Creek Country Robbie Ethridge,2004-07-21 Reconstructing the human and natural environment of the Creek Indians in frontier Georgia, Mississippi, Alabama, and Tennessee, Robbie Ethridge illuminates a time of wrenching transition. Creek Country presents a compelling portrait of a culture in crisis, of its resiliency in the face of profound change, and of the forces that pushed it into decisive, destructive conflict. Ethridge begins in 1796 with the arrival of U.S. Indian Agent Benjamin Hawkins, whose tenure among the Creeks coincided with a period of increased federal intervention in tribal affairs, growing tension between Indians and non-Indians, and pronounced strife within the tribe. In a detailed description of Creek town life, the author reveals how social structures were stretched to accommodate increased engagement with whites and blacks. The Creek economy, long linked to the outside world through the deerskin trade, had begun to fail. Ethridge details the Creeks' efforts to diversify their economy, especially through experimental farming and ranching, and the ecological crisis that ensued. Disputes within the tribe culminated in the Red Stick War, a civil war among Creeks that quickly spilled over into conflict between Indians and white settlers and was ultimately used by U.S. authorities to justify their policy of Indian removal.

Africans and Creeks Daniel F. Littlefield, 1979-11-16

Food Warren Belasco, 2008-10-15 *Food: The Key Concepts* presents an exciting, coherent and interdisciplinary introduction to food studies for the beginning reader. Food Studies is an increasingly complex field, drawing on disciplines as diverse as Sociology, Anthropology and Cultural Studies at one end and Economics, Politics and Agricultural Science at the other. In order to clarify the issues, *Food: The Key Concepts* distills food choices down to three competing considerations: consumer identity; matters of convenience and price; and an awareness of the consequences of what is

consumed. The book concludes with an examination of two very different future scenarios for feeding the world's population: the technological fix, which looks to science to provide the solution to our future food needs; and the anthropological fix, which hopes to change our expectations and behaviors. Throughout, the analysis is illustrated with lively case studies. Bulleted chapter summaries, questions and guides to further reading are also provided.--P. [4] of cover.

A Bit of Earth Rebecca Smith, 2012-09-13 Susannah Misselthwaite was gazing up at the brightness of the blue sky when the deer leapt in front of the car. She never knew what happened. Her husband Guy, Professor of Botany, hides from his grief in his greenhouse - without Susannah, everything is lost. Meanwhile, little Felix pores over photographs of his mother who is slipping from his memory more each day. Happiest sitting in the branches of a tree in the university's botanical garden, away from the emptiness of home, he presides over the dreams and dramas of those who pass beneath him. Teachers and students, young and old, happy, sad, or filled with longing, all find sanctuary and space for contemplation in this few square feet of soil.

Taming the Star Runner S.E. Hinton, 2014-01-15 "A powerful story" of a boy leaving the city streets for a summer at a horse farm—and discovering the possibility of a different life (Kirkus Reviews). An ALA Best Book for Young Adults An ALA Quick Pick With an absent mother and a domineering stepfather, Travis uses his tough-guy exterior to hide his true passion: writing. After a violent confrontation with his stepfather, Travis is sent to live on his uncle's horse ranch—exile to a born-and-bred city kid. Angry and yearning for a connection, Travis befriends Casey, the horse-riding instructor at the ranch, and the untamable horse in her stable: the Star Runner. When a friend from the city visits with stories of other kids from the neighborhood facing jail time, Travis is more

determined than ever that he needs to escape the life of juvenile delinquency he seems destined for. When the offer of a book deal comes through, Travis is hopeful that this is his chance to escape—if only his stepfather will stop standing in the way of his dreams. In this novel, the acclaimed author of *The Outsiders* “portrays her characters with sympathy and yet commendably refuses to gloss over rough edges or gritty truths” (Publishers Weekly). “Hinton continues to grow more reflective in her books, but her great understanding, not of what teenagers are but of what they can hope to be, is undiminished.”—Kirkus Reviews

The Biography of a Grizzly Ernest Thompson Seton, 1900

Bambi Felix Salten, 2024-01-01 The powerful original novel that inspired the classic animated film—a story of nature, loss, survival, and becoming an adult. This moving and eventful story, translated from the original German by David Wyllie, opens with the birth of a fawn in a thicket. Little Bambi rises to his feet immediately, as an overly talkative magpie marvels over this beautiful newborn. We then follow his journey through the innocent joys of youth into experiences of love, loss, and the complexity and danger of the wider world—where humans pose a mortal threat to his kind—and on to his years as an older and wiser prince of the forest. *Bambi* is a tale of beauty and allegorical depth that brings the realities of nature to vivid, emotional life.

Plains Village Archaeology Stanley A. Ahler, Marvin Kay, 2007 Plains villagers had a well-developed life way of intensive horticulture, bison hunting, and residence in substantial timber houses. This volume documents how Plains village culture emerged as a widespread and cohesive cultural adaptation from its roots in late Plains woodland cultures, as well as how it was repeatedly altered by internal and external forces. It addresses the historical emergence of these peoples, greatly transformed and decimated as the Wichitas, Omaha, Pawnees, Arikaras, Mandans, and Hidatsas. This

volume presents a cross section of current research about the origins and internal developments of prehistoric Plains village people in the Central and Northern Plains.
