**Where's the Runway? and Other Flying Stories** Herb Tabak,2001-07 The 1970's and 1980's were the boom days of general aviation when learning to fly was easy, cheap and somewhat free from stifling government regulation. Availability of the GI Bill and low fuel prices enabled many, including the author, to learn to fly and add ratings while enjoying the nostalgia provided by the use of the few remaining barnstorming era airfields and training from former World War II pilots. This book memorializes many logbook entries of the author and includes some of the adventures he shared with his friends, family and others while flying small planes and hot air balloons.

World Airlines, Inc. (TWA) flight 800, a Boeing 747, crashed in the Atlantic Ocean near East Moriches, New York. TWA flight 800 was a scheduled international passenger flight from John F. Kennedy International Airport (JFK), New York, New York, to Charles DeGaulle International Airport, Paris, France. All 230 people on board were killed, and the airplane was destroyed. The weather was good. The National Transportation Safety Board determines that the probable cause of the accident was an explosion of the center wing fuel tank, resulting from ignition of the flammable fuel/air mixture in the tank. Contributing factors to the accident were the design and certification concept that fuel tank explosions could be prevented solely by precluding all ignition sources and the design and certification of the Boeing 747. The safety issues in this report focus on fuel tank flammability.
