Determination of Target Xenobiotics and Unknown Compound Residues in Food, Environmental, and Biological Samples Tomasz Tuzimski,Joseph Sherma,2018-10-25 Xenobiotics are chemical compounds foreign to a given biological system. In animals and humans, xenobiotics include drugs, drug metabolites, and environmental pollutants. In the environment, xenobiotics include synthetic pesticides, herbicides, and industrial pollutants. Many techniques are used in xenobiotics residue analysis; the method selected depends on the complexity of the sample, the nature of the matrix/analytes, and the analytical techniques available. This reference will help the analyst develop effective and validated analytical strategies for the analysis of hundreds of different xenobiotics on hundreds of different sample types, quickly, accurately and at acceptable cost.

E-Marketing: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2012-05-31 The

popularity of e-marketing has helped both small and large businesses to get their products and services message to an unbounded number of potential clients. Keeping in contact with your customers no longer require an extended period of time but rather mere seconds. E-Marketing: Concepts, Methodologies, Tools, and Applications presents a vital compendium of research detailing the latest case studies, architectures, frameworks, methodologies, and research on e-marketing. With contributions from authors around the world, this three-volume collection presents the most sophisticated research and developments from the field, relevant to researchers, academics, and practitioners alike. In order to stay abreast of the latest research, this book affords a vital look into electronic marketing research.

Smartphone Filmmaking Max Schleser, 2021-08-26 Mobile, smartphone and pocket filmmaking is a global phenomenon with distinctive festivals, filmmakers and creatives that are defining an original film form. Smartphone Filmmaking: Theory and Practice explores diverse approaches towards smartphone filmmaking and interviews an overview of the international smartphone filmmaking community. Interviews with smartphone filmmakers, entrepreneurs, creative technologists, storytellers, educators and smartphone film festival directors provide a source of inspiration and insights for professionals, emerging filmmakers and rookies who would like to join this creative community. While not every story might be appropriate to be realized with a mobile device or smartphone, if working with communities, capturing locations or working in the domain of personal or first-person filmmaking, the smartphone or mobile device should be considered as the camera of choice. The mobile specificity is expressed through accessibility, mobility and its intimate and immediate qualities. These smartphone filmmaking-specific characteristics and personal forms of crafting experiences contribute to a formation of new storytelling approaches. Stylistic developments of vertical video and collaborative processes in smartphone filmmaking are evolving into hybrid formats that resonate in other film forms. This book not only develops a framework for the analysis of smartphone filmmaking but also reviews contemporary scholarship and directions within the creative arts and the creative industries. Smartphone Filmmaking: Theory and Practice initiates a conversation on current trends and discusses its impact on adjacent disciplines and recent developments in emerging media and screen production, such as Mobile XR (extended reality).
