Baronial Patronage of Music in Early Modern Rome Valerio Morucci, 2018-04-19 This is the first dedicated study of the musical patronage of Roman baronial families in the sixteenth and early seventeenth centuries. Patronage – the support of a person or institution and their work by a patron – in Renaissance society was the basis of a complex network of familial and political relationships between clients and patrons, whose ideas, values, and norms of behavior were shared with the collective. Bringing to light new archival documentation, this book examines the intricate network of patronage interrelationships in Rome. Unlike other Italian cities where political control was monocentric and exercised by single rulers, sources of patronage in Rome comprised a multiplicity of courts and potential patrons, which included the pope, high prelates, nobles and foreign diplomats. Morucci uses archival records, and the correspondence of the Orsini and Colonna families in particular, to investigate the local activity and circulation of musicians and the cultivation of music within the broader civic network of Roman aristocratic families

over the period. The author also shows that the familial union of the Medici and Orsini families established a bidirectional network for artistic exchange outside of the Eternal City, and that the Orsini-Colonna circle represented a musical bridge between Naples, Rome, and Florence.

Elements of War Crimes under the Rome Statute of the International Criminal Court Knut Dörmann,2003-03-27 The Elements of War Crimes will assist the International Criminal Court (ICC) in the interpretation and application of the articles of the ICC Statute defining the crimes under its jurisdiction. These will not only be necessary for the future work of the ICC in interpreting the crimes provisions, but also for national courts, which have primary responsibility in the prosecution of international crimes under the Rome Statute. This commentary provides a critical insight into the travaux préparatoires of the Preparatory Commission leading to the adoption of the elements of war crimes. It contains an analysis of existing case law related to each war crime in the Statute. It will provide States, judges, prosecutors and international and national lawyers with key

background information to implement international humanitarian law in future cases dealing with war crimes under the ICC. A unique, indispensable tool for prosecuting and defense lawyers working in international criminal law.

Thermal Energy Yatish T. Shah,2018-01-12 The book details sources of thermal energy, methods of capture, and applications. It describes the basics of thermal energy, including measuring thermal energy, laws of thermodynamics that govern its use and transformation, modes of thermal energy, conventional processes, devices and materials, and the methods by which it is transferred. It covers 8 sources of thermal energy: combustion, fusion (solar) fission (nuclear), geothermal, microwave, plasma, waste heat, and thermal energy storage. In each case, the methods of production and capture and its uses are described in detail. It also discusses novel processes and devices used to improve transfer and transformation processes.

Complementarity in the Rome Statute and National Criminal Jurisdictions Jann K. Kleffner,2008-12-18 This book provides an in depth-examination of the principle of complementarity in the Rome Statute of the International Criminal Court and the implications of that principle for the suppression of genocide, crimes against humanity and war crimes on the domestic level. The book is set against the general background of the suppression of these crimes on the domestic level, its potential and pitfalls. It traces the evolution of complementarity and provides a critical and comprehensive analysis of the provisions in the Rome

Statute and the Rules of Procedure and Evidence relevant to complementarity. In so doing, it addresses both substantive and procedural aspects of admissibility, while taking account of the early practice of the ICC. Further attention is devoted to the question whether and to what extent the Rome Statute imposes on States Parties an obligation to investigate and prosecute core crimes domestically. Finally, the book examines the potential of the complementary regime to function as a catalyst for States to conduct domestic criminal proceedings vis-à-vis core crimes.

Pietro Blaserna and the Birth of the Institute of Physics in Rome Miriam Focaccia, 2019-04-30 This book draws upon a wealth of archival material to present the life and achievements of Pietro Blaserna, a “gentleman scientist” whose greatest legacy is considered to be the Institute of Physics on the Via Panisperna in Rome, of which he was the creator and first director. Both in this role and as President of the Accademia dei Lincei, Blaserna contributed enormously in establishing a sound institutional base for the further development of physics in Italy. Starting from an accurate historical reconstruction of the scientific, social, and political context, the author presents the different phases of Pietro Blaserna’s life and career. As a multifaceted intellectual and a scientist holding several institutional positions, Blaserna worked ceaselessly to promote an effective policy in science and technology, which was critically important in stimulating the development of Italy as a modern nation. Blaserna may not have left scientific works that made history, but what he created in Rome was a real house of physics, equipped with modern laboratories and instruments. In tracing his

important legacy, this book will be of interest for all historians of science and for historians of nineteenth and twentieth century Italy.

Rome Convention - Rome I Regulation Alexander J. Belohlávek, 2011-01-01 As of 17 December 2010, the Rome I Regulation (EU Regulation 593/2008) on the law applicable to contractual obligations is directly applicable in all EU Member States with the exception of Denmark. The Rome I Regulation replaces the Rome Convention of 1980 in the EU Member States and will apply to all contracts concluded as of 17 December 2010. However, and herein lies the utility and great importance of this work, the Rome Convention and the Rome I Regulation will be applied in parallel for a significant time to come (the author himself anticipates a ten-to-fifteen year period); in the latter case to contracts made after 17 December, 2010. This is why this commentary takes into account both sources of law, in their mutual interaction and broader context. The

comprehensiveness of the Rome Convention / Rome I Regulation is clearly apparent, but one of the great achievements of the author is his amassing of over 1,800 judicial decisions, most of which are furnished with a detailed commentary; where these decisions apply national laws, the latter are cited both in the original and in translation. For a number of rulings, the commentary include not only a case summary of the facts and an analysis of the conclusions drawn by the court, but also takes them as models to hypothesize what conclusions would be reached if the Rome I Regulation were to be applied.
