platforms and more predictable bandwidth. You'll learn the SPA design approach, and then start exploring new techniques like structured JavaScript and responsive design. And you'll learn how to capitalize on trends like server-side JavaScript and NoSQL data stores, as well as new frameworks that make JavaScript more manageable and testable as a first-class language. About this Book If your website is a jumpy collection of linked pages, you are behind. Single page web applications are your next step: pushing UI rendering and business logic to the browser and communicating with the server only to synchronize data, they provide a smooth user experience, much like a native application. But, SPAs can be hard to develop, manage, and test. Single Page Web Applications shows how your team can easily design, test, maintain, and extend sophisticated SPAs using JavaScript end-to-end, without getting locked into a framework. Along the way, you'll develop advanced HTML5, CSS3, and JavaScript skills, and use JavaScript as the language of the web server and the database. This book assumes basic knowledge of web development. No experience with SPAs is required. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. What's Inside Design, build, and test a full-stack SPA Best-in-class tools like jQuery, TaffyDB, Node.js, and MongoDB Real-time web with web sockets and Socket.IO Touch controls for tablets and smartphones Common SPA design mistakes About the Authors The authors are architects and engineering managers. Michael Mikowski has worked on many commercial SPAs and a platform that processes over 100 billion requests per year. Josh Powell has built some of the most heavily trafficked sites on the web. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government

documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a Service Disabled Veteran-Owned Small Business (SDVOSB). Participatory Archives Edward Benoit III, Alexandra Eveleigh, 2019-09-03 The rise of digitisation and social media over the past decade has fostered the rise of participatory and DIY digital culture. Likewise, the archival community leveraged these new technologies, aiming to engage users and expand access to collections. This book examines the creation and development of participatory archives, its impact on archival theory, and present case studies of its real world application. Participatory Archives is divided into four sections with each focused on a particular aspect of participatory archives: social tagging and commenting; transcription; crowdfunding; and outreach & activist communities. Each section includes chapters summarizing the existing literature, a discussion of theoretical challenges and benefits, and a series of case studies. The case studies are written by a range of international practitioners and provide a wide range of examples in practice, whilst the remaining chapters are supplied by leading scholars from Australia, Canada, Denmark, the Netherlands, Norway, the United Kingdom, and the United States. This book will be useful for students on archival studies programs, scholarly researchers in archival studies who could use the book to frame their own research projects, and practitioners who might be most interested in the case studies to see how participatory archives function in practice. The book may also be of interest to other library and information science students, and similar audiences within the broader cultural heritage institution fields of museums, libraries, and galleries.

Sierra Stories Gary Noy, 2014-08-01 The author of *Gold Rush Stories* shares tales of the larger-than-life characters from the history of the legendary Sierra Nevada mountain range. With its 14,000-foot granite mountains, crystalline lakes, conifer forests, and hidden valleys, the Sierra Nevada has long been the domain of dreams, attracting the heroic and the delusional, the best of humanity and the worst. Stories abound, and characters emerge so outlandish and outrageous that they must be real. Could the human imagination have invented someone like Eliza Gilbert? Born in Limerick, Ireland, in 1818, she transformed herself into Lola Montez, born in Seville, Spain, in 1823, and brought to the Gold Country the provocative “Spider Dance”—impersonating a young woman repelling a legion of angry spiders under her petticoats. Or Otto Esche, who in 1860 imported fifteen two-humped Bactrian camels from Asia to transport goods to the mines. Or the artist Albert Bierstadt, whose paintings Mark Twain characterized as having “more the atmosphere of Kingdom-Come than of California.” Or multimillionaire George Whittell Jr., who was frequently spotted driving around Lake Tahoe in a luxurious convertible with his pet lion in the front seat. These, and scores more, spill out of the pages of this well-illustrated and lively tribute to the Sierra by a native son.

Early Childhood Inclusion Michael J. Guralnick,2001 This book comprehensively evaluates early childhood inclusion over the past 25 years. Based on their research and extensive experience, the authors examine benefits and drawbacks of inclusion, leading influences on inclusion, and issues that face children in different environments with different developmental challenges. The book shows professionals, instructors, and students in early intervention and early childhood education where inclusion is today and what they need to do to keep the field moving forward. The final chapter presents a national in-scope agenda for change - a framework of ideas for meeting challenges and achieving an agreed-upon set of principles and practices - in order to create optimal educational environments for all children.

Pre-Schoolers with Autism Avril Brereton,Bruce Tonge,2005-01-15 The title is an effective, manualized parent education programme' - Educational Book Review This ground-breaking training programme has been developed in response to a real need for evidence-based early interventions for very young autistic children. Authoritative and extensively tried and tested, it will help both parents and carers to understand the disorder and how it affects child development. Ultimately, the programme is designed to reduce the severity of emotional/behavioural difficulties by managing a child's particular problems and encouraging effective collaboration between professionals and parents. The programme is delivered through two accessible manuals - one for parents and one for clinicians - which provide all the information and materials you need. The Manual for Clinicians explains the purpose and content of each session and includes notes for discussion and teaching, a checklist of 'things to do', and photocopiable task sheets for distribution and discussion. The Manual for Parents features tasks, exercises and discussion points for group sessions, and complements these training materials with

engaging personal accounts, an introduction to the history of autism, information about approaches to treatment, and a list of useful websites and further reading. Structured as a series of individual and small group sessions, the programme is designed to run for 20 weeks and covers key areas such as understanding and managing difficult behaviour; changing/encouraging new behaviours; communication problems in verbal and non-verbal children; social problems; and how to work and play together. Together, these manuals will provide you with all the information, support and resources you need to run this programme successfully.
