Beginning XML David Hunter, Andrew Watt, Jeff Rafter, Jon Duckett, Danny Ayers, Nicholas Chase, Joe Fawcett, Tom Gaven, Bill Patterson, 2005-01-03 What is this book about? Beginning XML, 3rd Edition, like the first two editions, begins with a broad overview of the technology and then focuses on specific facets of the various

specifications for the reader. This book teaches you all you need to know about XML: what it is, how it works, what technologies surround it, and how it can best be used in a variety of situations, from simple data transfer to using XML in your Web pages. It builds on the strengths of the first and second editions, and provides new material to reflect the changes in the XML landscape — notably RSS and SVG.

The Ramble Shamble Children Christina

Soontornvat,2021-03-09 New picture book by a two-time Newbery Honor-winning author! The delightful story of an unconventional family of kids who learn the ups and downs of working together. Merrra, Locky, Roozle, Finn, and little Jory love their ramble shamble house. It's a lot of work taking care of the garden, the chickens, and themselves, but they all pitch in to make it easier--even Jory, who looks after the mud puddles. When they come across a picture of a proper house in a book, they start wondering if their own home is good enough. So they get to work propering up the garden, the chickens, and even the mud puddles. But the results aren't exactly what they expected, and when their now-proper household's youngest member goes missing, they realize that their ramble shamble home might be just right for their family, after all.

All Thirteen: The Incredible Cave Rescue of the Thai Boys' Soccer Team Christina Soontornvat, 2020-10-13 A unique account of the amazing Thai cave rescue told in a heart-racing, you-are-there style that blends suspense, science, and cultural insight. On June 23, 2018, twelve young players of the Wild Boars soccer team and their coach enter a cave in northern Thailand seeking an afternoon's adventure. But when they turn to leave, rising floodwaters block their path out. The boys are trapped! Before long, news of the missing team spreads, launching a seventeen-day rescue operation involving thousands of rescuers from around the globe. As the world sits vigil, people begin to wonder: how long can a group of ordinary kids survive in complete darkness, with no food or clean water? Luckily, the Wild Boars are a very extraordinary ordinary group. Combining firsthand interviews of rescue workers with in-depth science and details of the region's culture and religion, author Christina Soontornvat—who was visiting family in Northern Thailand when the Wild Boars went missing—masterfully shows how both the complex engineering operation above ground and the

mental struggles of the thirteen young people below proved critical in the life-or-death mission. Meticulously researched and generously illustrated with photographs, this page-turner includes an author's note describing her experience meeting the team, detailed source notes, and a bibliography to fully immerse readers in the most ambitious cave rescue in history.

XML Hacks Michael Fitzgerald,2004 This is a practical guide that distills years of ingenious XML hacking into a complete set of tips, tricks and tools for those who want to leverage the untapped power of XML. It includes many real-world projects that illustrate how to define, create, read and manipulate XML documents.

A Wish in the Dark Christina Soontornvat,2020-03-24 A boy on the run. A girl determined to find him. A compelling fantasy looks at issues of privilege, protest, and justice. All light in Chattana is created by one man — the Governor, who appeared after the Great Fire to bring peace and order to the city. For Pong, who was born in Namwon Prison, the magical lights represent freedom, and he dreams of the day he will be able to walk among them. But when Pong escapes from prison, he realizes that the world outside is no fairer than the one behind bars. The wealthy dine and dance under bright orb light, while the poor toil away in darkness. Worst of all, Pong's prison tattoo marks him as a fugitive who can never be truly free. Nok, the prison warden's perfect daughter, is bent on tracking Pong down and restoring her family's good name. But as Nok hunts Pong through the alleys and canals of Chattana, she uncovers secrets that make her question the truths she has always held dear. Set in a Thai-inspired fantasy world, Christina Soontornvat's twist on Victor Hugo's *Les Misérables* is a dazzling, fast-paced adventure that explores the difference between law and justice — and asks whether one child can shine a light in the dark.

Handbook of Mathematical Fluid Dynamics S.
Friedlander,D. Serre,2002-07-09 The Handbook of

Mathematical Fluid Dynamics is a compendium of essays that provides a survey of the major topics in the subject. Each article traces developments, surveys the results of the past decade, discusses the current state of knowledge and presents major future directions and open problems. Extensive bibliographic material is provided. The book is intended to be useful both to experts in the field and to mathematicians and other scientists who wish to learn about or begin research in mathematical fluid dynamics. The Handbook illuminates an exciting subject that involves rigorous mathematical theory applied to an important physical problem, namely the motion of fluids.

Managing Forests as Complex Adaptive Systems

Christian Messier,Klaus J. Puettmann,K. David

Coates,2013-02-11 This book links the emerging concepts of complexity, complex adaptive system (CAS) and resilience to forest ecology and management. It explores how these concepts can be applied in various forest biomes of the world with their different ecological, economic and social settings, and history. Individual chapters stress different elements of these concepts based on the specific setting and expertise of the authors. Regions and authors have been selected to cover a diversity of viewpoints and emphases, from silviculture and natural forests to forest restoration, and from boreal to tropical forests. The chapters show that there is no single generally applicable approach to forest management that applies to all settings. The first set of chapters provides a global overview of how

complexity, CAS and resilience theory can benefit researchers who study forest ecosystems. A second set of chapters provides guidance for managers in understanding how these concepts can help them to facilitate forest ecosystem change and renewal (adapt or self-organize) in the face of global change while still delivering the goods and services desired by humans. The book takes a broad approach by covering a variety of forest biomes and the full range of management goals from timber production to forest restoration to promote the maintenance of biodiversity, quality of water, or carbon storage.

Performance of Distributed and Parallel Systems

Toshiharu Hasegawa, Hideaki Takagi, Yutaka Takahashi, 1989 Despite the proliferation and ever-increasing need for distributed processing and parallelism in computer and communication systems, their operational behaviour has been poorly understood. This is due to the extreme complexity found in cooperative processing in modern computer systems, and the complicated communication protocols for handling a variety of traffic in information network systems. In order to cope with these developments, mathematical modelling has become more and more sophisticated, and tailored to individual problems. However, it is fair to say that the performance characteristics of today's (and future) systems cannot be fully analyzed by the techniques currently available. This book is a result of the international seminar designed to promote progress in the development of techniques for resolving the performance issues of such complex systems.
