The Politics of Pharmaceutical Policy Reform Elize Massard da Fonseca,2014-11-17

Brazil is renowned worldwide for its remarkable reforms in pharmaceutical regulation, which have enhanced access to essential medicines while lowering drug costs. This book innovates by analysing the generic drug reform in Brazil, demonstrating that pharmaceutical regulation is only partially influenced by non-state actors. Little is known about the institutional antecedents and policy process that channeled this regulatory reform. This is particularly intriguing because a regulatory shift in the pharmaceutical sector requires the participation of a number of stakeholders and interest groups in the policy process. Fonseca examines the generic drug reform's causes and consequences. No study has approached the generic drug regulation in Brazil from this perspective. *The Politics of Pharmaceutical Policy Reform: A Study of Generic Drug Regulation in Brazil*, explores the following:

- The politics of pharmaceutical regulation in Brazil over the last 25 years.
- The political negotiations to approve the Generic Drug Act, which involved a hard-to-reach agreement between the pharmaceutical industry (national and multinational), the Ministry of Health, and Congress
- The controversial decisions to regulate packaging and pharmaceutical equivalence.
- The surprising success of Brazilian pharmaceutical firms, which became market champions in a sector largely dominated by multinational firms.
- Comparative lessons from the Brazilian case for the political construction of regulatory standards to regulate generic drugs and its effects on global health.

This book will interest political scientists and health policy scholars concerned with the political conflicts in the

pharmaceutical sector. It argues against well-established approaches to regulatory capture such as control of the regulatory process by interest groups and policy diffusion. It can be used as evidence for graduate courses in public policy, health policy and political science. Because Brazil is one of the largest markets for pharmaceuticals in the world, business leaders and consultancy firms would also be interested.

**A Ditadura Militar e a Governança da Água no Brasil (The Military Dictatorship and Water Governance in Brazil)** Fernanda de Souza Braga, 2020-03-11  
In recent decades there has been an exponential increase in large hydroelectric plants in Brazil, especially in the Amazon region. These large hydraulic structures impact the environment and the lives of people living in the places where they settle and require a special type of water governance. The dictatorial regime (1964-1985) created a standard for the construction of these great structures, through an institutional and legal framework, which benefited the Brazilian business elite but also, through the creation of a popular imagination, which shows itself lasting progress on the country's progress and development. The suspension of security, the fragility of institutional environmental structures, the disrespect for indigenous reserves, the lack of clarity about the concept of affected population and the non-payment of fair compensation were identified as one of the main challenges for a democratic water governance in the country. In the late 1970s, the Dam-Affected Movement (MAB) began its organization and is also studied in this research. The study is an important and insightful academic contribution to the understanding of the main bottlenecks of effective water governance in Brazil.

*Funding Democratization* Allan Ware, 2017-07-12 Democracy is a fine political system,

but an expensive economic venture. Political parties and election campaigns cost money. Where does the money come from and at what sacrifice? Issues connected with political finance are significant but often neglected aspects of the process of democratization. *Funding Democratization* examines how money and politics interact in emerging democracies. The contributors investigate the funding of political parties in early North America, financial uncertainties of party formation in European countries, funding of democratization in new democracies, and the influence of funding on contenders for power. They also address the nature of political competition in countries that are seeking to embrace, often for the first time, the rules of democracy. They question in what ways politicians can help make democracy affordable. The volume compares important democratizing countries, such as Russia, Brazil, South Africa, Spain, and the regions of East Asia and East/Central Europe. It also investigates the lessons that emerging democracies can learn from the history of political finance in today's more established democracies. *Funding Democratization* will be of interest to political scientists and specialists in international social and political development.

Eric Hobsbawm Richard J. Evans, 2019-03-29 Eric Hobsbawm's works have had a nearly incalculable effect across generations of readers and students, influencing more than the practice of history but also the perception of it. Born in Alexandria, Egypt, of second-generation British parents, Hobsbawm was orphaned at age fourteen in 1931. Living with an uncle in Berlin, he experienced the full force of world economic depression, and in the charged reaction to it in Germany was forced to choose between Nazism and Communism, which was no choice at all. Hobsbawm's lifelong allegiance to Communism

inspired his pioneering work in social history, particularly the trilogy for which he is most famous--The Age of Revolution, The Age of Capital, and The Age of Empire--covering what he termed the long nineteenth century in Europe. Selling in the millions of copies, these held sway among generations of readers, some of whom went on to have prominent careers in politics and business. In this comprehensive biography of Hobsbawm, acclaimed historian Richard Evans (author of The Third Reich Trilogy, among other works) offers both a living portrait and vital insight into one of the most influential intellectual figures of the twentieth century. Using exclusive and unrestricted access to the unpublished material, Evans places Hobsbawm's writings within their historical and political context. Hobsbawm's Marxism made him a controversial figure but also, uniquely and universally, someone who commanded respect even among those who did not share-or who even outright rejected-his political beliefs. Eric Hobsbawm: A Life in History gives us one of the 20th century's most colorful and intellectually compelling figures. It is an intellectual life of the century itself.

**Brazilian Mobilities** Maria Alice De Faria Nogueira, Camila Maria dos Santos Moraes, 2020-02-17 Brazilian Mobilities presents an overview of the diversity of mobility studies developed in Brazil. It builds a picture of a strong Latin-American perspective emerging in the field of mobilities research, which provides unique insight into the complex dynamics of mobilities in the emerging countries from the Global South. Addressing such different areas as tourism, urbanization, media studies, social inequalities, marketing and mega-events, transport and technology, among others, the contributors use the new mobilities paradigm, or NMP (Sheller & Urry, 2006) as a starting

point to reflect about the social changes experienced in the country and they also engage with newer literature on mobilities, including work done by Brazilian and Latin-American authors depending on the subject of each individual chapter. Illustrating to scholars the uniqueness and complexity of the Brazilian social-political and economic context, the book was organized in order to be a representative sample of the studies carried out in Brazil, as well as to contribute to other academic investigations on (im)mobilities and different social realities in emerging countries.

**Juventude contemporânea em pauta** Rafael Iwamoto Tosi, 2015-01-01 Juventude contemporânea em pauta é um livro que procura investigar como os grandes meios de comunicação representam a juventude em seus produtos midiáticos. Como parte essencial dessas representações, o livro desenvolve o que é ser jovem nos campos da fisiologia, psicologia, cultura e comportamento, cruzando esses dados com as respectivas representações culturais dos jovens nos filmes, novelas, revistas especializadas e jornais. Especificamente, o livro relaciona a construção da juventude brasileira do início do século XXI com as reportagens de uma importante revista semanal de atualidades, que desenvolve em suas pautas conteúdos muito particulares sobre a amplitude do que é ser jovem na contemporaneidade.

**Media Leaks and Corruption in Brazil** Mads Bjelke Damgaard, 2018-07-06 Analyzing the political consequences of the most extensive corruption investigation in recent Latin American history, Operação Lava-Jato, Media Leaks and Corruption in Brazil answers two central questions about the contradictory effects news media has on political systems. First, how can political actors in a seemingly well-functioning democracy quickly

override checks and balances, and replace a head of state with a corrupt vice-president? Second, how can very active news media, while ostensibly performing the role of the watchdog, still fail to deliver media accountability to the public? Combining a quantitative view of the media sphere with case studies of the leaks, legal actions, and alliances forming and breaking in the Brazilian Congress, Mads Bjelke Damgaard demonstrates that the media's attention to leaks and investigations of corruption paved the way for Dilma Rousseff's impeachment. By timing the disclosure of information in scandals, actors with inside information were able to drive the media agenda and let some scandals escape from the limelight. The book delivers an in-depth study of how scandals become political weapons in a time of media personalities and post-politics. This book will interest scholars of Latin American Studies, and Brazil, and the broader fields of media studies, democracy studies, and journalism studies.

**The Politics and Practice of Religious Diversity** Andrew Dawson, 2016-04-20 The Politics and Practice of Religious Diversity engages with one of the most characteristic features of modern society. An increasingly prominent and potentially contentious phenomenon, religious diversity is intimately associated with contemporary issues such as migration, human rights, social cohesion, socio-cultural pluralisation, political jurisdiction, globalisation, and reactionary belief systems. This edited collection of specially-commissioned chapters provides an unrivalled geographical coverage and multidisciplinary treatment of the socio-political processes and institutional practices provoked by, and associated with, religious diversity. Alongside chapters treating religious diversity in the 'BRIC' countries of Brazil, Russia, India and China, are contributions which

discuss Australia, Finland, Mexico, South Africa, the UK, and the United States. This book provides an accessible, distinctive and timely treatment of a topic which is inextricably linked with modern society's progressively diverse and global trajectory. Written and structured as an accessible volume for the student reader, this book is of immediate interest to both academics and laypersons working in mainstream and political sociology, sociology of religion, human geography, politics, area studies, migration studies and religious studies.

**Management of Natural Disasters** S. Syngellakis, 2016-12-12 Comprising a selection of articles dedicated to disaster management this volume focuses on the challenges arising from extreme natural phenomena and descriptions of methods for assessing their occurrence probability and of measures for mitigating their intensity and detrimental effects. The first group of articles describes general strategies for risk assessment and mitigation, providing examples in the context of various kinds of natural disasters. The economic impact of mitigation measures, communities' differing coping capabilities, human attitudes towards relocation and possible links to climate change are among the topics considered. Natural strategies are outlined in the contexts of Turkey, Brazil and United Arab Emirates. The second part of the book is concerned with disasters from specific natural causes starting with a group of ten articles on floods. The corresponding contributions address flood frequency, vulnerability and resilience of communities, response of small and medium enterprises, risk in terms of financial losses, private investment participation to mitigation measures, assessment of design solutions against flood hazard, sleeper dykes as a means of reducing risk, preparedness of hospitals,

causes of highway flooding and their relative importance, and impact of floods on poor communities. The third set of articles are related to earthquake-related hazards describing, in particular, an analysis tool providing integrated risk, coping capacity and management output, a method for assessing vulnerability considering key contributing factors, a technique for urban aftershock management and damage assessment, and neural network modelling to estimate tsunami damage. Finally, a group of three articles address issues related to landslides, namely, slope management as a means of reducing risk and losses, early warning based on rainfall data, and hazard prediction using favourability function modelling and spatial target mapping software. Providing a unique global perspective this volume focuses on recent developments over a wide range of topics that cannot be found in similar, currently available, publications in this field. This is a valuable addition to the relevant literature available to researchers and engineers working on risk assessment and mitigation of natural disaster intensity and consequences. It will appeal of those working in academic and research environments as well as governmental, professional, national and international organisations.

**Disaster Management and Human Health Risk IV** S.M. Sener,C.A. Brebbia,O. Ozcevik,2015-05-20 As human population has continued to concentrate in urban areas, the number of people and the value of property affected by disasters, both natural and human-generated, have grown as well. Earthquakes, floods, hurricanes, cyclones, tornadoes, and forest fires have all taken their toll so have such anthropogenic disasters as pipeline failures, industrial spills, and terrorist attacks. The contents of this volume consist of papers presented at the fourth in a series of conferences convened to assess the potential

risk from various disasters and discuss ways to prevent or mitigate damage. The papers have been contributed by experts on public health, security, and disaster management from academia, industry, and government. Topics covered include Disaster Analysis; Disaster Monitoring and Mitigation; Emergency Preparedness; Risk Mitigation; Risk and Security; Safety and Resilience; Socio-economic Issues; Health Risk; Human Factors; Multi-hazard Risk Assessment; Case Studies.

**Routledge Handbook of Community Forestry** Janette Bulkan, John Palmer, Anne M. Larson, Mary Hobley, 2022-06-30 This handbook provides a comprehensive overview and cutting-edge assessment of community forestry. Containing contributions from academics, practitioners, and professionals, the Routledge Handbook of Community Forestry presents a truly global overview with case studies drawn from across Africa, Asia, Europe, and the Americas. The Handbook begins with an overview of the chapters and a discussion of the concept of community forestry and the key issues. Topics as wide-ranging as Indigenous forestry, conservation and ecosystem management, relationships with industrial forestry, trade and supply systems, land tenure and land grabbing, and climate change are addressed. The Handbook also focuses on governance, looking at the range of approaches employed, including multi-level governance and rights-based approaches, and the principal actors involved from local communities and Indigenous Peoples to governments and national and international non-governmental organisations. The Handbook reveals the importance of the historical context to community forestry and the effects of power and politics. Importantly, the Handbook not only focuses on successful examples of community forestry, but also addresses failures in order to highlight the key challenges we are still

facing and potential solutions. The Routledge Handbook of Community Forestry is essential reading for academics, professionals, and practitioners interested in forestry, natural resource management, conservation, and sustainable development.

*Los cambios en el mundo del trabajo del periodista* Figaro, Roseli, Nonato, Cláudia, Grohmann, Rafael, 2016-09-02 El quehacer del periodista se ha modificado sustancialmente. Los materiales periodísticos impresos, televisivos o radiofónicos se producen hoy de manera completamente distinta a la de hace años. Las tecnologías de la comunicación y de la información posibilitaron que se redujera el tiempo y el espacio, lo que ha reducido el tiempo de reflexión y de investigación. El periodismo en línea, en tiempo real, los blogs y las herramientas de las redes sociales digitales constituyen innovaciones en las rutinas profesionales. Pero ¿cómo observa el profesional de la información esos cambios? ¿Qué piensa el periodista sobre su propio trabajo y sobre el periodismo en general? ¿Cómo la actividad laboral le organiza su vida? ¿Qué tipo de consumidor mediático es el periodista?

**Signs of Hope** Alejandro Bullon, 2009-07 In a world in which life is no longer sacred, hunger and poverty are rampant, and natural disasters are worse than ever before, people find themselves hoping against hope that things will get better. Turn on the news, and you'll be bombarded with stories of vicious crimes, cruel wars, and terrible disasters. From all appearances, our world seems to be hurtling toward a catastrophic finale. But whos to blame for all this chaos, anyway? Is there actually a rational explanation for the horrific events that take place each and every day? And is there anything that could save us from this mess? Alejandro Bulln tackles these and other daunting questions and discovers that

the crisis in which weve found ourselves is itself a sign of hope pointing to the grand finalethe second coming of Jesus.

**Feelings and Work in Modern History** Agnes Arnold-Forster, Alison Moulds, 2022-01-27 Work in all its guises is a fundamental part of the human experience, and yet it is a setting where emotions rarely take centre stage. This edited collection interrogates the troubled relationship between emotion and work to shed light on the feelings and meanings of both paid and unpaid labour from the late 19th to the 21st century. Central to this book is a reappraisal of 'emotional labour', now associated with the household and 'life admin' work largely undertaken by women and which reflects and perpetuates gender inequalities. Critiquing this term, and the history of how work has made us feel, *Feelings and Work in Modern History* explores the changing values we have ascribed to our labour, examines the methods deployed by workplaces to manage or 'administrate' our emotions, and traces feelings through 19th, 20th and 21st century Europe, Asia and South America. Exploring the damages wrought to physical and emotional health by certain workplaces and practices, critiquing the pathologisation of some emotional responses to work, and acknowledging the joy and meaning people derive from their labour, this book appraises the notion of 'work-life balance', explores the changing notions of professionalism and critically engages with the history of capitalism and neo-liberalism. In doing so, it interrogates the lasting impact of some of these histories on the current and future emotional landscape of labour.

Low Carbon Energy Transitions Kathleen Araújo, 2017-11-03 The world is at a pivotal crossroad in energy choices. There is a strong sense that our use of energy must be more

sustainable. Moreover, many also broadly agree that a way must be found to rely increasingly on lower carbon energy sources. However, no single or clear solution exists on the means to carry out such a shift at either a national or international level. Traditional energy planning (when done) has revolved around limited cost projections that often fail to take longer term evidence and interactions of a wider set of factors into account. The good news is that evidence does exist on such change in case studies of different nations shifting toward low-carbon energy approaches. In fact, such shifts can occur quite quickly at times, alongside industrial and societal advance, innovation, and policy learning. These types of insights will be important for informing energy debates and decision-making going forward. *Low Carbon Energy Transitions: Turning Points in National Policy and Innovation* takes an in-depth look at four energy transitions that have occurred since the global oil crisis of 1973: Brazilian biofuels, Danish wind power, French nuclear power, and Icelandic geothermal energy. With these cases, Dr. Araújo argues that significant nationwide shifts to low-carbon energy can occur in under fifteen years, and that technological complexity is not necessarily a major impediment to such shifts. Dr. Araújo draws on more than five years of research, and interviews with over 120 different scientists, government workers, academics, and members of civil society in completing this study. *Low Carbon Energy Transitions* is written for professionals in energy, the environment and policy as well as for students and citizens who are interested in critical decisions about energy sustainability. Technology briefings are provided for each of the major technologies in this book, so that scientific and non-scientific readers can engage in more even discussions about the choices that are involved.

BRIDGING CIVIL-MILITARY GAP: Strategies for Robust Relationships and Successful Operations Anthonia Egbujiobi, 2019-06-22 In this timely and relevant book, Flight Lieutenant Anthonia Egbujiobi presents facts and figures from her detailed research on curbing insecurity and calls for co-operation between the military and civilians as the way to combating insecurity. The book also suggests how this collaboration can and should be achieved. She was inspired to author this book when she was nominated by the United Nations to serve in Congo as a military observer. Her experiences about the programmes and empowerment schemes she conducted in Congo - which earned her a recognition and award by the UN and Nigerian Air Force — with the peoples and communities where she served are documented in her first book titled, *Building Castles With Pebbles*.

*The Bolsonaro Paradox* Camila Rocha, Esther Solano, Jonas Medeiros, 2021-08-28 This book presents the first in-depth academic investigation published in English about one of the most radical incarnations of the current global wave of new right-wing movements and governments: the movement that brought to power the current Brazilian president, Jair Bolsonaro. The rise of this new right-wing movement in Brazil came as a surprise to many analysts who used to see the country as a successful example of the implementation of progressive social policies in the first decade of the 21st century, and posed many questions to those seeking to understand the role Brazil now plays in the development of this international far-right wave. The authors of this volume try to answer some of these questions by presenting the results of an extensive field research conducted over the years with Bolsonaro supporters and members of the new Brazilian right-wing movements. They have analyzed quantitative and especially qualitative data to accompany the accelerated

transformations of the Brazilian public sphere, starting from small liberal and conservative groups on social media towards larger audiences via book publishing, the education system, the mainstream media, and the political-party system. By framing the Brazilian case in the wider international political scenario, *The Bolsonaro Paradox: The Public Sphere and Right-Wing Counterpublicity in Contemporary Brazil* will be an invaluable resource for sociologists, political scientists, international relations scholars and other social scientists – as well as to journalists and political analysts – interested in better understanding the role Brazil plays in the global rise of new far-right movements and governments.

*Novos estados e a divisão territorial do Brasil* José Donizete Cazzolato, Repleto de mapas originais, gráficos e dados comparativos, esta obra é uma referência para geógrafos, formuladores de políticas públicas, estudantes de Geografia e todos os interessados na discussão da geopolítica brasileira.

**Dominant Elites in Latin America** Liisa L. North, Timothy D. Clark, 2017-08-18 This volume examines the ways in which the socio-economic elites of the region have transformed and expanded the material bases of their power from the inception of neo-liberal policies in the 1970s through to the so-called progressive ‘pink tide’ governments of the past two decades. The six case study chapters—on Chile, Brazil, Ecuador, Colombia, El Salvador, and Guatemala—variously explore how state policies and even United Nations peace-keeping missions have enhanced elite control of land and agricultural exports, banks and insurance companies, wholesale and import commerce, industrial activities, and alliances with foreign capital. Chapters also pay attention to the ways in which violence

has been deployed to maintain elite power, and how international forces feed into sustaining historic and contemporary configurations of power.
