Don't Just Roll the Dice Neil Davidson, Phil Factor, Michael Pryor, 2009 How do you price your software? Is it art, science or magic? How much attention should you pay to your competitors? This short handbook will provide you with the theory, practical advice and case studies you need to stop yourself from reaching for the dice. Table of Contents Chapter 01: Some - but not too much - Economics Chapter 02: Pricing Psychology: What is your product worth? Chapter 03: Pricing Pitfalls Chapter 04: Advanced Pricing Chapter 05: What your price says about you (and how to change it) Why read this book? At Business of Software 2007 Michael Pryor held an impromptu session on how to price your software. So many people turned up, and so many people kept on arriving, that by the time they d introduced themselves there was no time left to talk about software pricing. I ve had similar experiences; in fact, How do I price my software? is probably the most common question I m asked by software entrepreneurs and product managers. This handbook is an attempt to answer that question. Neil Davidson, Author. About the Author Neil Davidson is co-founder and joint CEO of Red Gate Software. Red Gate was founded in 1999 and now employs some 150 people. It was Cambridge News business of the year in 2006 and has been in the Sunday Times top 100 companies to work for three years running. It was founded with no VC money and little debt. Neil is also founder of the annual Business of Software conference and runs the Business of Software social network.

Don't Roll Your Eyes Ruth Nemzoff, 2012-09-04 More than two million couples wed every year in the United States, bringing together a whole new family unit. The extended family may now include a hard to please mother-in-law who criticizes her daughter-in-law's childrearing; or a patriarchal father-in-law who expects all the kin round the dinner table every Sunday; or a new spouse, who a year or decade out, still gets shellshock visiting the in-laws. If that wasn't cause enough for a stiff drink, more than a million couples divorce each year, creating hard to define family structures. How do families handle the inevitable friction and how do they make sense of evolving family relationships? Ruth Nemzoff, an expert in family dynamics, empowers family members across the generations to define and create lasting bonds, including how to: *Welcome a new in-law from a different culture and religion into your family. *Not let differences of politics or philosophy impact quality time with the extended family. *Respond to major life changes in an in-law's life, including financial crises, illnesses, or career changes. *Retain warm connections with in-laws even amidst divorce and remarriage. This is a must read for anyone dealing with a difficult in-law as well as anyone who will soon be welcoming a new member to their family.

That Rock Don't Roll Don Alexander, 2020-12-02 They say the sports world mimics the real world. It does—but there's a lot more sex, money, and betrayal. Blake Brennon is an investigative reporter for a national sports magazine. He knows morality isn't big in his industry, but murder is a whole other matter. Blake has always been protective of cheerleaders, but when one ends up murdered, he finds himself in the middle of the investigation. Blake and the local sheriff's department have a good relationship. Petula, the deputy sheriff, is the most beautiful woman Blake has ever seen, but she seems to be after more than just Blake's sparkling personality. Authorities want Blake's help in catching a killer, and he figures he can get the inside scoop by assisting. However, is Blake using Petula, or is she using him? As spectators, what we see on the field is unpredictable, but what we don't see is rife with danger and death.

Rover, Don't Roll Over Jody Rosengarten, 2004 Imagine how easy dog training would be if your dog could tell you exactly how to get the results you want. In ROVER, DON'T ROLL OVER, professional dog trainer and behavioral therapist Jody Rosengarten taps into our four-legged friends' perspective to present new, more realistic approaches to dog training. Does your dog insist on sleeping on your bed? It's okay—let him! Does your pup want to eat people food? Don't worry—go ahead! You don't have to practice training with your dog (at least not in any obvious way) and the words you choose to use during training don't matter—really! This pro-dog, anti-dogmatic manual rejects the rigidity of traditional obedience classes in lieu of kinder, gentler practices that encourage your dog's natural joie de vivre. Written for thinking dog lovers who want to better understand what makes their companions tick, ROVER, DON'T ROLL OVER is for busy owners who want a well-behaved dog, but don't want to spend a lot of free time getting there. Spoil your dog but teach her to listen too; this alternative guide offers proven yet flexible training methods that honor human and canine alike. An alternative approach to dog training for first-time puppy owners as well as dog devotees. Features real-life training options that honor the individuality of both owner and dog. Includes daily exercises, trouble-shooting tips, and a special needs chapter for training The Timid Dog, The Bossy Dog, and The Lonely Dog.

Lifespan David A. Sinclair, Matthew D. LaPlante, 2019-09-10 A NEW YORK TIMES BESTSELLER “Brilliant and enthralling.” —The Wall Street Journal A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time's most influential people. It's a seemingly undeniable truth that aging is inevitable. But what if everything we've been taught to believe about aging is wrong? What if we could choose our lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: “Aging is a disease, and that disease is treatable.” This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair's own lab at Harvard—that demonstrate

how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, Lifespan will forever change the way we think about why we age and what we can do about it.
