Renewal Apologetics Christopher J. Wilson, 2019-12-09 Why do you believe in God? Why do you believe in the Bible? Why do you believe in miracles? These are questions that Christians are often asked by sceptics. The field of apologetics attempts to provide rational answers to these and other questions. Unfortunately, apologetical answers to these questions are often abstract and philosophical. However, the Christian apologist/evangelist has a much more powerful argument in their arsenal: the argument from miracles. Miracles are the original Christian apologetic. It was through the witnessing of miracles that Christianity was originally spread. By applying modern tools of philosophical inquiry and scientific methodology, Wilson is able to establish a core set of miracles which defy naturalistic explanations and strongly point toward occurrences of Special Divine Action (SDA). However, once these occurrences are proven to be genuine miracles, several questions remain. Why does God sometimes perform miracles? Why does he often answer no? How do these random acts fit into his overall plans of redemption? By answering these and other questions, Wilson develops a comprehensive apologetic for both Christianity in general and the Renewal Movement in particular.

Africa and China Aleksandra W. Gadzala, 2015-09-03 The China-Africa relationship has so far largely been depicted as one in which the Chinese state and Chinese entrepreneurs control the agenda, with Africans and their governments as passive actors exercising little or no agency. This volume examines the African side of the relation, to show how African state and non-state actors increasingly influence the China-Africa partnership and, in so doing, begin to shape their economic and political futures. The influx of public and private sector Chinese actors across the African continent has led to a rise of opportunities and challenges, which the volume sets out to examine. With case studies from Nigeria, Angola, Kenya, South Africa,

Ethiopia, and Zambia, and across the technology, natural resource, manufacturing, and financial sectors, it shows not only how African realities shape Chinese actions, but also how African governments and entrepreneurs are learning to leverage their competitive advantages and to negotiate the growing Chinese presence across the continent.

Renewal Harold Kwalwasser, 2012 Harold Kwalwasser has put together a call to action for education reform that makes a clear case for what has to be done in order to educate all children to their full potential. He visited forty high-performing and transforming school districts, charters, parochial, and private schools to understand why they have succeeded where others have failed. The analysis in *Renewal: Remaking America's Schools for the Twenty-First Century* brings together all of the necessary changes in one dynamic strategy. Many schools, even though facing seemingly impossible odds, have succeeded brilliantly. But their histories also reflect that there are neither silver bullets or demons. The heart of successful reform is systemic change, which requires the patience, understanding, and commitment of every adult who has a role in the process, from parents and taxpayers, to the school board members, superintendents, and teachers, and on to state legislators and members of Congress. *Renewal* offers a clear picture of how to move away from the mass-production style of education that most schools offered throughout the twentieth century to a new, more innovative, and flexible model that can meet this country's promise of truly educating every child and preparing each of them for the challenges ahead.
