Gordon Strong

Collecting Recipes Lennart Lehmhaus, Matteo Martelli, 2017-09-25

With a clear comparative approach, this volume brings together for the first time contributions that cover different periods of the history of ancient pharmacology, from Greek, Byzantine, and Syriac medicine to the Rabbinic-Talmudic medical discourses. This collection opens up new synchronic and diachronic perspectives in the study of the ancient traditions of recipe-books and medical collections. Besides the highly influential Galenic tradition, the contributions will focus on less studied Byzantine and Syriac sources as well as on the Talmudic tradition, which has never been systematically investigated in relation to medicine. This inquiry will highlight the overwhelming mass of information about drugs and remedies, which accumulated over the centuries and was disseminated in a variety of texts belonging to distinct cultural milieus. Through a close analysis of some relevant case studies, this volume will trace some paths of this transmission and transformation of pharmacological knowledge across cultural and linguistic boundaries, by pointing to the variety of disciplines and areas of expertise involved in the process.

Thomas Erastus and the Palatinate Charles Gunnoe, 2010-10-15

This study is the first monograph to attempt a synthetic treatment of the career of Thomas Erastus (1524-1583). Erastus was a central player in the conversion of the Electoral Palatinate to Reformed Christianity in the early 1560s and a co-author of the Heidelberg Catechism. In the church discipline controversy of the 1560s and 1570s, Erastus opposed the Calvinist effort to institute a consistory of elders with independent authority over excommunication. Erastus's defeat in this controversy, and the ensuing Antitrinitarian affair, proved the watershed of his career. He turned to the refutation of Paracelsus and a debate with Johann Weyer on the punishment of witches. The epilogue tracks Erastus's later career and the reception of his works into the seventeenth century.

This bitter, sweet, and smooth drink has inspired countless variations as well as legions of diehard aficionados. In *The Negroni*, Gary Regan—barman extraordinaire and author of the iconic book *The Joy of Mixology*—delves into the drink's fun, fascinating history (its origin story is still debated, with battling Italian noblemen laying claim) and provides techniques for modern updates (barrel aging and carbonation among them). Panacea's Daughters Alisha Rankin,2013-03-19 *Panacea's Daughters* provides the first book-length study of noblewomen's healing activities in early modern Europe. Drawing on rich archival

sources, Alisha Rankin demonstrates that numerous German noblewomen were deeply involved in making medicines and recommending them to patients, and many gained widespread fame for their remedies. Turning a common historical argument on its head, Rankin maintains that noblewomen's pharmacy came to prominence not in spite of their gender but because of it. Rankin demonstrates the ways in which noblewomen's pharmacy was bound up in notions of charity, class, religion, and household roles, as well as in expanding networks of knowledge and early forms of scientific experimentation. The opening chapters place noblewomen's healing within the context of cultural exchange, experiential knowledge, and the widespread search for medicinal recipes in early modern Europe. Case studies of renowned healers Dorothea of Mansfeld and Anna of Saxony then demonstrate the value their pharmacy held in their respective roles as elderly widow and royal consort, while a study of the long-suffering Duchess Elisabeth of Rochlitz emphasizes the importance of experiential knowledge and medicinal remedies to the patient's experience of illness.

It All Depends on the Dose Ole Peter Grell, Andrew

Cunningham, Jon Arrizabalaga, 2018-05-11 This is the first volume to take a broad historical sweep of the close relation between medicines and poisons in the Western tradition, and their interconnectedness. They are like two ends of a spectrum, for the same natural material can be medicine or poison, depending on the dose, and poisons can be transformed into medicines, while medicines can turn out to be poisons. The book looks at important moments in the history of the relationship between poisons and medicines in European history, from Roman times, with the Greek physician Galen, through the Renaissance and the maverick physician Paracelsus, to the present, when poisons are actively being turned into beneficial medicines. Chapter 5 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

The New 500 Low-Carb Recipes Dana Carpender, 2019-01-08 Since its publication over 15 years ago, 500 Low-Carb Recipes has become a classic in the low-carb community, earning author Dana Carpender the affectionate moniker “low-carb queen” from her fans. The book is now a bestseller, with over half a million copies sold. Low-carb cooking has evolved. A decade ago, low-carb menus relied on ingredients like artificial sweeteners, unhealthy vegetable oils, protein additives, and processed foods from grocery store shelves, like low-carb branded snack bars and packaged meals. Today’s low-carb cooking is influenced by larger food movements, such as clean eating; farm-to-table ingredients; higher fat ratios, thanks to the popularity of ketogenic diets; and less stigmatization of foods that have substantial inclusion in a low-carb diet, namely animal foods and saturated fat due to the growth of the Paleo and traditional foods movements. The New 500 Low-Carb Recipes is the beloved cookbook updated for today's low-carb movement.
