The Two Koreas and the Great Powers Samuel S. Kim, 2006-06-26 This book explores Korea's place in terms of multiple levels and domains of interaction pertaining to foreign-policy behaviors and relations with the four regional/global powers (China, Russia, Japan, and the United States). The synergy of global transformations has now brought to an end Korea's proverbial identity and role as the helpless shrimp among whales, and both North Korea and South Korea have taken on new roles in the process of redefining and projecting their national identities. Synthetic national identity theory offers a useful perspective on change and continuity in Korea's turbulent relationships with the great powers over the years. Following a review of Korean diplomatic history and competing theoretical approaches, along with a synthetic national-identity theory as an alternative approach, one chapter each is devoted to how Korea relates to the four powers in turn, and the book concludes with a consideration of inter-Korean relations and potential reunification.

Complexity, Security and Civil Society in East Asia Peter Hayes, Kiho Yi, 2015-06-22 Complexity, Security and Civil Society in East Asia offers the latest understanding of complex global problems in the region, including nuclear weapons, urban insecurity, energy, and climate change. Detailed case studies of China, North and South Korea, and Japan demonstrate the importance of civil society and 'civic diplomacy' in reaching shared solutions to these problems in East Asia and beyond. Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia's security. In doing so, the book identifies key pressure points at which civil society can push for constructive changes—especially ones that reduce the North Korean threat to its neighbors. Unusually, this book is both theoretical and practical. Complexity, Security and Civil Society in East Asia presents strategies that can be led by civil society and negotiated by its diplomats to realize peace, security, and sustainability worldwide. It shows that networked civic diplomacy offers solutions to these urgent issues that official 'complex diplomacy' cannot. By providing a new theoretical framework based on empirical observation, this volume is a must read for diplomats, scholars, students, journalists, activists, and individual readers seeking insight into how to solve the crucial issues of our time.

Transition Redesigned Wojciech W. Gasparski, Boleslaw Rok, 2013-01-23 Transition Redesigned deals with the philosophical bases of different types of transition: change in the economy, organizational/institutional change, and change in social and individual relationships. The editors' primary goal is to give further impetus to a much-needed worldwide debate on the issue of transition towards a better future. The volume reviews transitions made in different areas of human activity, assesses their relevancy, and analyzes their contexts. During this century, different organizations and institutions will undergo a level of radical and global change that has rarely been seen. The expected shift must be addressed in terms of a multidimensional transition toward building a sustainable society. Do we have an understanding of transition relevant to the task of meeting at least some of the challenges presented in this volume? Do we need a radical innovation for redesigning the transition that may enforce real social and ethical responsibilities into organizational practice on different levels and bring to life new ideas? Transition Redesigned seeks to answer these questions.

The Korean War Steven Hugh Lee, 2013-12-02 Tens of thousands of US soldiers and untold millions of Koreans died in this war the first major arena of the East-West conflict. This concise international history of the war offers a new approach to its understanding, tracing its origins and dynamics to the interplay between modern Korean history and twentieth century world history. The narrative also uniquely examines the social history of the conflict, and includes material on the newly racially integrated US fighting forces, war and disease, women and war and life in the Prisoner of War camps. While most surveys stop at 1953, with the signing of the armistice, Steven Hugh Lee carries the story through to the Geneva Conference in the spring of 1954 the last major international effort before recent years to negotiate a permanent peace for the Korean peninsula.

Nice Talk, GI. Robert V. Hunt Jr.,2023-07-25 Any veteran who served on active duty during the Korean and Vietnam Wars quickly learned that the U.S. military had its own unique language. It was a combination of acronyms, technical jargon and a considerable sprinkling of vulgarities. “Nice Talk, GI,” is a compilation of terminology used, overheard, or encountered by the author during his service with the U.S. Army from 1969 to 1971. An invaluable resource was the author's own “Soldier Notebooks,” kept during BCT and AIT. Also, while stationed in Korea, he served with a number of Vietnam War Veterans, and learned a significant amount of technology from them. An invaluable source was provided by access to Pacific Stars & Stripes newspaper from the era. While the work does not claim to be definitive, it is representative of terminology used by military personnel between 1950 and 1975.
