Your Ticket to the Universe Kimberly K. Arcand,Megan Watzke,2013 Easy-to-read guide to the universe. Includes information on the planets, and other astrological entities--

Light Kimberly Arcand,Megan Watzke,2024-07-16 A stunning visual exploration of the power and behavior of light across the entire electromagnetic spectrum. Light allows humans to see things around us, but we can only see a sliver of all the light in the universe, also known as the electromagnetic spectrum. Renowned science communicators Kim Arcand and Megan Watzke bring the entire spectrum to life and present the subject of light as never before. Organized along the order of the electromagnetic spectrum--from Radio waves to Gamma rays--each chapter focuses on a different type of light. From ultraviolet light, used in microscopy to image plant cells and bacteria, to X-rays, which let us peer inside the human body and view areas around black holes in deep space, Arcand and Watzke show us all the important ways light impacts us. With hundreds of stunning full-color photographs, including new images from the James Webb Space Telescope, *Light* is a joy to read and browse.

Worlds Within Worlds Isaac Asimov,1980 For the first time in history, humans are learning to produce and control nuclear energy -- the energy that, in the form of sunlight, has served humankind for its entire existence. With fossil fuel supplies dwindling, concerned citizens, no matter how scant their scientific knowledge, must understand this enormous force. Book jacket.
