Stop Reading the News Rolf Dobelli, 2021-01-07 News is to the mind what sugar is to the body. In 2013 Rolf Dobelli stood in front of a roomful of journalists and proclaimed that he did not read the news. It caused a riot. Now he finally sets down his philosophy in detail. And he practises what he preaches: he hasn't read the news for a decade. *Stop Reading the News* is Dobelli's manifesto about the dangers of the most toxic form of information - news. He shows the damage it does to our concentration and well-being, and how a misplaced sense of duty can misdirect our behaviour. From the author of the bestselling *The Art of Thinking Clearly*, Rolf Dobelli's book offers the reader guidance about how to live without news, and the many potential gains to be had: less disruption, more time, less anxiety, more insights. In a world of increasing disruption and division, *Stop Reading the News* is a welcome voice of calm and wisdom.

Understanding Reddit Elliot T. Panek, 2021-12-24 This book offers a comprehensive scholarly overview of Reddit, one of the most popular and least studied social platforms of the early 21st century. The book inspires new ways of thinking about Reddit, considering it from multiple perspectives: through a historical lens, as a site where identity is forged, as a democracy, as a community, and as a news aggregator and distributor. By bringing theories from computer-mediated communication, communication studies, and sociology to bear on original, large-scale observational analyses of Reddit's communities, this book provides a uniquely comprehensive overview of the platform's first 15 years. *Understanding Reddit* will help us make sense of how rapidly growing communities function in an era of mass online anonymity. Serving both as a primer on how social behavior on Reddit plays out, and as a way of locating it within multiple theoretical traditions, the book will offer important insights to scholars and students in the disciplines of communication, media studies, information science, internet and emerging media studies, and sociology.

Trust Me, I'm Lying Ryan Holiday, 2013-07-02 The cult classic that predicted the rise of fake news—revised and updated for the post-Trump, post-Gawker age. Hailed as astonishing and disturbing by the Financial Times and essential reading by TechCrunch at its original publication, former American Apparel marketing director Ryan Holiday's first book sounded a prescient alarm about the dangers of fake news. It's all the more relevant today. *Trust Me, I'm Lying* was the first book to blow the lid off the speed and force at which rumors travel online—and get traded up the media ecosystem until they become real headlines and generate real responses in the real world. The culprit? Marketers and professional media manipulators, encouraged by the toxic economics of the news business. Whenever you see a malicious online rumor costs a company millions, politically motivated fake news driving elections, a product or celebrity zooming from total obscurity to viral sensation, or anonymously sourced articles becoming national conversation, someone is behind it. Often someone like Ryan Holiday. As he explains, “I wrote this book to explain how media manipulators work, how to spot their fingerprints, how to fight them, and how (if you must) to emulate their tactics. Why am I giving away these secrets? Because I'm tired of a world where trolls hijack debates, marketers help write the news, opinion masquerades as fact, algorithms drive everything to extremes, and no one is accountable for any of it. I'm pulling back the curtain because it's time the public understands how things really work. What you choose to do with this information is up to you.”

We Are the Nerds Christine Lagorio-Chafkin, 2018-10-02 Named a Best Book of 2018 by Fast Company, this is a sharply written and brilliantly reported (Shelf Awareness) look inside Reddit, the wildly popular, often misunderstood website that has changed the culture of the Internet. Reddit hails itself as the front page of the Internet. It's the third most-visited website in the United States -- and yet, millions of Americans have no idea what it is. *We Are the Nerds* is an engrossing look deep inside this captivating, maddening enterprise, whose army of obsessed users have been credited with everything from solving cold case crimes and spurring tens of millions of dollars in charitable donations to seeding alt-right fury and landing Donald Trump in the White House. *We Are the Nerds* is a gripping start-up narrative: the story of how Reddit's founders, Steve Huffman and Alexis Ohanian, rose up from their suburban childhoods to become millionaires and create an icon of the digital age -- before seeing the site engulfed in controversies and nearly losing control of it for good. Based on Christine Lagorio-Chafkin's exclusive access to founders Ohanian and Huffman, *We Are the Nerds* is also a compelling exploration of the way we all communicate today -- and how we got here. Reddit and its users have become a mirror of the Internet: it has dingy corners, shiny memes, malicious trolls, and a sometimes heart-melting ability to connect people across cultures, oceans, and ideological divides.

Fake News Melissa Zimdars, Kembrew McLeod, 2020-02-18 New perspectives on the misinformation ecosystem that is the production and circulation of fake news. What is fake news? Is it an item on Breitbart, an article in The Onion, an outright falsehood disseminated via Russian bot, or a catchphrase used by a politician to discredit a story he doesn't like? This book examines the real fake news: the constant flow of purposefully crafted, sensational, emotionally charged, misleading or totally fabricated information that mimics the form of mainstream news. Rather than viewing fake news through a single lens, the book maps the various kinds of misinformation through several different disciplinary perspectives, taking into account the overlapping contexts of politics, technology, and journalism. The contributors consider topics including fake news as “disorganized”

propaganda; folkloric falsehood in the “Pizzagate” conspiracy; native advertising as counterfeit news; the limitations of regulatory reform and technological solutionism; Reddit's enabling of fake news; the psychological mechanisms by which people make sense of information; and the evolution of fake news in America. A section on media hoaxes and satire features an oral history of and an interview with prankster-activists the Yes Men, famous for parodies that reveal hidden truths. Finally, contributors consider possible solutions to the complex problem of fake news—ways to mitigate its spread, to teach students to find factually accurate information, and to go beyond fact-checking. Contributors Mark Andrejevic, Benjamin Burroughs, Nicholas Bowman, Mark Brewin, Elizabeth Cohen, Colin Doty, Dan Faltesek, Johan Farkas, Cherian George, Tarleton Gillespie, Dawn R. There’s a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don’t know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You’ll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you’re being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate’s loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “A must-read for anyone who works . . . Starshine G. S. Jennsen, 2014-03-23 *SPACE IS VAST AND UNTAMED, AND IT HOLDS MANY SECRETS*. Now two individuals from opposite ends of settled space are on a collision course with the darkest of those secrets, even as the world threatens to explode around them. The year is 2322. Humanity has expanded into the stars, inhabiting over 100 worlds across a third of the galaxy. Though thriving as never before, they have discovered neither alien life nor the key to utopia. Earth struggles to retain authority over far-flung planets and free-wheeling corporations while an uneasy armistice with a breakaway federation hangs by a thread as the former rebels rise in wealth and power. Alexis Solovy is Earth Alliance royalty, her father a fallen war hero and her mother an influential military leader. But she seeks only the freedom of space and has made a fortune by reading the patterns in the chaos to discover the hidden wonders of the stars. Nothing about her latest objective suggests the secret it conceals will turn her life— not to mention the entire galaxy—upside down. But a chance encounter with a mysterious spy leads to a discovery which will thrust Alex into the middle of a galactic power struggle and a sinister conspiracy, whether she likes it or not. Fans of *The Expanse*, Peter F. Hamilton and Adrian Tchaikovsky will love this epic science fiction tale of space adventure, political conspiracy, alien invasion, interstellar war, space exploration, intrigue and romance, all anchored by an incredible cast of memorable and compelling characters who fight, fail, persevere and refuse to fade away. When faced with its greatest challenge, will humanity rise to triumph or fall to ruin? *Aurora Rising* is an epic science fiction tale of galaxy-spanning adventure, of the thrill of discovery and the unquenchable desire to reach ever farther into the unknown. It's a tale of humanity at its best and worst, of love and loss, of fear and heroism. It's the story of a woman who sought the stars and found more than anyone imagined possible.

Visual Group Theory Nathan Carter, 2021-06-08 Recipient of the Mathematical Association of America's Beckenbach Book Prize in 2012! Group theory is the branch of mathematics that studies symmetry, found in crystals, art, architecture, music and many other contexts, but its beauty is lost on students when it is taught in a technical style that is difficult to understand. *Visual Group Theory* assumes only a high school mathematics background and covers a typical undergraduate course in group theory from a thoroughly visual perspective. The more than 300 illustrations in *Visual Group Theory* bring groups, subgroups, homomorphisms, products, and quotients into clear view. Every topic and theorem is accompanied with a visual demonstration of its meaning and import, from the basics of groups and subgroups through advanced structural concepts such as semidirect

products and Sylow theory.

Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

Earth Force Shemer Kuznits, 2019-04-30 On the first day, a mist descended from the heavens blanketing Earth. On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began... There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the living. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All

seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

The Politics of Social Media Manipulation Richard Rogers,Sabine Niederer,2020-10-23 Disinformation and so-called fake news are contemporary phenomena with rich histories. Disinformation, or the willful introduction of false information for the purposes of causing harm, recalls infamous foreign interference operations in national media systems. Outcries over fake news, or dubious stories with the trappings of news, have coincided with the introduction of new media technologies that disrupt the publication, distribution and consumption of news -- from the so-called rumour-mongering broadsheets centuries ago to the blogosphere recently. Designating a news organization as fake, or der Lügenpresse, has a darker history, associated with authoritarian regimes or populist bombast diminishing the reputation of 'elite media' and the value of inconvenient truths. In a series of empirical studies, using digital methods and data journalism, we inquire into the extent to which social media have enabled the penetration of foreign disinformation operations, the widespread publication and spread of dubious content as well as extreme commentators with considerable followings attacking mainstream media as fake.

The Revolution That Wasn't Spencer Jakab,2022-02-01 The saga of GameStop and other meme stocks is revealed with the skill of a thrilling whodunit. Jakab writes with an anti-Midas touch. If he touched gold, he would bring it to life. --Burton G. Malkiel, author of A Random Walk Down Wall Street From Wall Street Journal columnist Spencer Jakab, the real story of the GameStop squeeze—and the surprising winners of a rigged game. During one crazy week in January 2021, a motley crew of retail traders on Reddit's r/wallstreetbets forum had seemingly done the impossible—they had brought some of the biggest, richest players on Wall Street to their knees. Their weapon was GameStop, a failing retailer whose shares briefly became the most-traded security on the planet and the subject of intense media coverage. The Revolution That Wasn't is the riveting story of how the meme stock squeeze unfolded, and of the real architects (and winners) of the GameStop rally. Drawing on his years as a stock analyst at a major bank, Jakab exposes technological and financial innovations such as Robinhood's habit-forming smartphone app as ploys to get our dollars within the larger story of evolving social and economic pressures. The surprising truth? What appeared to be a watershed moment—a revolution that stripped the ultra-powerful hedge funds of their market influence, placing power back in the hands of everyday investors—only tilted the odds further in the house's favor. Online brokerages love to talk about empowerment and “democratizing finance” while profiting from the mistakes and volatility created by novice investors. In this nuanced analysis, Jakab shines a light on the often-misunderstood profit motives and financial mechanisms to show how this so-called revolution is, on balance, a bonanza for Wall Street. But, Jakab argues, there really is a way for ordinary investors to beat the pros: by refusing to play their game.
