U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967 Maj. Gary L. Telfer, Lt.-Col. Lane Rogers, Dr. V. Keith Fleming Jr., 2016-08-09

This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

Artificial Intelligence and Games Georgios N. Yannakakis, Julian Togelius, 2018-02-17 This is the first textbook dedicated to explaining how artificial intelligence (AI) techniques can be used in and for games. After introductory chapters that explain the background and key techniques in AI and games, the authors explain how to use AI to play games, to generate content for games and to model players. The book will be suitable for undergraduate and graduate courses in games, artificial intelligence, design, human-computer interaction, and computational intelligence, and also for self-study by industrial game developers and practitioners. The authors have developed a website (<http://www.gameaibook.org>) that complements the material covered in the book with up-to-date exercises, lecture slides and reading.

U.S. Marines In Vietnam: The Landing And The Buildup, 1965 Dr. Jack Shulimson, Maj. Charles M. Johnson, 2016-08-09 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, *U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era*.

Combat Operations: Stemming the Tide, May 1965 to October 1966 (Paperback) John M. Carland, 2000 *Combat Operations: Stemming the Tide* describes a critical chapter in the Vietnam conflict, the first eighteen months of combat by the U.S. Army's ground forces. Relying on official American and enemy primary sources, John M. Carland focuses on initial deployments and early combat and takes care to present a well-balanced picture by discussing not only the successes but also the difficulties endemic to the entire effort. This fine work presents the war in all of its detail: the enemy's strategy and tactics, General William C. Westmoreland's search and destroy operations, the helicopters and airmobile warfare, the immense firepower American forces could call upon to counter Communist control of the battlefield, the out-of-country enemy sanctuaries, and the allied efforts to win the allegiance of the South Vietnamese people to the nation's anti-Communist government. Carland's volume demonstrates that U.S. forces succeeded in achieving their initial goals, but unexpected manpower shortages made Westmoreland realize that the transition from stemming the tide to taking the offensive would take longer. Bruising battles with the Viet Cong and North Vietnamese in the Saigon area and in the Central Highlands had halted their drive to conquest in 1965 and, with major base development activities afoot, a series of high-tempo spoiling operations in 1966 kept them off balance until more U.S. fighting units arrived in the fall. Carland credits the improvements in communications and intelligence, the helicopter's capacity to

extend the battlefield, and the availability of enormous firepower as the potent ingredients in Westmoreland's optimism for victory, yet realizes that the ultimate issue of how effective the U.S. Army would be and what it would accomplish during the next phase was very much a question mark.

Star Wars: Pirate's Price Lou Anders, 2019-01-08 An exciting tale about Han and Chewie and their adventures with the pirate Hondo.

Frankenturkey Betsy Haynes, 1994 Kyle and Annie want to celebrate Thanksgiving like the pilgrims. They want to wear stovepipe hats, bake their own pies--even raise their own turkey. Then they meet Frankenturkey! Frankenturkey is big, bad, and mad. If Kyle and Annie don't watch out, Frankenturkey will eat them for Thanksgiving dinner.

The Last 100 Yards Paul Berg, Army University Press, 2019-05 The Last 100 Yards: The Crucible of Close Combat in Large-Scale Combat Operations presents thirteen historical case studies of close combat operations from World War I through Operation Iraqi Freedom. This volume is a collection from the unique and deliberate perspective of the last 100 yards of ground combat. In today's Army, there are few leaders who have experienced multi-domain large-scale ground combat against a near-peer or peer enemy first hand. This volume serves to augment military professionals' understanding of the realities of large-scale ground combat operations through the experiences of those who lived it.

Closing In-Marines in the Seizure of Iwo Jima Joseph Alexander, 2017-10-10 This book is part of a commemorative series of battles during World War II and as a US government document is in the public domain. The book is profusely illustrated with pictures and maps.

Bringing Order to Chaos Peter J Schifferle Editor, Peter Schifferle, 2018-10-12 Volume 2, Bringing Order to Chaos: Combined Arms Maneuver in Large Scale Combat Operations, opens a dialogue with the Army. Are we ready for the significantly increased casualties inherent to intensive combat between large formations, the constant paralyzing stress of continual contact with a peer enemy, and the difficult nature of command and control while attempting division and corps combined arms maneuver to destroy that enemy? The chapters in this volume answer these questions for combat operations while spanning military history from 1917 through 2003. These accounts tell the challenges of intense combat, the drain of heavy casualties, the difficulty of commanding and controlling huge formations in contact, the effective use of direct and indirect fires, the need for high quality leadership, thoughtful application of sound doctrine, and logistical sustainment up to the task. No large scale combat engagement, battle, or campaign of the last one hundred years has been successful without being better than the enemy in these critical capabilities. What can we learn from the past to help us make the transition to ready to fight tonight?

Learning Virtual Reality Tony Parisi, 2015-10-26 Annotation Get an introduction to the technologies, tools, and techniques for programming virtual reality on the latest generation of desktop and mobile VR hardware. With this hands-on guide, you'll learn essential development and production concepts, including UI design, stereo rendering, 3D input, and programming VR applications for native desktop, mobile and the web. You don't have to be a game development wizard or have 3D graphics experience to get started. If you have basic programming skills and some familiarity with mobile development, this book will help you gain a working knowledge of virtual reality through clear and simple examples.

Crafting Identity Pavel Shlossberg, 2015-06-11 Crafting Identity explores the complex interplay of social relations, values, dominations, and performances present in the world of Mexican mask making. The book examines how art, media, and tourism mediate Mexican culture from the margins ("arte popular"), making Mexican indigeneity "palatable" for Mexican nationalism and American and global markets for folklore.

Introduction to Data Science Laura Igual, Santi Seguí, 2017-02-22 This accessible and classroom-tested textbook/reference presents an introduction to the fundamentals of the emerging and interdisciplinary field of data science. The coverage spans key concepts adopted from statistics and machine

learning, useful techniques for graph analysis and parallel programming, and the practical application of data science for such tasks as building recommender systems or performing sentiment analysis. Topics and features: provides numerous practical case studies using real-world data throughout the book; supports understanding through hands-on experience of solving data science problems using Python; describes techniques and tools for statistical analysis, machine learning, graph analysis, and parallel programming; reviews a range of applications of data science, including recommender systems and sentiment analysis of text data; provides supplementary code resources and data at an associated website.

Vibration Engineering and Technology of Machinery José Manoel Balthazar, 2021-03-03 This volume gathers the latest advances, innovations and applications in the field of vibration and technology of machinery, as presented by leading international researchers and engineers at the XV International Conference on Vibration Engineering and Technology of Machinery (VETOMAC), held in Curitiba, Brazil on November 10-15, 2019. Topics include concepts and methods in dynamics, dynamics of mechanical and structural systems, dynamics and control, condition monitoring, machinery and structural dynamics, rotor dynamics, experimental techniques, finite element model updating, industrial case studies, vibration control and energy harvesting, and MEMS. The contributions, which were selected through a rigorous international peer-review process, share exciting ideas that will spur novel research directions and foster new multidisciplinary collaborations.

Chemical Rocket Propulsion Luigi T. De Luca, Toru Shimada, Valery P. Sinditskii, Max Calabro, 2016-08-19 Developed and expanded from the work presented at the New Energetic Materials and Propulsion Techniques for Space Exploration workshop in June 2014, this book contains new scientific results, up-to-date reviews, and inspiring perspectives in a number of areas related to the energetic aspects of chemical rocket propulsion. This collection covers the entire life of energetic materials from their conceptual formulation to practical manufacturing; it includes coverage of theoretical and experimental ballistics, performance properties, as well as laboratory-scale and full system-scale, handling, hazards, environment, ageing, and disposal. Chemical Rocket Propulsion is a unique work, where a selection of accomplished experts from the pioneering era of space propulsion and current technologists from the most advanced international laboratories discuss the future of chemical rocket propulsion for access to, and exploration of, space. It will be of interest to both postgraduate and final-year undergraduate students in aerospace engineering, and practicing aeronautical engineers and designers, especially those with an interest in propulsion, as well as researchers in energetic materials.

We Are All Perfectly Fine Dr. Jillian Horton, 2021-02-23 When we need help, we count on doctors to put us back together. But what happens when doctors fall apart? Funny, fresh, and deeply affecting, *We Are All Perfectly Fine* is the story of a married mother of three on the brink of personal and professional collapse who attends rehab with a twist: a meditation retreat for burned-out doctors. Jillian Horton, a general internist, has no idea what to expect during her five-day retreat at Chapin Mill, a Zen centre in upstate New York. She just knows she desperately needs a break. At first she is deeply uncomfortable with the spartan accommodations, silent meals and scheduled bonding sessions. But as the group struggles through awkward first encounters and guided meditations, something remarkable happens: world-class surgeons, psychiatrists, pediatricians and general practitioners open up and share stories about their secret guilt and grief, as well as their deep-seated fear of falling short of the expectations that define them. Jillian realizes that her struggle with burnout is not so much personal as it is the result of a larger system failure, and that compartmentalizing your most difficult emotions—a coping strategy that is drilled into doctors—is not useful unless you face these emotions too. Jillian Horton throws open a window onto the flawed system that shapes medical professionals, revealing the rarely acknowledged stresses that lead doctors to depression and suicide, and emphasizing the crucial role of compassion not only in treating others, but also in taking care of ourselves.

Quantum Computing in Solid State Systems Berardo Ruggiero, Per Delsing, Carmine Granata, Yuri A. Pashkin, P. Silvestrini, 2006-05-30 Quantum

Computation in Solid State Systems discusses experimental implementation of quantum computing for information processing devices; in particular observations of quantum behavior in several solid state systems are presented. The complementary theoretical contributions provide models of minimizing decoherence in the different systems. Most recent theoretical and experimental results on macroscopic quantum coherence of mesoscopic systems, as well as the realization of solid-state qubits and quantum gates are discussed. Particular attention is given to coherence effects in Josephson devices. Other solid state systems---including quantum dots, optical, ion, and spin devices---are also discussed.
