Philosophy's Treason D. M. Spitzer,2020-05-05 'Philosophy's Treason: Studies in Philosophy and Translation' gathers contributions from an international group of scholars at different stages of their careers, bringing together diverse perspectives on translation and philosophy. The volume's six chapters primarily look towards translation from philosophic perspectives, often taking up issues central to Translation Studies and pursuing them along philosophic lines. By way of historical, logical, and personal reflection, several chapters address broad topics of translation, such as the entanglements of culture, ideology, politics, and history in the translation of philosophic works, the position of Translation Studies within current academic humanities, untranslatability within philosophic texts, and the ways philosophic reflection can enrich thinking on translation. Two more narrowly focused chapters work closely on specific philosophers and their texts to identify important implications for translation in philosophy. In a final "critical postscript" the volume takes a reflexive turn as its own chapters provide starting points for thinking about philosophy and translation in terms of periperformativity. From philosophers critically engaged with translation this volume offers distinct perspectives on a growing field of research on the interdisciplinarity and relationality of Translation Studies and Philosophy. Ranging from historical reflections on the overlap of translation and philosophy to philosophic investigation of questions central to translation to close-readings of translation within important philosophic texts, Philosophy's Treason serves as a useful guide and model to educators in Translation Studies wishing to illustrate a variety of approaches to topics related to philosophy and translation.

Planning non existent dictionaries João Paulo Silvestre,Alina Villalva ,2015 There is an increasing number of dictionary types and lexical search-tools designed to respond to an ever-growing array of user needs. The quest for innovation, however, is not over and this is what this book shall shed light on. In the autumn of 2013, a conference entitled Planning non-existent dictionaries was held at the University of Lisbon. Scholars and lexicographers were invited to present and submit for discussion their research and practices, focusing on aspects that are traditionally perceived as shortcomings by dictionary makers and dictionary users. The topics for debate were intended to be provocative: the identification of dictionary types that have never been developed for certain languages or for a given lexical domain, as well as typological and linguistic problems that may compromise the development of lexicographic projects. We hoped that the discussion would lead to the presentation of problem-solving strategies, especially those related to corpora documentation, information technology and data presentation. We received an incredible response and have had the opportunity to acknowledge several projects that are different in size, novelty and degree of accomplishment.

Manual of Romance Phonetics and Phonology Christoph Gabriel,Randall Gess,Trudel Meisenburg,2021-11-22 This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.

Diglossia Mauro Fernández,1993-01-01 Today, the notion of 'diglossia' occupies a prominent place in sociolinguistic research. Since the 1960s, when the dominant sense of 'diglossia' was the complementary sociofunctional distribution of two varieties of the same language, the term has been applied -- often controversially -- to a growing number of diverse sociolinguistic situations. As a consequence of this extension of the scope of the concept, in combination with an increasing interest in the relationship between the role of language and the social structure, the number of publications in this field has risen exponentially over the last decades. However, despite the growing importance of the notion, up till now there was no adequate bibliography devoted to diglossia, while coverage in other bibliographies does not do justice to the number of works actually published in this area. This first comprehensive bibliography of the subject includes almost 3,000 entries;

although the time span covered is 1960-1990, the book includes several dozens of entries from before 1960 and also a substantial number of very recent publications from the period 1990-1992. The selection of items has not been restricted to a specific definition of diglossia: all available publications in which the term (or one of its offsprings) appears have been included; moreover, when considered appropriate, some material relevant to the subject has been added even though the term is not explicitly used. The usefulness of the bibliography has been enhanced significantly by six indexes: (1) index of languages, (2) diglossia in literature, (3) historically oriented works, (4) pedagogically oriented works, (5) theoretical works, and (6) theses and dissertations.

Teaching for Global Community César Augusto Rossatto, 2011-06-01 Education has long been viewed as a vehicle for building community. However, the critical role of education and schools for constructing community resistance is undermined by recent trends toward the centralization of educational policy-making (e.g. racial profiling new laws in the US—Arizona and Texas; No Child Left Behind and global racism), the normalization of “globalization” as a vehicle for the advancement of economic neo-liberalism and social hegemony, and the commodification of schooling in the service of corporate capitalism. Alternative visions of schooling are urgently needed to transform these dangerous trends so as to reconstruct public education as an emancipatory social project. *Teaching for Global Community: Overcoming the Divide and Conquer Strategies of the Oppressor* examines these issues among related others as a way to honor and re-examine Freirean principles and aim to take critical pedagogy in new directions for a new generation. The goal is to build upon past accomplishments of Paulo Freire’s work and critical pedagogy while moving beyond its historical limitations. This includes efforts that revisit and re-evaluate established topics in the field or take on new areas of contestation. Issues related to education, labor, and emancipation, broadly defined and from diverse geographical context, are addressed. The theoretical perspectives used to look at these emerge from critical pedagogy, critical race theory, critiques of globalization and neoliberalism, marxist and neo-marxist perspectives, social constructivism, comparative/international education, postmodernism indigenous perspectives, feminist theory, queer theory, poststructuralism, critical environmental studies, postcolonial studies, liberation theology, with a deep commitment to social justice.

Development of Writing Skills in Children in Diverse Cultural Contexts Alina Galvão Spinillo, Carmen Sotomayor, 2023-06-16 This book brings together multiple theoretical perspectives and disciplinary approaches to study the acquisition and development of written language by children as well as the implications for teaching and learning of writing practices in a variety of languages and cultural contexts. Chapters in this contributed volume present both theoretical contributions and results of research carried out with students and teachers from 11 countries (Belgium, Brazil, Chile, Israel, Italy, Mexico, the Netherlands, Portugal, Spain, UK and USA) who speak seven different languages: Portuguese, Spanish, English, Italian, French, Dutch and Hebrew. By bringing together research developed in diverse cultural contexts it enriches the debates in the interdisciplinary field of writing studies by analyzing a wide range of topics at the interface between research and educational implications for the teaching and learning of writing by children. The book consists of five parts, each one addressing a specific set of topics. Part I presents studies on topics related to written language representation systems (phonological and morphological awareness) and on the relationship between grammar and the quality of texts of different genres. Part II includes studies related to compositional processes of writing texts, and the factors involved in these processes. Part III focuses on the difficulties faced by students during the acquisition and development of writing. Part IV is dedicated to chapters that discuss and compare writing practices in different social environments. Finally, chapters in part V deal with teaching and learning of writing in the school setting. *Development of Writing Skills in Children in Diverse Cultural Contexts: Contributions to Teaching and Learning* will be of interest to researchers and students in the fields of psychology, education and linguistics, as well as to other social scientists in the broader interdisciplinary field of writing studies.

The Law of MERCOSUR Marcilio Toscano Franca Filho, Lucas Lixinski, María Belén Olmos Giupponi, 2010-10-29 The Law of MERCOSUR presents both an overview and in-depth analysis of one of the world's most important and increasingly influential economic organisations. The book comprises both a series of first-hand analyses of MERCOSUR by experts from countries in the MERCOSUR bloc, and also discussions from other parts of the world looking at MERCOSUR as global actor of ever-increasing importance. The book is divided into three main parts: the first analyses the key institutional legal aspects of MERCOSUR, looking at its history, the general theory of economic integration, and basic aspects relating to the functioning of MERCOSUR; the second examines specialised topics, including the regulation of the environment, human rights and the energy market in MERCOSUR; and in the third part the editors offer a translation of core MERCOSUR instruments, with the objective of furthering understanding of the economic bloc. Original in its conception, the book aims to fill a major gap in the English-language literature by offering a comprehensive and in-depth analysis of the Law of MERCOSUR, and it is hoped that it will become essential reading for those practitioners and academics who are interested not only in MERCOSUR, but in economic integration generally, in international trade, and in the regional aspects of the phenomenon of globalisation.
