**Pictorial Photography from the Two Red Roses Foundation** Two Red Roses Foundation,Christian A. Peterson,2017 -Includes many never before published photographs -Featured artists include: Edward S. Curtis, Arthur Wesley Dow, Adolf Fassbender, and Alfred Stieglitz This book examines the history of the Pictorialist movement in America through the outstanding collection of photographs, books, and journals in the Two Red Roses Collection. The catalog features artists who were pioneers of early art photography, including Edward S. Curtis, Arthur Wesley Dow, Adolf Fassbender, and Alfred Stieglitz. Evolving from the earlier school of Naturalistic photography, Pictorialism was the first major movement to champion the cause of photography as one of the fine arts, and usually featured soft-focus effects, mimicking the established art of painting. The growing interest in pictorial photography occurred during the Arts and Crafts movement, and shared an emphasis on hand-craftsmanship, merging art, life, and popular appeal. The proliferation of how-to books and periodicals, along with the emergence of numerous camera clubs in cities across the United States, furthered the interest in this type of art from professional artists and amateurs alike.

**TO:KY:OO** Liam Wong,2021-05-04 Photographer Liam Wong's debut monograph, a cyberpunk-inspired exploration of nocturnal Tokyo. Featuring evocative and stunning color photographs of contemporary Tokyo, this book brings together the images of an exciting new photographic talent, Liam Wong. Born and raised in Edinburgh, Scotland, Wong studied computer arts in college and, by the time he was twenty-five, was living in Canada and working as a director at one of the world's leading video game companies. His job took him to Tokyo for the first time, where he discovered the ethereality of floating worlds and the lurid allure of Tokyo's nocturnal scenes. "I got lost in the beauty of Tokyo at night," he explains. A testament to the deep art of color composition, this publication brings together a refined body of images that are evocative, timeless, and completely transporting. This volume also features Wong's creative and technical processes, including identifying the right scene, capturing the essence of a moment, and methods to enhance color values—insights that are invaluable to admirers and photography students alike.

**The Photography of Coloured Red Objects (Classic Reprint)** Ce Kenneth Mees,2015-07-21 Excerpt from The Photography of Coloured Red Objects This book represents an attempt to put clearly the theory underlying the photography of coloured objects, and the application of that theory to those branches of practice which are of the most immediate importance. The need for such a book has been impressed upon me by my daily correspondence, and I have hopes that it may serve as a kind of text-book of the subject for many of my friends. While not employing purely scientific nomenclature and phraseology, I have made no attempt to be practical, believing as I do, that the application of an ounce of accurate knowledge is worth a ton of unreasoning practice. I have also made no pretence as to being unbiassed, I have frankly discussed the products of my own firm, but I hope that the loss of generalisation caused by this procedure will be compensated by the advantage to be gained from definite information. It would not be possible, for instance, usefully to discuss the distribution of sensitiveness in red-sensitive plates, whereas it is quite possible to discuss the distribution of sensitiveness in any particular plate. I am also likely to be biassed in argument, but I have not allowed myself to be consciously biassed, and have tried to be as fair as possible. I am very much obliged to many friends for the services chronicled below. Chapter VI. on Photography for Reproduction, was written by Mr. A. J. Newton. **The Photo Ark** Joel Sartore, 2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

**Is heaven red? Fotografie 1968-2022. Paul, Menno & Françoise de Nooijer** Andrea Voigt, 2022 Paul de Nooijer fotografeert al meer dan een halve eeuw. Na zijn studie aan de Academie voor Industriële Vormgeving in Eindhoven [1960-1965] werkte hij onder meer voor 'Hitweek' en De Gruyter. Het duurde even voordat hij met zijn autonome werk naar buiten kwam, maar daarna ging het snel: sinds 1974 exposeert hij in binnen- en buitenland. Al in 1982 [in de inleiding van Dumont Foto 4, Fotografie in Europa heute] signaleerde dr. Ingeborg Leijerzapf het pionierswerk met de polaroid SX-70. Hij was ook een van de eersten die gebruik maakte van een groothoeklens. In 1989 kreeg hij als een van de weinige Nederlandse fotografen een solotentoonstelling in het Centre Pompidou, Parijs. Het werk bevindt zich inmiddels in tal van musea en belangrijke [privé]collecties. Onlangs nog heeft het Nederlands Fotomuseum in Rotterdam voor het eerst ruim dertig werken van de De Nooijers in de collectie opgenomen. Met de jaren is niet alleen de fotokunst van Paul, Menno [samenwerkend sinds 1989] en Françoise naar nieuwe hoogtepunten gestegen, ook het genre geësceneerde fotografie, autonome fotografie, is volwassen geworden.
