**Strengthening the Rule of Law through the UN Security Council** Jeremy Farrall, Hilary Charlesworth, 2016-04-14 The UN Security Council formally acknowledged an obligation to promote justice and the rule of law in 2003. This volume examines the extent to which the Council has honoured this commitment when exercising its powers under the UN Charter to maintain international peace and security. It discusses both how the concept of the rule of law regulates, or influences, Security Council activity and how the Council has in turn shaped the notion of the rule of law. It explores in particular how this relationship has affected the Security Council's three most prominent tools for the maintenance of international peace and security: peacekeeping, sanctions and force. In doing so, this volume identifies strategies for better promotion of the rule of law by the Security Council. This book will be of interest to scholars and students of international law, international relations, international development and peacekeeping.

**The International Rule of Law** Denise Wohlwend, 2021-05-28 This insightful book offers an in-depth examination of whether, and if so how and to what degree, contemporary international law can and should conform to and develop the rule of law principle. Motivated by the neglect of conceptual and normative theorizing of the international rule of law within contemporary international legal scholarship, Denise Wohlwend analyses the moral and legal principle of the rule of law in the international legal order.

**Networking the Rule of Law** Cristina Dallara, Daniela Piana, 2016-04-22 Judicial networks have proved effective in influencing recent judicial policies enacted by both old and new EU member states. However, this influence has not been standard. This volume seeks to improve our understanding of how networks function, as well as the extent they matter in the governance of a constitutional democracy. The authors examine the judicial function of networks, the way they cross the legal and territorial borders that confine the jurisdiction of the domestic institutions, and whether or not they are independent of the capacity and the leadership of their members. A highly salient issue in contemporary law and politics, judicial networks are now qualified actors of governance. With the aim to understand how, to what extent, and with what consequences networks interact with hierarchical institutions that still exist within the States, this book is essential reading for legal experts, policy makers engaged in promoting the rule of law, members of the judicial networks in the EU and extra EU countries, as well as academics and students.

**Understanding the EU's Norm and Policy Diffusion in ASEAN through Trade and Security Cooperation** Xuechen Chen, 2024-02-06 This book examines the European Union's (EU's) norm and policy diffusion in relation to the Association of Southeast Asian Nations (ASEAN). By looking at the EU's engagement with ASEAN in trade and non-traditional security, the book analyzes the drivers, processes, and effectiveness of the EU's norm and policy diffusion in ASEAN and explains the EU's foreign policy and power projection in the context of its relationship with ASEAN. In doing so, it helps to advance knowledge about the EU's external relations and power projection in relation to regional political entities beyond its immediate borders and affords firsthand empirical material on how the EU's power in global politics is impacted by external perceptions and responses in different policy fields. This book will be of key interest to scholars, students, and practitioners of EU foreign policy, EU-SEAN relations, and ASEAN politics and more broadly to European Studies, Comparative Regionalism, Asian Studies, and International Relations

**Engineering Psychology and Cognitive Ergonomics** Don Harris, 2015-07-20 This book constitutes the refereed proceedings of the 12th International Conference on Engineering Psychology and Cognitive Ergonomics, EPCE 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCII 2015, held in Los Angeles, CA, USA, in August 2015. **Integrated Peacebuilding** Craig Zelizer, 2018-04-19 Integrated Peacebuilding addresses the importance of weaving peacebuilding methods into diverse sectors including development, humanitarian assistance, gender, business, media, health, and the environment - areas where such work is needed the most. Incorporating peacebuilding approaches in these fields is critical for transforming today's protracted conflicts into tomorrow's sustainable peace. Covering both theory and practice, Dr. Zelizer and his team of leading academics and practitioners present original essays discussing the infrastructure of the peacebuilding field (outlining key actors, donors, and underlying motivations) as well as the ethical dilemmas created by modern conflict. Exploring both the challenges and lessons to be found in this emerging field, Integrated Peacebuilding is perfect for courses on peacebuilding, conflict resolution, international development, and related fields.

**Social Media Marketing** Dave Bratton, 2022-08-23 Marketing is an evolving systematic science, and it is constantly changing its rules according to the needs and developments that take place within and around it. To establish itself in the new era, it began to adapt the new methods of virtues to align with the new models of business. The role of marketing in business development still exists but the way in which it has been implemented is changing drastically due to the contributions made by satellite communications and widely developed scientific devices. Social media is best defined in the popular context as: blogging, microblogging, social networking, media sharing sites, social linking and site selection, analysis sites, forum and event. 2. **The Impact of Trade and Domestic Policy Reforms in India** Rajesh Chadha, Alan Verne Deardorff, Sanjib Pohit, Robert Mitchell Stern, 2010-08-27 Major economic reforms undertaken since 1991 have brought the Indian economy into a new phase of development directed toward becoming globally competitive through the opening of trade, foreign investment, and technology inflows. The private sector is expected to play a lead role, with a corresponding reduction in the role played by the public sector. This book is aimed at analyzing the comparative static effects of selected post-1991 trade and domestic policy reforms on trade, factor prices, economic welfare, and the intersectoral allocation of resources. The study relies on a computable general equilibrium (CGE) model that has been specially designed to analyze the potential economic effects of India's policy reforms. The model was developed in a collaborative effort involving the National Council of Applied Economic Research in New Delhi and the University of Michigan. Patterned after the Michigan CGE Model of World Production and Trade that has been in use for more than two decades, the India CGE model features closer attention to special characteristics of India's economic structure, including more agricultural sector detail, allowance for state ownership, and administered pricing. The conclusions of the study suggest that the policy reforms will yield increased real returns to land, labor, and capital, and shift the terms of trade in favor of Indian agriculture. Lastly, not only are there efficiency-enhancing intersectoral shifts in resource allocation but there are notable increases in scale economies across the Indian manufacturing sectors. Rajesh Chadha and Sanjib Pohit are Economists at the National Council of Applied Economic Research in New Delhi. Alan V. Deardorff and Robert M. Stern are Professors of Economics and Public Policy, University of Michigan.

**The Comparative Roles of Suspension-Feeders in Ecosystems** Richard F. Dame, Sergej Olenin, 2006-03-30 Animals are a major link between the water column (pelagic) and the bottom (benthic) habitats in most shallow systems. This coupling is dominated by active processes such as suspension-feeding in which the organism actively uses energy to pump water that is then filtered to

remove suspended particles that are consumed while undigested remains are deposited on the bottom. As a result of this feeding on and metabolism of particles, the animals excrete dissolved inorganic and organic waste back into the water column, and thus, become major components in the cycling and feedback of essential elements. With relatively high weight specific filtration rates of 1–10 liters/hour/gram dry tissue and a propensity to form large aggregated populations (beds, reefs, schools and swarms), these organisms can play an important role in regulating water column processes. Although estuarine bivalve molluscs such as oysters and mussels dominate the suspension-feeder literature, other groups including plankton and nekton that are found in estuarine as well as other aquatic systems are also potentially important removers of suspended particles. Thus, a significant part of the NATO Advanced Research Workshop focused on suspension-feeders as controllers of plankton abundance, biomass and diversity, system metabolism, nutrient cycling and scale dependency. Systems dominated by suspension-feeders are typically impacted by human activities including recreation, aquaculture, human and industrial pollution, and bilge water from shipping. Suspension-feeders are often impacted by fisheries and over-exploitation. These impacts commonly result in changes in ecosystem structure either through the food chain concentration of harmful substances or diseases, the introduction of alien species of suspension-feeders, or the instability of suspension-feeders systems through species displacement or phase shifts in the dominance between different suspension-feeding components such as nekton or zooplankton. These issues were addressed near the close of the workshop along with conclusions and syntheses developed by the working groups.

**The 21st Century Cold War** Jeffrey Kaplan, 2020-06-04 The 21st Century Cold War is a multidisciplinary approach to understanding the pattern of Russian interference in the internal affairs of other nations, suggesting that what in the Cold War was a simple conflict of East vs. West has expanded into a conflict between Russia and two increasingly separate Wests. The book begins with an examination of the structure of the Cold War and post-Cold War world, and subsequently explores Russian interference by overt, grey, and covert means including, but not limited to, cyberespionage, fake news, and the use of what in the Cold War would have been called front groups and agents of influence. The approach encompasses both historic and contemporary themes, with the question of whether the Cold War between East and West—capitalism and communism—is a thing of the past, or does it continue today in new ideological guises, as a central theme. Expert contributors explore what the motivations and implications for the pattern of Russian interference in the political processes of other states would be, and what new coalitions of actors are taking shape both for and against Russian activities. With a series of historical and contemporary case studies, focusing on the origins and contemporary dimensions of Russian information warfare, and exploring the issues involved from every perspective, *The 21st Century Cold War* will be of great interest to scholars of Security and Strategic Studies, International Relations, and Cold War History, as well as policy makers and security professionals. The chapters were originally published as a special issue

of Terrorism and Political Violence.
