

Rogue Sharks

Dean Crawford

Rogue Shark Kate Knight, Macmillan Education Australia, 2002 Madison overcomes her fear of shark attack and heads back into the water with her surfboard.

Sharks Don't Sink Jasmin Graham, 2024-07-16 From a marine biologist and co-founder of Minorities in Shark Sciences, a powerful debut memoir: the uplifting story of a young Black scientist's challenging journey to flourish outside the traditional confines of academia, inspired by her innate connection to nature's most misunderstood animal—the shark. Sharks have been on this planet for over 400 million years, which means there is a lot they can teach us about survival and adaptability. For example: unlike other fish, sharks are denser than water, so how do they stay afloat? They keep moving, in the only direction they can, which is forward. When Jasmin Graham, an award-winning young shark scientist, started to feel that the traditional path to becoming a marine biologist was pulling her under, she remembered the important lesson she learned from sharks: keep moving forward. If navigating the choppy waters of traditional academic study—a field where it was harder to find other young women of color than the elusive elasmobranchii (sharks, rays, skates, and sawfish) Jasmin loved—was no longer worth it, then that meant creating an ocean of her own. Jasmin joined with three other Black women to form Minorities in Shark Sciences (MISS), an organization dedicated to providing support and opportunities for other young women of color pursuing the fascinating and environmentally essential work of marine studies. She became an independent researcher: a rogue shark scientist, learning how to keep those endangered but precious sharks swimming free—just like her. *Sharks Don't Sink* is a riveting, moving, and ultimately triumphant memoir at the intersection of science and social justice: a guidebook to how we can all learn to respect and protect some of nature's most misunderstood and vulnerable creatures—and grant the same grace to ourselves.

Shark! H C Stuart Professor Emeritus Robert Reid, PhD, Robert Reid, 2011-03-04 SHARK! The cry that strikes fear into the hearts of beach lovers around the world. It carries a chill of terror, that death is nearby and waiting. Or injuries so shocking that the mind recoils from the thought. This book chronicles shark attacks both on Australia's fatal shores and overseas. It also records miraculous escapes – some so bizarre they defy belief, and some that display extraordinary courage in the face of extreme peril. Robert Reid interviews famous shark hunters and other adventurers who speak for the first time about their dangerous encounters with these fearsome predators. Reid investigates the phenomenon of the so-called 'rogue' sharks, those that stalk and kill humans in numbers, in the same place, at the same time. These are gripping stories that will both fascinate and frighten, stories that will take the reader into the realm of these strange but terrible creatures. They have ruled the oceans with ruthless efficiency for more than 400 million years. They are the silent killers of the deep.

Sharks Mary M. Cerullo, 1993 The word shark triggers the interest of many students. This book describes the physical characteristics, behavior, and varieties of sharks. It dispels common myths about these unusual fish. The full-color photos and the arousing descriptions of sharks won't be a disappointment to even the most reluctant reader.

Shark Dean Crawford, 2008-08-01 A sleek hunter of the seas, the shark has struck fear into the hearts of men since the days of the first fishermen. Dean Crawford now explores here the long relationship between shark and man, revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration. With a lineage stretching back over 100 million years, the shark has evolved into 350 different species, from the great white to the pike-bearing goblin to the tiny cookie-cutter. Crawford compiles here a fascinating narrative that analyzes how and why the animal looms large in our cultural psyche. While sharks have played a prominent part in religion and mythology, they are more commonly perceived as deadly predators—in such films as *Jaws* and *Dr. No*—or as symbols of natural violence, as in Hemingway's *Islands in the Stream*. *Shark* ultimately argues, however, that our ill-informed emotional responses, spurred by such representations, have encouraged the wholesale slaughter of sharks—and our ignorance endangers the very existence of the shark today. Both a celebration of their lethal beauty and plea for their conservation, *Shark* urges us to shed our fears and appreciate the magnificence of this majestic animal.

Close to Shore Michael Capuzzo, 2002-06-25 Combining rich historical detail and a harrowing, pulse-pounding narrative, *Close to Shore* brilliantly re-creates the summer of 1916, when a rogue Great White shark attacked swimmers along the New Jersey shore, triggering mass hysteria and launching the most extensive shark hunt in history. In July 1916 a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake—and, incredibly, a farming community eleven miles inland—the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry, press and politicians, and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man (and set out to prove it); Museum of Natural History ichthyologist John Treadwell Nichols, faced with the challenge of stopping a mythic sea creature about which little was known; and, most memorable, the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and superbly written, *Close to Shore* brings to life a breathtaking, pivotal moment in American history. Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking, pivotal moment in American history with startling immediacy.

Twelve Days of Terror D. G. D. Fernicola, 2016-05-02 Upon the 100th anniversary of the most terrifying stretch of shark attacks in American history—a wave said to have been the inspiration for *Jaws*—comes a reissue of the classic Lyons Press account and investigation. In July 1916, a time when World War I loomed over America and New York City was in the midst of a deadly polio epidemic, the tri-state area sought relief at the Jersey shore. The Atlantic's refreshing waters proved to be utterly inhospitable, however. In just twelve days, four swimmers were violently and fatally mauled in separate shark attacks, and a fifth swimmer escaped an attack within inches of his life. In this thoroughly researched account, Dr. Richard Fernicola, the leading expert on the attacks, presents a riveting portrait, investigation, and scientific analysis of the terrifying days against the colorful backdrop of America in 1916 in *Twelve Days of Terror*.

Sharks Niki Walker, Bobbie Kalman, 1997 *Sharks* describes these fascinating creatures from the fearsome great white to the gentle whale shark. Shark anatomy, behavior, and babies are explained alongside thrilling color photographs.

Answers to Your Questions about Sharks Hal Scharp, 1979 Hal Scharp dispels the myths and weighs the realities of shark attacks against the commendable aspects of this greatly maligned animal. Seventy-five questions embracing a broad spectrum of interesting facts about sharks, are posed and answered. What is the largest shark? The smallest? Do sharks feel pain? Has the power of a shark bite been measured? Do sharks migrate? Do sharks have enemies?

Killers in the Water – The New Super Sharks Terrorising The World's Oceans Sue Blackhall, 2012-07-27 Sharks are intriguing and beautiful creatures – but they can also be deadly. As we humans have explored the world's oceans and exploited them for tourism and recreation, we have found ourselves coming into contact with more and more sharks. And the outcome can be fatal. From the Seychelles to South Africa, and Australia to North America, tourists, divers and surfers have seemingly found themselves under increased threat from unprovoked shark attacks. Fatal attacks have occurred in locations that were previously thought to be safe, and in late 2010 the Egyptian

resort of Sharm el-Sheikh was rocked by an incredible five shark attacks in a matter of weeks. But are sharks really ruthless, vicious killers, or are they simply reacting to humans invading their habitat? Has the number of shark attacks increased in recent years? What can be done to prevent shark attacks? All these questions and more are answered in this fascinating book.

Close to Shore Michael Capuzzo, Mike Capuzzo, 2001 Describes how, in the summer of 1916, a lone great white shark headed for the New Jersey shoreline and a farming community eleven miles inland, attacking five people and igniting the most extensive shark hunt in history.

Shark Wars #2 EJ Altbacker, 2011-12-13 Ever since Gray, Barkley, and their friends defeated Goblin, an infamous great white, at Tuna Run, life in the Big Blue has become murkier than ever for this young shiver of sharks. Food is scarce. Enemies lurk in every shadow. And Gray still doesn't know what has become of his family - of his mother, Sandy, and the rest of his Coral Reef shiver. Everywhere they swim, currents seem to whisper of a growing threat . . . of a shark who will stop at nothing until he has seized control of the entire ocean. Now Gray must train with Takiza Jaelynn Betta vam Delacrest Waveland ka Boom Boom, a wise and mysterious fighting fish who has promised to teach his young apprentice the ways of the ocean and the secret of what it means to be a great warrior. That is, if Gray can learn to believe in himself, find the courage to trust his heart, and grow big enough to fight back!

Flaws Christopher L. Pepin-Neff, 2019-02-20 This book examines the policymaking process following highly emotional events. It focuses on the politics of shark "attacks" by looking at policy responses to tragic shark bites in Florida, Australia, and South Africa. The book reviews these cases by identifying the flaws in the human-shark relationship, including the way sharks are portrayed as the enemy, the way shark bites are seen as intentional, and how policy responses appear to be based on public safety. Flaws identifies politicians as the true sharks of this story for their manipulation of tragic circumstances to protect their own interests. It argues that shark bites are ungovernable accidents of nature, and that we are "in the way, not on the menu."

Shark Wars 1 & 2 EJ Altbacker, 2019-07-02 For the first time ever, Shark Wars and Shark Wars 2: the Battle of Riptide are published together in one single, action-packed edition. Since the dawn of time, prehistoric shark clans called shivers have ruled over the earth's oceans. For eons, the Big Blue has prospered under Shiver Law, and the delicate balance of sea life kept sacred. Until now. When a young shark named Gray is exiled from the safety of his peaceful reef home, he and his best friend Barkley find themselves forced to venture out into open water. In the dangerous open ocean, the two friends learn that not all sharks are interested in upholding Shiver Law, and some sharks are even trying to destroy it. With the ocean on the brink of chaos, Gray must work with his friends to take down the corrupt shivers and bring peace back to the ocean. But first, he'll have to unlock the secrets of his destiny and discover the truth about who--and what--he really is.

Shark Wars EJ Altbacker, 2022-05-24 Since the dawn of time, prehistoric shark clans called Shivers have ruled over the earth's oceans, fierce protectors of all who swim. For eons, the Big Blue has prospered under Shiver Law, and the delicate balance of sea life kept sacred. Until now. Rising sea temperatures and overfishing have caused food to become scarce, and the battle for new hunting grounds has brought with it corruption and warfare. Now, with the ocean on the brink of chaos, a young reef shark named Gray - exiled from the safety of his peaceful reef home - must venture deep into Open Water to unlock the secrets of his destiny and bring peace back to the ocean. But first, he'll have to discover the truth about who - and what - he really is.

Aussie Angels 18: Shark in the Dark Margaret Clark, 2012-03-01 Mum is out on the surfboard and narrowly misses being attacked by a shark - or maybe it was just a false alarm. When Alice the labrador falls off the rocks and nearly becomes shark bait though, Meg and Mike, the Aussie Angels, aren't so sure! Meg is terrified, but some visiting scientists give her the chance to face her fears. SHARK IN THE DARK is the eighteenth instalment in a series loved by children all over Australia.

Shark Attacks Blake Chapman, 2017-11-01 Humans spend more time in or on the water than ever before. We love the beach. But for many people, getting in the water provokes a moment's hesitation. Shark attacks are big news events and although the risk of shark attack on humans is incredibly low, the fact remains that human lives are lost to sharks every year. Shark Attacks explores the tension between risk to humans and the need to conserve sharks and protect the important ecological roles they play in our marine environments. Marine biologist Blake Chapman presents scientific information about shark biology, movement patterns and feeding behaviour. She discusses the role of fear in the way we think about sharks and the influence of the media on public perceptions. Moving first-hand accounts describe the deep and polarising psychological impacts of shark attacks from a range of perspectives. This book is an education in thinking through these emotive events and will help readers to navigate the controversial issues around mitigating shark attacks while conserving the sharks themselves.
