Las Vegas Lawrence J. Mullen,2007 Las Vegas: Media and Myth uses interviews with a variety of individuals to explore life in the fabled American city. With the belief that the media play an essential role in the creation of a sense of community in this transient town, author Lawrence J. Mullen speaks with people who work in the local media industries to get their perspectives about how newspaper, radio, television, and related media help make Las Vegas a livable community.

*Man-Machine-Environment System Engineering: Proceedings of the 21st International Conference on MMESE* Shengzhao Long, Balbir S. Dhillon, 2021-09-21 Man-Machine-Environment System Engineering: Proceedings of the 21st Conference on MMESE is the academic showcase of best research papers selected from more than 500 submissions each year. From this book reader will learn the best research topics and the latest development trend in MMESE design theory and other human-centered system application. MMESE focus mainly on the relationship between Man, Machine and Environment. It studies the optimum combination of man-machine-environment systems. In the system, the Man means the working people as the subject in the workplace (e.g. operator, decision-maker); the Machine means the general name of any object controlled by the Man (including tool, Machinery, Computer, system and technology), the Environment means the specially working conditions under which Man and Machine occupy together (e.g. temperature, noise, vibration, hazardous gases etc.). The three goals of the optimization of the system are safety, efficiency and economy. In 1981 with direct support from one of the greatest modern Chinese scientists, Qian Xuesen, Man-Machine-Environment System Engineering (MMESE), the integrated and advanced science research topic was established in China by Professor Shengzhao Long. In the letter to Shengzhao Long, in October 22nd, 1993, Qian Xuesen wrote: "You have created a very important modern science subject and technology in China!"

**The Multivariate Social Scientist** Graeme D Hutcheson, Nick Sofroniou, 1999-05-19 Starting from simple hypothesis testing and then moving towards model-building, this valuable book takes readers through the basics of multivariate analysis including: which tests to use on which data; how to run analyses in SPSS for Windows and GLIM4; how to interpret results; and how to report and present the reports appropriately. Using a unified conceptual framework (based around the Generalized Linear Model) the authors explain the commonalities and relationships between methods that include both the analysis of categorical and continuous data.

*Afoot and Afield: Las Vegas and Southern Nevada* Brian Beffort, 2010-10-01 Beyond the bright lights of one of the city's fastest growing metropolitan areas is some of the most rugged, beautiful, and remote country around.

Popular destinations such as Red Rock Canyon, Valley of Fire, Death Valley, and Mt. Charles are covered, plus lesser-known areas such as Anniversary Narrows, Arrow Canyon, Bowl of Fire, and the Wee Thump Joshua Tree Wilderness. Each trip showcases the diversity of this region, from the geological wonders and rare life forms surviving in Mojave National Preserve to ancient petroglyphs. The hikes range from easy strolls to challenging treks and include distance, time, elevation change, difficulty, and trail-use notes. A custom map accompanies every description, and GPS waypoints are given for key locations.

Magic Lantern Guides®: Nikon D300 Simon Stafford,2009-06-02 Simon Stafford, the Technical Editor to the Nikon Owners' Club International's Nikon Owner magazine, tells all about the company's new semi-pro camera, the D300. He explains how to make the most of the model's up-to-the-minute attributes, including the 12.3 effective megapixel Nikon DX-format CMOS image sensor with integrated A/D converter and the increased bit precision of selectable 14-bit NEF (RAW) output.

**Everyday Las Vegas** Rex J. Rowley,2013-04-01 Every year, more than thirty-five million people from all over the world visit Las Vegas; only two million call the city home. Everyday Las Vegas takes a close look at the lives of those who live in a place the rest of the world considers exotic, even decadent. Using broad research, including interviews with more than one hundred Las Vegans, Rex Rowley--who grew up in Las Vegas--examines everyday life in a place that markets itself as an escape from mundane reality. Rowley considers such topics as why people move to Las Vegas, the nature of their work and personal lives, the impact of growth and rapid change, and interaction with the overwhelmingly touristic side of the city. He also considers the benefits and perils of living in a nonstop twenty-four-hour city rich in entertainment options and easy access to gambling, drugs, and other addictions. His examination includes the previously unstudied role of neighborhood casinos patronized by locals rather than tourists and the impact that a very mobile population has on schools, churches, and community life. Rowley considers the very different ways people perceive a place as insiders or outsiders, a dichotomy that arises when tourism is a mainstay of the local economy. His work offers insights into what Las Vegas can teach us about other cities and American culture in general. It also contributes to our understanding of how people relate to places and how the personality of a place influences the lives of people who live there.
