Remote Control Catharine Lumby,Elspeth Probyn,2004-01-12 This book examines the ethical challenges posed by new media formats, technologies and audiences. It considers how these emerging genres and technologies work, how they are reshaping the public sphere, and how the connections between product and viewer, and producer and media consumer, are being changed by new shows and formats. It includes lively chapters from a range of prominent media commentators and practitioners on a diverse range of issues, including reality TV, on-line media, the cash for comment scandal and emerging philosophical approaches to new media ethics. With so much interest in contemporary media forms, and so many heated debates about media ethics, this book will be a must for journalists, media practitioners, watchers and students.

Remote And Controlled Matthew Robert Kerbel,2018-05-30 Remote and Controlled examines the issue of widespread cynicism in an era of abundant information, asking whether it is possible to consume a steady diet of mainstream media and still understand and respect the political process. Starting with central examples of television's political coverage and the media's focus on the president, the author explores a variety of media—from newspapers and radio to MTV and computer networks—and political events and institutions. Against a historical backdrop of political, technological, and institutional change, the text raises critical questions for a society plugged into Rush, Oprah, and USA Today: How do the media both magnify and undermine the president? Can televised town meetings replace the real thing? How do politicians seek to control the flow of information, and what do the media do about it? Does the information explosion provide greater diversity or simply greater convenience? The second edition of this acclaimed text has been revised and updated to examine media coverage of recent events such as the Monica Lewinsky scandal. In the process, the author sheds light on the ultimate dilemma of whether an informed public will participate in a system in which campaigns are portrayed as if they were war, policymaking is depicted as if it were a campaign, and none of the participants—reporters included—appear particularly noble or worthy.

Remote Control Caetlin Benson-Allott, 2015-01-29 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. While we all use remote controls, we understand little about their history or their impact on our daily lives. Caetlin Benson-Allot looks back on the remote control's material and cultural history to explain how such an innocuous media accessory has changed the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with them. Object Lessons is published in partnership with an essay series in The Atlantic.

Remote Virtue Jen Letherer, 2015-10-13 This introduction to media literacy from a Christian perspective provides the tools to find and assess the beneficial—or harmful—ideologies depicted in notable films, programs, and trends. Television and movies shape popular culture, with audiences often unaware of how media messages influence the way they think, act, and view the world. In this enlightening guide, author Jen Letherer interprets film and television shows from a Christian standpoint, revealing how beliefs and values portrayed on the big and small screens often impact the moral conduct of daily viewers. This book provides the tools for Christians to discern the implicit and explicit messages found within this medium, and shows how motion pictures can improve or erode religious principles and a spiritual way of life. In a conversational tone, the work combines classic film theory, an assessment of story structure, and faith-based film criticism to delve into meaning and interpretations of popular movies and shows. Highlighted television programs include Top Chef, Modern Family, Downton Abbey, and The Walking Dead. The book also features films like Citizen Kane, Thelma and Louise, Star Wars, Inception, and The Hunger Games. This fascinating critique prompts media consumers to analyze the messages that their favorite broadcast programs send, consider if those messages are in line with their own values, and align their viewing choices with their personal beliefs.
