Dictionary of Terms in Research Methodology Dr. Lokesh Sharma, Dr. Kiran Nayar, 2021-07-15 Research is a process of enquiry and investigation, it is systematic, methodical and ethical and it can help to solve problems and increase knowledge. The book enables the user to gain a quick, basic appreciation for many of the key concepts in research in the process of assessing the usefulness of a research study. "Methodology" implies more than simply the methods you intend to use to collect data. It is often necessary to include a consideration of the concepts and theories which underlie the methods. For instance, if you intend to highlight a specific feature of a sociological theory or test an algorithm for some aspect of information retrieval, or test the validity of a particular system, you have to show that you understand the underlying concepts of the methodology. The objective of this book is to present terms related to Research Methodology, in a way that students and researchers can easily understand and can apply in their research project. The book is an alphabetical list of terms used in research that provide user friendly definitions. There are many variations of terms within research, efforts have been made to incorporate most of the correlated terms in the book. The book is meant to cover the most practical and common research terms which are used in educational and the social and behavioural sciences. The Alphabetical arrangement of terms in this book is based on Rules for arrangement of various concepts and subjects in the scheme of classification of books called, "Colon Classification by Dr. S.R. Ranganathan." The same is as follows: 1. Signs and symbols precede small and capital English alphabets in the order . : ; , - () 2. Small letters have been used after signs and all Capital letters used at last. For Example:- Data Data, null Data-- analysis plan Data--collection instrument Data (plural; singular: datum) Data analysis Data bank Data collection The Substantive Digits shall be taken to fall in the following sequence when arranged in the ascending sequence of absolute value (025): a b c d e f g h i j k l m n o p q r s t u v w x y z A B C D E F G H I J K L M N O P Q R S T U V W X Y Z The Connecting Symbol shall be taken to fall in the following sequence when arranged in the ascending sequence of absolute value (0252). . : ; , - () The absolute value of any Connective Symbol is less than that of any Substantive Digit. In other words it is less than that of a (0253). The book is comprehensive, clear and user friendly. The book will be an indispensable reference tool for researchers, professionals, guides and students.
