Taking Punk to the Masses Jacob McMurray, 2011-05-23 Taking Punk to the Masses: From Nowhere to Nevermind visually documents the explosion of Grunge, the Seattle Sound, within the context of the underground punk subculture that was developing throughout the U.S. in the late 1970s and 1980s. The book serves as a companion and contextual backdrop to the Nirvana: Taking Punk to the Masses exhibition, which opens at Seattle's Experience Music Project in 2011. This decade-and-a-half musical journey will be represented entirely through the lens of EMP's oral history and permanent object collection, an invaluable and rich cultural archive of over 800 interviews and 140,000 objects – instruments, costumes, posters, records and other ephemera dedicated to the pursuit of rock 'n' roll. Taking Punk to the Masses focuses on 100 key objects from EMP's permanent collection that illustrate the evolution of punk rock from underground subculture to the mainstream embrace (and subsequent underground rejection) of Grunge. These objects are put into context by the stories of those who lived it, culling from EMP's vast archive of oral histories with such Northwest icons as Mudhoney's Mark Arm, cartoonist Peter Bagge, design legend Art Chantry, Beat Happening's Calvin Johnson, Sub Pop founders Bruce Pavitt and Jonathan Poneman, the Screaming Trees' Mark Lanegan, Nirvana's Krist Novoselic, photographer Charles Petersen, Soundgarden's Kim Thayil, and dozens of others. From the Northwest's earliest punk bands like The Wipers, to proto-grunge bands of the 1980s like Green River, Melvins and Malfunkshun, through the heady 1990s when bands such as Nirvana, Soundgarden, Pearl Jam, Alice in Chains and Mudhoney rose to the national stage and popularized alternative music, Taking Punk to the Masses is the first definitive history of one of America's most vibrant music scenes, as told by the participants who helped make it so, and through the artifacts that survive.

How to Do Nothing Jenny Odell, 2020-12-29 ** A New York Times Bestseller ** NAMED ONE OF THE BEST BOOKS OF THE YEAR BY: Time • The New Yorker • NPR • GQ • Elle • Vulture • Fortune • Boing Boing • The Irish Times • The New York Public Library • The Brooklyn Public Library A complex, smart and ambitious book that at first reads like a self-help manual, then blossoms into a wide-ranging political manifesto.—Jonah Engel Bromwich, The New York Times Book Review One of President Barack Obama's Favorite Books of 2019 Porchlight's Personal Development & Human Behavior Book of the Year In a world where addictive technology is designed to buy and sell our attention, and our value is determined by our 24/7 data productivity, it can seem impossible to escape. But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind's role in the environment, and arrive at more meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, How to do Nothing is an action plan for thinking outside of capitalist narratives of efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

M Is for Mama Abbie Halberstadt, 2022-02-01 A PUBLISHER'S WEEKLY BESTSELLER *Mama* of ten Abbie Halberstadt helps women humbly and gracefully rise to the high calling of motherhood without settling for mediocrity or losing their minds in the process. Motherhood is a challenge. Unfortunately, our worldly culture offers moms little in the way of real help. Mamas only connect to celebrate surviving another day and to share in their misery rather than rejoice in what God has done and to build each other up in hard times. There has to be a better way, a biblical way, for mamas to grow and thrive. As a daughter of Christ, you have been called to be more than an average mama. Attaining excellence doesn't have to be unsettling but it will take committed focus and a desire to parent well according to God's grace and for His glory. *M is for Mama* offers advice, encouragement, and scripturally sound strategies seasoned with a little bit of humor to help you embrace the challenge of biblical motherhood and raise your children with love and wisdom. *Mama*, you are worthy of the awesome responsibility God has given you. Now it's time to start believing you can live up to it.

Representations and Techniques for 3D Object Recognition and Scene Interpretation Derek Hoiem, Silvio Savarese, 2011 One of the grand challenges of artificial intelligence is to enable computers to interpret 3D scenes and objects from imagery. This book organizes and introduces major concepts in 3D scene and object representation and inference from still images, with a focus on recent efforts to fuse models of geometry and perspective with statistical machine learning. The book is organized into three sections: (1) Interpretation of Physical Space; (2) Recognition of 3D Objects; and (3) Integrated 3D Scene Interpretation. The first discusses representations of spatial layout and techniques to interpret physical scenes from images. The second section introduces representations for 3D object categories that account for the intrinsically 3D nature of objects and provide robustness to change in viewpoints. The third section discusses strategies to unite inference of scene geometry and object pose and identity into a coherent scene interpretation. Each section broadly surveys important ideas from cognitive science and artificial intelligence research, organizes and discusses key concepts and techniques from recent work in computer vision, and describes a few sample approaches in detail. Newcomers to computer vision will benefit from introductions to basic concepts, such as single-view geometry and image classification, while experts and novices alike may find inspiration from the book's organization and discussion of the most recent ideas in 3D scene understanding and 3D object recognition. Specific topics include: mathematics of perspective geometry; visual elements of the physical scene, structural 3D scene representations; techniques and features for image and region categorization; historical perspective, computational models, and datasets and machine learning techniques for 3D object recognition; inferences of geometrical attributes of objects, such as size and pose; and

probabilistic and feature-passing approaches for contextual reasoning about 3D objects and scenes. Table of Contents: Background on 3D Scene Models / Single-view Geometry / Modeling the Physical Scene / Categorizing Images and Regions / Examples of 3D Scene Interpretation / Background on 3D Recognition / Modeling 3D Objects / Recognizing and Understanding 3D Objects / Examples of 2D 1/2 Layout Models / Reasoning about Objects and Scenes / Cascades of Classifiers / Conclusion and Future Directions

Motorcycles & Sweetgrass Drew Hayden Taylor,2021-06-01 A story of magic, family, a mysterious stranger . . . and a band of marauding raccoons. Otter Lake is a sleepy Anishnawbe community where little happens. Until the day a handsome stranger pulls up astride a 1953 Indian Chief motorcycle – and turns Otter Lake completely upside down. Maggie, the Reserve’s chief, is swept off her feet, but Virgil, her teenage son, is less than enchanted. Suspicious of the stranger’s intentions, he teams up with his uncle Wayne – a master of aboriginal martial arts – to drive the stranger from the Reserve. And it turns out that the raccoons are willing to lend a hand.

Smartups Rob Ryan,2012-06-15 Building successful start-ups was never quite as easy as it seemed, and the changing economic climate has raised the stakes, reduced the margin of error. New entrepreneurs can't stumble into wealth on the power of half-formed ideas, or turn dreams into reality without doing a lot of homework. It's time to get smart. This book teaches would-be entrepreneurs the skills they need to get through the venture capital process with companies that will survive to grow and succeed. Rob Ryan, a pioneer in the high-tech industry, founded Ascend Communications in 1989, and throughout the nineties provided firms with the infrastructure they needed to keep up with the rapid growth of the Internet. At the beginning of 1999, Ascend was sold to Lucent for \$25 billion. Since retiring from Ascend and starting Entrepreneur America, Ryan has helped launch a string of successful companies, including Virtmed, RightNow, and Virtual Ink. All provide electronic solutions to real-world problems, meet existing—rather than manufactured—needs, and save their customers time and money. In *Smartups*, Ryan focuses on methods he's developed over the years for building a sustainable business that makes money. He emphasizes the importance of testing ideas on customers and making sure that a product offers something new and important. Recognizing a team's key competencies is crucial, Ryan says. He also finds it necessary to take certain steps at the correct stages of a company's inception. *Smartups* will show you how to turn your idea into a real product, take it to investors, and get your start-up started right.

The Expanding News Desert Penelope Muse Abernathy,2018-11-15 This report delves into the implications for communities at risk of losing their primary source of credible news. By documenting the shifting news landscape and evaluating the threat of media deserts, this report seeks to raise awareness of the role interested parties can play in addressing the challenges confronting local news and democracy. The *Expanding News Desert* documents

the continuing loss of papers and readers, the consolidation in the industry, and the social, political and economic consequences for thousands of communities throughout the country. It also provides an update on the strategies of the seven large investment firms--hedge and pension funds, as well as private and publicly traded equity groups--that swooped in to purchase hundreds of newspapers in recent years and explores the indelible mark they have left on the newspaper industry during a time of immense disruption.

Bio-Inspired Innovation and National Security National Defense University, 2010-10-01 Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the emerging opportunities market of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called biologically inspired innovations, to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.

Before Yesterday We Could Fly: An Afrofuturist Period Room Ian Alteveer, Hannah Beachler, Sarah Lawrence, Michelle D. Commander, 2022-02-04 Seneca Village—a vibrant nineteenth-century community of predominantly Black landowners and tenants—flourished just west of The Met's current location until the city used eminent domain to seize the land in 1857, displacing its residents to make room for the construction of Central Park. The Met's latest Bulletin, *Before Yesterday We Could Fly: An Afrofuturist Period Room*, imagines a different history in the form of a new type of installation that departs from traditionally Eurocentric period displays to present a fictional but resonant domestic space. Texts by Ian Alteveer, Hannah Beachler, Michelle Commander, and Sarah Lawrence honor the real, lived history of the Seneca Village residents, while also exploring works by Black creators from the eighteenth century to the present day through the empowering lens of Afrofuturism. Including images of new works by Njideka Akunyili Crosby, Roberto Lugo, and Cyrus Kabiru, as well as an original graphic novella by New York Times bestselling author and illustrator John Jennings, this publication foregrounds generations of Black creativity and looks forward to a resilient future.

Virtual Art Oliver Grau,2004-09-17 An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Prima porta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 The Battle of Sedan, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

Ballad of a Turkey Hunter Hunter Farrior,2021-02-06 Turkey hunting is different. The humbling of nature, found only in the season of spring, is universally understood by those who hunt wild turkeys with a burning passion. There is an associated obsession, within the souls of turkey hunters, that is distinctly different than the mindset of those pursuing deer, duck, or any other realm of wild game. This book was written to celebrate, acknowledge, and ultimately pay respect to those who embrace the sounds, feelings, and appreciations that are

experienced while chasing these birds. Through a series of stories, lessons learned the hard way, and a few unfortunate situations, you will find both helpful tips and entertainment from the author's outlook toward spring turkey season as he enlightens upon his journey. Some advice and how to is also provided for turkey calling, setup strategies, camouflage patterns, roosted gobblers, and more. Through memories compiled from traveling across the southeastern and central states of the US, from his hometown in Mississippi, the author seeks to cure an addiction to the outdoor lifestyle, while providing a unique understanding to the heritage, history, and fulfillment found within the swamp bottoms of public land hunting areas. Each individual chapter is a new journey while unfolding how the mind of a turkey hunter processes the spring woods and the perceptions that eventually lead the author to create what is now known as Spring Legion.
