Root to Leaf Steven Satterfield, 2015-03-03 Finalist for the 2016 IACP Awards: Julia Child First Book Eat More Vegetables. Chef of the award-winning Atlanta restaurant Miller Union, Steven Satterfield--dubbed the "Vegetable Shaman" by the New York Times' Sam Sifton--has enchanted diners with his vegetable dishes, capturing the essence of fresh produce through a simple, elegant cooking style. Like his contemporaries April Bloomfield and Fergus Henderson, who use the whole animal from nose to tail in their dishes, Satterfield believes in making the most out of the edible parts of the plant, from root to leaf. Satterfield embodies an authentic approach to farmstead-inspired cooking, incorporating

seasonal fresh produce into everyday cuisine. His trademark is simple food and in his creative hands he continually updates the region's legendary dishes—easy yet sublime fare that can be made in the home kitchen. Root to Leaf is not a vegetarian cookbook, it's a cookbook that celebrates the world of fresh produce. Everyone, from the omnivore to the vegan, will find something here.

Organized by seasons, and with a decidedly Southern flair, Satterfield's collection mouthwatering recipes make the most of available produce from local markets, foraging, and the home garden. A must-have for the home cook, this beautifully designed cookbook, with its stunning color photographs, elevates the bounty of the fruit and vegetable kingdom as never before.

Barefoot in Paris Ina Garten, 2012-11-26 Hearty boeuf

Bourguignon served in deep bowls over a garlic-rubbed slice of baguette toast; decadently rich croque monsieur, eggy and oozing

with cheese; gossamer crème brulee, its sweetness offset by a brittle burnt-sugar topping. Whether shared in a cozy French bistro or in your own home, the romance and enduring appeal of French country cooking is irrefutable. Here is the book that helps you bring that spirit, those evocative dishes, into your own home. What Ina Garten is known for—on her Food Network show and in her three previous bestselling books—is adding a special twist to familiar dishes, while also streamlining the recipes so you spend less time in the kitchen but still emerge with perfection. And that’s exactly what she offers in *Barefoot in Paris*. Ina’s kir royale includes the unique addition of raspberry liqueur—a refreshing alternative to the traditional crème de cassis. Her vichyssoise is brightened with the addition of zucchini, and her chocolate mousse is deeply flavored with the essence of orange. All of these dishes are true to their Parisian roots, but all offer something special—and are thoroughly delicious, completely accessible, and the perfect fare for friends and family. *Barefoot in Paris* is suffused with Ina’s love of the city, of the bustling outdoor markets and alluring little shops, of the bakeries and fromageries and charcuteries—of the wonderful celebration of food that you find on every street corner, in every neighborhood. So take a trip to Paris with the perfect guide—the

Barefoot Contessa herself—in her most personal book yet.

Food52 A New Way to Dinner Amanda Hesser, Merrill Stubbs, 2016-10-18 A smart, inspiring cookbook showing how to plan, shop, and cook for dinners (and lunches and desserts) all through the week. The secret? Cooking ahead. Amanda Hesser and Merrill Stubbs, founders of the online kitchen and home destination Food52, pull off home-cooked dinners with their families with stunning regularity. But they don't cook every night. Starting with flexible base dishes made on the weekend, Amanda and Merrill mix, match, and riff to create new dinners, lunches, and even desserts throughout the week. Blistered tomatoes are first served as a side, then become sauce for spaghetti with corn. Tuna, poached in olive oil on a Sunday, gets paired with braised peppers and romesco for a fiery dinner, with spicy mayo for a hearty sandwich, and with zucchini and couscous for a pack-and-go salad. Amanda and Merrill's seasonal plans give you everything you need to set yourself up well for the week, with grocery lists and cooking timelines. They also share clever tips and tricks for more confident cooking, showing how elements can work across menus and

seasons to fit your mood or market, and how to be scrappy with whatever's left in the fridge. These building blocks form *A New Way to Dinner*, the key to smarter, happier cooking that leaves you with endless possibilities for the week ahead.

Cooperative Information Agents V Matthias Klusch, Franco Zambonelli, 2003-06-30 These are the proceedings of the Fifth

International Workshop on Cooperative Information Agents, held in Modena, Italy, September 6-8, 2001. Information agent technology has become one of the major key technologies for the Internet and the World Wide Web. It mainly emerged as a response to the challenges of cyberspace from both the technological and human user perspective. Development of information agents requires expertise from different research disciplines such as Artificial Intelligence (AI), advanced databases and knowledge base systems, distributed information systems, information retrieval, and Human Computer Interaction (HCI). The 5th international workshop on Cooperative Information Agents (CIA) continued the tradition by capturing the intrinsic interdisciplinary nature of the above research area by calling for contributions from different research communities, and by promoting open and informative discussions on all related topics. In keeping with tradition, the workshop featured a sequence of regular and invited talks of excellence given by leading experts in the field. This year the topics of the talks are mainly on the challenges of information agents in the upcoming age of ubiquitous and pervasive computing. These challenges are in particular due to the necessity of an efficient utilization, evolution, and trust management of

information agents for user-oriented information search, pro- sion, and visualization in networked computing environments with small, mobile, and embedded devices. A di?erent issue concerns the potential of agent-based support of massive distributed data warehousing worldwide.
