Handbook of Revolutions in the 21st Century Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world. This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires. Instead, the revolutions of this century have several new characteristics, which call for a renewed analysis of the subject. This handbook offers a comparative perspective on the new wave of revolutions of the last decade. Presenting case studies on the color revolutions, the Arab revolutions of 2010–2011, and the global wave of revolutions in 2013–2018 that spanned regions ranging from Africa to the Caucasus, it offers a better understanding of the varied forms, features, and historical backgrounds of revolutions, as well as their causes. Accordingly, it highlights recent revolutions in their historical and world-systems contexts. The handbook is divided into seven parts, the first of which examines the history of views on revolution and important aspects of the theory of revolution. The second part analyzes revolutions within long-term historical trends and in their world-system contexts. In turn, the third part explores specific major revolutionary waves in history. The fourth part analyzes the first revolutionary wave of the 21st century (2000–2009), the so-called color revolutions, while the fifth discusses the second wave – the Arab Spring (2010–2013) – as an important turning point. The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018. The seventh and final part offers forecasts on the future of revolutions. Given its scope, the book will appeal to scholars and students from various disciplines interested in historical trends, sociopolitical change, contentious politics, social movements, and revolutionary processes involving both nonviolent campaigns and political violence. Once again, this volume demonstrates the kind of open-minded, systematic analysis that the field of revolutionary studies requires. (Prof. George Lawson, Department of International Relations, Australian National University Canberra)

New Wave of Revolutions in the MENA Region Leonid Issaev, Andrey Korotayev, 2022-11-05 This book offers a comparative perspective on the new wave of revolutions in the MENA region. Recently, a new wave of revolutions has swept the Middle East and North Africa (MENA) region, comparable in some respects to the events of the Arab Spring. Revolutionary events have significantly changed the political regimes in Sudan, Algeria and Mali, while Lebanon and Iraq have also witnessed serious revolutionary episodes. Further, a new quality of protests has manifested in Iran, Egypt, Morocco and Jordan. Presenting a variety of country studies, this book identifies similarities and differences between the events of the Arab Spring and the current upheavals in the MENA region and examines their causes and world-system context. It also analyzes the motivating forces, goals and organizational forms of the protesters and other actors involved, as well as the political and economic consequences of these revolutionary events. Moreover, it seeks to understand why some countries that were actively involved in the Arab Spring have remained largely unaffected by these developments. The book appeals to scholars of political science with a focus on comparative politics, Middle Eastern politics and political sociology.

Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 United States. Congress. House. Committee on Armed Services, 2008

Reconsidering the Limits to Growth Viktor Sadovnichy, Askar Akaev, Ilya Ilyin, Sergey Malkov, Leonid Grinin, Andrey Korotayev, 2023-09-25 Echoing the famous *The Limits to Growth* report from 1972, this edited volume analyses the changes that the World System has undergone to the present, on the fiftieth anniversary of the original report. During the past fifty years, both the concept and understanding of these limits have significantly changed. This book highlights that the evolution of the World System has approached a new critical milestone, moving into a fundamentally new phase of historical development, when the old economic and social technologies no longer work as efficiently as before or even begin to function counterproductively, which leads the World System into a systemic crisis. The book discusses the transition of human society to a new phase state, the shape of which has not yet been determined. New approaches are needed for both, for the analysis of the global situation, and for forecasts. The book is based on an integrated approach including the world-systems, historical and evolutionary perspectives, as well as a systematic view of society, in which changes in one subsystem cause transformations in others. Through mathematical modeling, it defines the main vectors of transformations of the World System; makes a detailed forecast of the development of all the main subsystems of the society and the World System, while presenting horizons of changes from short-term to ultra-long-term; and presents different development scenarios as well as recommendations on how to achieve a transition to the most favorable scenario. The book will appeal to members and followers of the Club of Rome, policy-makers, as well as to scholars from various disciplines interested in a better understanding of the World System evolution, global futures, development studies, climate change, and future societies.

Organic Reaction Mechanisms 1989 A. C. Knipe, W. E. Watts, 2008-04-30 The only book series to summarize the latest progress on organic reaction mechanisms, *Organic Reaction Mechanisms*, 1989 surveys the development in understanding of the main classes of organic reaction mechanisms reported in the primary scientific literature in 1989. The 25th annual volume in this highly successful series highlights mechanisms of

stereo-specific reactions. Reviews are compiled by a team of experienced editors and authors, allowing advanced undergraduates, graduate students, postdocs, and chemists to rely on the volume's continuing quality of selection and presentation.
