I'm Dying as Fast as I Can Jerry Kennealy,2020-03-02 “I’m dying as fast as I can,” Gaby Maoret tells private investigator Nick Polo. “But it’s not fast enough for them.” Them are the two brothers of Gaucho Carmichael, Gaby’s former lover, who disappeared seven years ago, shortly after granting Gaby a lifetime estate contract on a Telegraph Hill mansion in San Francisco, worth millions. Gaby has been living there, rent free, for all those years. She’s a noted artist, 75 years old, cancer ridden, but with a strong lust for life. She claims that the brothers, who will inherit the house when she dies, have been making threats on her life. Polo agrees to help her, and soon finds himself involved in an old murder case, a missing 5-million-dollar painting, an arson investigation and in conflict with a Mexican drug cartel enforcer. In order to help Gaby, Polo needs the assistance of his octogenarian sidekick, Mrs. Damonte, a self-described strega, a witch who can see into the future, and his Uncle Dominick, a bookie with connections to the gambling mobs in Las Vegas. And then he’s faced with the most perplexing problem of his career—does he tell the cops what he knows?

Ares Express Ian McDonald,2014-01-31 A Mars of the imagination, like no other, in a colorful, witty SF novel, taking place in the kaleidoscopic future of Ian McDonald's *Desolation Road*, *Ares Express* is set on a terraformed Mars where fusion-powered locomotives run along the network of rails

that is the planet's circulatory system and artificial intelligences reconfigure reality billions of times each second. One young woman, Sweetness Octave Glorious-Honeybun Asiim 12th, becomes the person upon whom the future -- or futures -- of Mars depends. Big, picaresque, funny; taking the Mars of Ray Bradbury and the more recent, terraformed Marses of authors such as Kim Stanley Robinson and Greg Bear, *Ares Express* is a wild and woolly magic-realist SF novel, featuring lots of bizarre philosophies, strange, mind-stretching ideas, and trains as big as city blocks. REVIEWS “*Ares Express* is a long, adventure-filled, extravagantly colorful, often funny, quite moving, highly imaginative, excellently written story, set on a glorious Mars built partly of sharp-edged Kim Stanley Robinson-style extrapolation, but mostly of lush, loving, Ray Bradbury-style semi-SF, semi-Fantasy, Martian dreams.... I loved it wholeheartedly.” – SF Site “Hugo-winner McDonald’s virtues have long been underappreciated by major North American publishers... McDonald’s fantastic Mars is vividly detailed and owes much to Bradbury’s Martian stories. Despite a bit of hand waving around technology that is glibly indistinguishable from magic, this sequel is entirely worthy of its rightly lauded predecessor [*Desolation Road*].” – Publishers Weekly “One of the strangest, weirdest, fantastic reads of your life.” – SF Crowsnest “McDonald is clever, lyrical... snarky, and utterly wondrous. The characters would be completely unbelievable in our world, but in theirs they are inevitable...” – Night Owl Reviews

Working Through Synthetic Worlds Kenneth W. Kisiel,2018-04-17 Virtual environments (VE) are human-computer interfaces in which the computer creates a sensory-immersing environment that interactively responds to and is controlled by the behaviour of the user. Since these technologies will continue to become more reliable, more resolute and more affordable, it's important to consider the advantages that VEs may offer to support business processes. The term 'synthetic world' refers to a subset of VEs, having a large virtual landscape and a set of rules that govern the interactions among participants. Currently, the primary motivators for participation in these synthetic worlds appear to be fun and novelty. As the novelty wears off, synthetic worlds will need to demonstrate a favourable value proposition if they are to survive. In particular, non-game-oriented worlds will need to facilitate business processes to a degree that exceeds their substantial costs for development and maintenance. *Working Through Synthetic Worlds* explores a variety of different tasks that might benefit by being performed within a synthetic world. The editors use a distinctive format for the book, consisting of a set of chapters composed of three parts: ϕ a story or vignette that describes work conducted within a synthetic world based loosely on the question,

'what will work be like in the year 2025?', founded on the expert authors' expectations of plausible future technologies & a scholarly review of the technologies described by the stories and the current theories related to those technologies & a prescription for future research required to bridge the current state-of-the-art with the notional worlds described in the stories. The book will appeal to undergraduate and graduate students, professors, scientists and engineers, managers in high-tech industries and software developers.
