Wedding Music for Recorder ROBERT CONSTAS,2010-10-07 Here in one collection is all the music you need for all phases of a traditional wedding ceremony. These classical and original selections are arranged as instrumental duets primarily for alto and tenor recorders, with some for C fingering only, and optional bass parts. Music is provided for prelude, the procession of the bridesmaids, the bridal procession, the lighting of the Unity Candle, recessional, and postlude. A lengthy section of preludes and postludes supplies plenty of beautiful music for use at the ceremony or at the reception, right up to when the band or DJ starts playing!

Be Recorder Carmen Giménez,2019-08-06 Finalist for the National Book Award for Poetry • Finalist for the PEN Open Book Award • Finalist for the Los Angeles Times Book Prize Carmen Giménez Smith dares to demand renewal for a world made unrecognizable Be Recorder offers readers a blazing way forward into an as yet unmade world. The many times and tongues in these poems investigate the precariousness of personhood in lines that excoriate and sanctify. Carmen Giménez Smith turns the increasingly pressing urge to cry out into a dream of rebellion—against compromise, against inertia, against self-delusion, and against the ways the media dream up our complacency in an America that depends on it. This reckoning with self and nation demonstrates that who and where we are is as conditional as the fact of our compliance: “Miss America from sea to shining sea / the huddled masses have a question / there is one of you and all of us.” Be Recorder is unrepentant and unstoppable, and affirms Giménez Smith as one of the most vital and vivacious poets of our time.

The Laboratory Recorder Galen Ewing,2013-11-11 One of the most universal functions of any scientific or engineer ing laboratory is the gathering of data to provide answers to immediate questions or information to be filed for future refer ence. Such data gathering may be achieved in various ways, depending on the nature and quantity of the information. The most prevalent of such data gathering methods is undoubtedly analog recording. Electrical analog recorders are available in a variety of sizes, speeds, sensitivities, and prices. They are suitable for recording any signal which is in, or can be converted to, electrical form. These recorders are found in every modern laboratory. Without them the importance of many functional relations would be missed altogether. How could one adequately diagnose a heart ailment without a cardiographic recorder, or obtain infrared or magnetic resonance spectra on any practicable basis without a strip-chart recorder? True, various curves that are now traced automatically with a recorder can be plotted manually from point-by-point measure ments. This procedure, however, is not only time-consuming, but may cause valid bits of information to be overlooked entirely, simply because the points were taken too far apart. Another factor favoring the use of recorders is the ability to pinpoint faulty operation of the data-gathering system. Artifacts that might not be observable at all in point-by-point observations 1 The Laboratory Recorder 2 will often be readily identifiable on a recording. Asymmetry of a peaked curve, for example, is only dearly evident in a recording.
