RFID and Auto-ID in Planning and Logistics Erick C. Jones, Christopher A.

Chung, 2016-04-19 As RFID technology is becoming increasingly popular, the need has arisen to address the challenges and approaches to successful implementation. RFID and Auto-ID in Planning and Logistics: A Practical Guide for Military UID Applications presents the concepts for students, military personnel and contractors, and corporate managers to learn about RFID

The Department Of Defense's Second Chasm in RFID-UID Technology Adoption ,2007

This study examines the possibility of the existence of a Second Chasm in the DoD's Radio Frequency Identification (RFID) and Unique Identification (UID) adoption. The study focuses on the DoD's small business partner's willingness to conform to the RFID-UID mandates and their reasons why. The compliance information was collected through anonymous surveys of DoD small business suppliers. The study then discusses the results of the survey and the relevance of the data to the DoD, and concludes with our findings and recommendations for alternate implementation plans for the mandates.

Defense Logistics: Better Strategic Planning Can Help Ensure DOD's Successful Implementation of Passive Radio Frequency Identification ,2005 The Department of Defense (DOD) has had problems with tracking and identifying inventory for many years, most recently in Operation Iraqi Freedom. One of several tools DOD is using to address these inventory problems is radio frequency identification (RFID). RFID technology consists of passive or active tags that are attached to equipment and supplies that are shipped from one location to another. Although DOD did not begin official implementation of passive RFID technology until January 1, 2005, DOD has been using active RFID technology since the early 1990s and began developing policy and pilot testing passive RFID in

2003. As of January 1, 2007, all commodities, excluding bulk commodities, are to have passive RFID tags. Full implementation of passive RFID is estimated to cost hundreds of millions of dollars. This report (1) provides information on the status of passive RFID implementation, (2) addresses the extent to which DOD has developed a strategic approach for implementing passive RFID, and (3) highlights challenges DOD recognizes it faces in implementing passive RFID and any plans developed by DOD to mitigate these challenges.

RFID V. Daniel Hunt, Albert Puglia, Mike Puglia, 2007-04-13 This book provides an introduction to RFID technology. It describes and addresses the following: How RFID works, how it is and can be used in current and future applications. The History of RFID technology, the current state of practice and where RFID is expected to be taken in the future. The role of middleware software to route data between the RFID network and the information technology systems within an organization. Commercial and government use of RFID technology with an emphasis on a wide range of applications including retail and consumer packaging, transportation and distribution of products, industrial and manufacturing operations, security and access control. Industry standards and the regulatory compliance environment and finally, the privacy issues faced by the public and industry regarding the deployment of RFID technology.

Iraq and Afghanistan have focused attention on the performance of the Department of Defense's (DOD) supply chain management. According to DOD, it spent approximately \$178 billion on its supply chain in fiscal year 2007. As a result of weaknesses in DOD's management of its supply chain, this area has been on GAO's list of high-risk federal government programs since 1990. DOD released its Logistics Roadmap in July 2008 to guide, measure, and track logistics improvements. DOD has identified two technologies included in this roadmap, item unique identification (IUID) and passive radio frequency identification (RFID), as having promise to address weaknesses in asset visibility. GAO reviewed (1) the extent to which the roadmap serves as a comprehensive, integrated strategy to improve logistics; and (2) the progress DOD has made implementing IUID and passive RFID. GAO reviewed the roadmap based on DOD statements about its intended purposes and visited sites where IUID and passive RFID were implemented. GAO recommends that DOD (1) include in its roadmap additional information and elements needed for a comprehensive strategy and (2) collect data associated with the implementation of IUID and passive RFID, analyze their return on investment, and determine if sufficient funding priority has been provided.

RFID in Logistics Erick C. Jones, Christopher A. Chung, 2007-12-03 Radio Frequency Identification (RFID) tagging is now mandated by the department of defense and many of the world's largest retailers including Wal-Mart. In order to stay competitive, more than 200,000 manufacturers and suppliers must develop strategies for integrating RFID technologies into their supply chains. RFID in Logistics: A Practical Introduction provides businesses and other relevant concerns with an

authoritative step-by-step guide to the implementation and diverse applications of this revolutionary communications technology. Survey RFID applications in entertainment, credit devices, wireless communications, healthcare, and libraries Learn about both active and passive system components testing models Examine best practices for integrating RFID technology into the supply chain Combining techniques from computer, electrical, and industrial engineering, RFID in Logistics: A Practical Introduction supplies the basic instruction needed to develop and implement RFID technology.

Plunkett's Wireless, Wi-Fi, Rfid & Cellular Industry Almanac: Wireless, Wi-Fi, Rfid & Cellular Industry Market Research, Statistics, Trends & Leading Jack W. Plunkett, 2007-07 The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers

and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

RFID Strategic Implementation and ROI Charles C. Poirier, Duncan McCollum, 2006-03-15 Radio Frequency Identification (RFID) is an emerging technology in business. But is it a temporary fad or an unstoppable business improvement process? This book looks at this issue and suggests the need to better understand what RFID is all about.

RFID Handbook Syed A. Ahson, Mohammad Ilyas, 2017-12-19 Radio Frequency Identification (RFID) tagging is now used by the department of defense and many of the world's largest retailers

including Wal-Mart. As RFID continues to infiltrate industries worldwide, organizations must harness a clear understanding of this technology in order to maximize its potential and protect against the potential risks it poses. The RFID Handbook provides an overview of RFID technology, its associated security and privacy risks, and recommended practices that will enable organizations to realize productivity improvements while also protecting sensitive information and the privacy of individuals. Expert contributors present a host of applications including RFID enabled automated receiving, triage with RFID for massive incidents, RFID and NFC in relation to mobile phones, and RFID technologies for communication robots and a privacy preserving video surveillance system. The unprecedented coverage also includes detailed descriptions of adaptive splitting protocols as well as tree-based and probabilistic anti-collision protocols. Drawing on its distinguished editors and world-renowned contributors, this one-of-a-kind handbook serves as the ultimate reference on RFID, from basic research concepts to future applications.
