Hillbillies Versus Aliens John Peaseland,2016-11-27 Do you ever wonder what happened to the missing link between ape and man, or what Aliens do to their abductees? Do you worry yourself sick about global conspiracy? Well, worry no more. In this semi-secret biography, the author can explain everything. The family Robinson are known to officialdom as trailer trash, hillbillies or rednecks. They are not special, in fact they are a nuisance and everybody hates them. This has always been the case, or it was, until the Alien race known in professional circles as 'shape shifting reptilian humanoids,' intent on world domination, changed all that. Discovered by ghastly means, the Aliens identify primordial DNA in the Robinson's biological makeup that can unlock powerful secrets hidden in an ancient, abandoned spaceship. Only the Robinson's can pass the sentinel killer droids that defend the spacecraft, the only problem is, they don't want to.

Men, Women, and Chain Saws Carol J. Clover,2015-05-26 From its first publication in 1992, Men, Women, and Chain Saws has offered a groundbreaking perspective on the creativity and influence of horror cinema since the mid-1970s. Investigating the popularity of the low-budget tradition, Carol Clover looks in particular at slasher, occult, and rape-revenge films. Although such movies have been traditionally understood as offering only sadistic pleasures to their mostly male audiences, Clover demonstrates that they align spectators not with the male tormentor, but with the females tormented—notably the slasher movie's final girls—as they endure fear and degradation before rising to save themselves. The lesson was not lost on the mainstream industry, which was soon turning out the formula in well-made thrillers. Including a new preface by the author, this Princeton Classics edition is a definitive work that has found an avid readership from students of film theory to major Hollywood filmmakers.

The Liberal Redneck Manifesto Trae Crowder,Corey Ryan Forrester,Drew Morgan,2017-10-10 The Liberal Rednecks--a three-man stand-up comedy group doing scathing political satire--celebrate all that's good about the South while leading the Redneck Revolution and standing proudly blue in a sea of red. Smart, hilarious, and incisive, the Liberal Rednecks confront outdated traditions and intolerant attitudes, tackling everything people think they know about the South--the good, the bad, the glorious, and the shameful--in a laugh-out-loud funny and lively manifesto for the rise of a New South. Home to some of the best music, athletes, soldiers, whiskey, waffles, and weather the country has to offer, the South has also been bathing in backward bathroom bills and other bigoted legislation that Trae Crowder has targeted in his Liberal Redneck videos, which have gone viral with over 50 million views. Perfect for fans of Stuff White People Like and I Am America (And So Can You), The Liberal Redneck Manifesto skewers political and religious hypocrisies in witty stories and hilarious graphics--such as the Ten Commandments of the New South--and much more! While celebrating the South as one of the richest sources of American culture, this entertaining book issues a wake-up call and a reminder that the South's problems and dreams aren't that far off from the rest of America's--

Vernian Space Gun Kal Spriggs,2020-03-16 For over 225 years, the United States Army has fought every enemy of the nation from around the globe, but now there's a threat never before seen and it comes in the form of a transmission from a nearby star. The transmission shows a war, a war on a scale never seen by man. And that war is on Humanity's very doorstep. Major Daniels knows that Earth isn't ready for that kind of war. In an era of fighter jets and smart-phones, we don't have the technology or infrastructure to begin to fight aliens with the power to travel the stars. But that's the impossible mission set before him and his team. The United States will need defenses, ships, stations, bases, and weapons capable of fighting that enemy. The first hurdle: finding a way to stage supplies and materials in orbit for the massive surge in space infrastructure. It would require every scrap of lift capacity in the entire world five times over and Major Daniels has to find out how to do it fast. His solution is simple: build the world's biggest gun and start firing payloads into orbit. The execution is what's wrought with peril. Because even if bureaucratic infighting and simple physics aren't enough to stop his project, then real enemies here on Earth might well be. Daniels has to figure out the problems with his Vernian Space Gun and keep an eye on his back, because some nations on Earth see the alien threat as an opportunity to settle old grudges and they don't care about what might happen to all of Mankind in the process.
