Free Government e-Resources for Youth Dorothy Ormes, 2016-08-15 Specifically focusing on the resources on federal government available online, this book supports the education of young citizens and supplies directions for conducting programs for youth on the government. Government documents offer a wealth of useful information that is often ignored or misinterpreted—even by librarians. And while improved search engines have improved access to online documents in recent years, patrons—especially young people—typically need help navigating and understanding the sites. *Free Government e-Resources for Youth* helps librarians promote online government information to youth and to assist youth in using it to become informed and educated about our federal government and how it works. Author Dorothy Ormes—a Federal Depository Library Program librarian at the university level—has created a guide to government resources that public and school librarians can use to support the education of young citizens. The book covers various areas of K-12 curriculum, highlighting activities and lesson plans based on national and state standards, and gives helpful directions for creating displays and conducting programs for youth on the government. The book also provides a brief explanation of the Federal Depository Library Program (FDLP) and describes how a public library can work with FDLP librarians or take advantage of an unprecedented opportunity to join the FDLP as active participants and benefit the community.

The Educator's Guide to Producing New Media and Open Educational Resources Tim D. Green, Abbie H. Brown, 2017-07-06 Digital video, audio, and text have never been more popular, and educators need to know how to make new media work in all types of learning environments. *The Educator's Guide to Producing New Media and Open Educational Resources* provides practical advice on how to produce and use open access resources to support student learning. This realistic how-to

guide is written for education professionals in any discipline seeking to transform their instruction with technology.

How to Launch a Magazine in this Digital Age Mary Hogarth, 2013-12-19 Lively and engaging, *How to Launch a Magazine in this Digital Age* adopts a practical guide for students and inexperienced editors, detailing the process of setting up and launching a new publication -- be it digital, print or a combination of both. Using case studies, theoretical/critical insights, and tests/exercises, this is the first how-to to embrace digital technologies, including a companion website with additional support with podcasts, web links, forums and timed live author chats. The key to the text's success is its ability to encompass the complete process. It begins with the initial idea and follows the process through to developing a business plan as well as setting an editorial strategy to achieve and maintain an audience in a digital age -- where traditional print formats face an uncertain future. It includes checklists and realistic timescales for producing a digital/print magazine, for both the working professional and the student in the classroom setting.

Fake News vs Media Studies Julian McDougall, 2019-12-01 This book explores the place of Media Studies in the age of 'fake news', analysing the calls for a curriculum of critical news literacy as part of a cyclical policy debate. With the need for young people in democracies to understand mainstream news agendas and take a critical perspective on social media news, including so-called 'fake news', this book argues for Media Studies as a mandatory subject. However, 'fake news' is not presented in the book as a stable, neutral term with a clear definition, but is instead defined as an idea that risks obscuring the key critical and political premise of Media Studies. All media representation requires critical deconstruction: therefore, any distinction between 'real' and 'fake' media is a false binary. The author draws together two narrative strands: one analysing contemporary

news and journalism, featuring interviews with journalists and news commentators, and the other re-appraising the discipline of Media Studies itself. This bold and innovative book will appeal to all those interested in the nebulous and often confusing media landscape, as well as students and practitioners of Media Studies.

New Media and China's Social Development Yungeng Xie, 2017-10-03 Starting from a history of new media, this book presents the development of network technology and media applications in China, while also examining the relationship between new media and politics, economy, culture, lifestyle, traditional media, law, knowledge, etc. As of 2014, China had been connected to the Internet for 20 years. During those two decades, China has witnessed drastic changes, from its national makeup to people's daily lives. The book analyzes the changes in China brought about by the new media on the basis of large-scale data. Further, through comparisons with international trends in new media development, it seeks to clarify the new media development in China and comprehensively demonstrate the revolution and brand-new faces of Chinese society over the past two decades in the wake of new media. As such, it outlines the bright future of new media by revisiting and summarizing the developmental courses of new media and Chinese society.

Societal Benefits of Freely Accessible Technologies and Knowledge Resources Terán, Oswaldo, 2015-04-30 Open access to information resources and technology can have a profound impact on the economic development of a region as well as society in general. In recent years, reaction against proprietary knowledge and technology has led to tremendous debate both in academic and professional circles. *Societal Benefits of Freely Accessible Technologies and Knowledge Resources* analyzes current perspectives on the advantages of unrestricted access to information

resources and technology intended to advance the prospect for knowledge, innovation, and development across the globe. Touching on topics of relevance to the private and public sectors, this publication is ideally designed for use by policymakers, business managers, academicians, researchers, students, IT practitioners, and legal professionals.

Smart Resources in Ophthalmology Parul Ichhpujani, Sahil Thakur, 2018-06-06 This book provides information on how to extract the most from mobile applications and easily adapt and integrate them into daily practice. Today mobile applications that can optimize patient flow, help in examinations, perform anterior/posterior segment imaging, offer differential diagnosis and therapeutic options and even serve as patient drug reminders and councilors are easily available. Most of them have been developed by individuals and as a result lack marketing, even though they are free to download and use. Ophthalmology has always been at the forefront of medicine when it comes to adopting the latest developments — be they lasers, off-label anti-VEGF drugs or biocompatible implants. Mobile phones and tablets have infiltrated our private and professional lives and they are here to stay. As such, this book explores the endless possibilities that mobile computing offers, and introduces the vista of opportunities for providing better care, one download at a time. As part of the series “Current Practices in Ophthalmology” this volume is intended for residents and fellows in-training, as well as general and specialist ophthalmologists.

Metadata for Transmedia Resources Ana Vukadin, 2019-07-13 Transmedia is a technique of delivering a single piece of content in individual parts via different media and communication platforms (books, films, TV shows, games, live performances, etc.). In the book transmedia is considered as a case-in-point for the need to rethink library cataloguing and metadata practices in a new, heterogeneous information environment where the ability to bring together information from

various sources into a meaningful whole becomes a critical information skill. Transmedia sheds new light on some of the long-existing questions of bibliographic information organisation (the definition of work, modelling of bibliographic relationships, subject analysis of fiction, etc.) and introduces libraries to new, transient and interactive media forms such as interactive fiction, gaming events, or performances. The book investigates how various theories and practices of bibliographic information organisation can be applied to transmedia, focusing on the solutions provided by the new bibliographic conceptual model IFLA LRM, as well as linked open data models and standards. It strongly advocates collaborative practices and reuse of knowledge that underpin an emerging vision of the library catalogue as a 'mediation tool' that assembles, links and integrates information across a variety of communication contexts. Explores transmedia from the point-of-view of information organisation Presents one of the first extensive analyses of the IFLA LRM bibliographic conceptual model Uses examples of recent publishing practices to assess current bibliographic data models, standards, formats and technologies

Challenges In Preparing Human Resources with Global Competence: A Case Study on The Dayak Community in Kalimantan Barat Clarry Sada,2019-01-02 This paper will focus on the Dayak tribe. In recent time, the participation of the Dayak in all aspects of life has existed though the participation is not significantly happen. In the aspect of politics, there are some Dayak's politicians who are seated as the member of parliament or house of representatives. They have taken part actively in building and developing this nation though it is still under their expectation. The number of Dayak's politicians to re[present their group might be not significantly with the Dayak's population, therefore, their struggle to support their community might be not so strong.

Geoheritage and Geotourism Resources Nicoletta Santangelo,Ettore Valente,2021-01-20 This Special Issue outlines the role of geoheritage and geotourism as potential touristic resources of a region. The term “geoheritage” refers to a particular type of natural resources represented by sites of special geological significance, rarity or beauty that are representative of a region and of its geological history, events, and processes. These sites are also known as “geosites” and, as well as archaeological, architectonic, and historical sites, can be considered as part of the cultural estate of a country. “Geotourism” is an emerging type of sustainable tourism, which concentrates on geosites, focusing on visitor knowledge, environmental education, and amusement. Geotourism may be very useful for geological sciences divulgation and may provide additional opportunities for the development of rural areas, generally not included among the main touristic attractions. The collected papers focused on these main topics with different methods and approaches and can be grouped as follows: i) papers dealing with geosite promotion and valorization in protected areas; ii) papers dealing with geosite promotion and valorization in non-protected areas; iii) papers dealing with geosite promotion by exhibition, remote sensing analysis, and apps; iv) papers investigating geotourism and geoheritage from tourists' perspectives.

Human Resource Information Systems Richard D. Johnson,Kevin D. Carlson,Michael J. Kavanagh,2020-09-10 Human Resource Information Systems: Basics, Applications, and Future Directions is a one-of-a-kind book that provides a thorough introduction to the field of Human Resource Information Systems (HRIS) and shows how organizations today can leverage HRIS to make better people decisions and manage talent more effectively. It includes the latest research and developments in the areas of HRIS justification strategies, HR technology, big data, and artificial intelligence. Numerous examples, best practices, discussion questions, and case studies, make this book the most student-friendly and current text on the market. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Human Resources Information Systems Nicolas A. Valcik, Meghna Sabharwal, Teodoro J. Benavides, 2023-07-19 This volume provides an introduction to Human Resource Information Systems (HRIS) for those in the public administration field. At the intersection between human resource management and information technology, HRIS is often the key to having and maintaining the personnel data that is essential for hiring and recruitment, strategic planning and analysis, and legal requirements in most public organizations. Revised and updated for the second edition, this book describes what an HRIS system is, what the functionality of such a system should be, and outlines the practical aspects of an HRIS. It also compares the different aspects of human resources in public organizations, non-profit organizations, and private corporations, and how differences across organizations may influence the functionality requirements of the HRIS. Finally, the volume contains both an organizational theory component, which frames how an HRIS interacts with an organization both from a functional standpoint and a reporting standpoint. The book includes a practical component, which includes real-world case studies that illustrate the advantages and pitfalls to implementing an HRIS enterprise system. Providing a thorough introduction to HRIS for both academics and practitioners, this volume is appropriate for researchers, graduate students, and

practitioners in the fields of public administration, higher education administration, information systems, computer science, and human resources.
