Materiality in Roman Art and Architecture Annette Haug,Adrian Hielscher,M. Taylor Lauritsen,2021-12-31 The focus of this volume is on the aesthetics, semantics and function of materials in Roman antiquity between the 2nd century B.C. and the 2nd century A.D. It includes contributions on both architectural spaces (and their material design) and objects – types of 'artefacts' that differ greatly in the way they were used, perceived and loaded with cultural significance. With respect to architecture, the analysis of material aesthetics leads to a new understanding of the performance, imitation and transformation of surfaces, including the social meaning of such strategies. In the case of objects, surface treatments are equally important. However, object form (a specific design category), which can enter into tension with materiality, comes into particular focus. Only when materials are shaped do their various qualities emerge, and these qualities are, to a greater or lesser extent, transferred to objects. With a focus primarily on Roman Italy, the papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world.

Breaking Ground Getzel M. Cohen,Martha Sharp Joukowsky,2010-06-02 At the close of the Victorian era, two generations of intrepid women abandoned Grand Tour travel for the rigors of archaeological expeditions, shining the light of scientific exploration on Old World antiquity. *Breaking Ground* highlights the remarkable careers of twelve pioneers-a compelling narrative of personal, social, intellectual, and historical achievement. -Claire Lyons, The Getty Museum Behind these pioneering women lie a wide range of fascinating and inspiring life stories. Though each of their tales is unique, they were all formidable scholars whose important contributions changed the field of archaeology. Kudos to the authors for making their stories and accomplishments known to us all! -Jodi Magness, University of North Carolina, Chapel Hill This book presents twelve fascinating women whose contributions to the development and progress of Old World archaeology---in an area ranging from Italy to Mesopotamia---have been immeasurable. Each essay in this collection examines the life of a pioneer archaeologist in the early days of the discipline, tracing her path from education in the classics to travel and exploration and eventual international recognition in the field of archaeology. The lives of these women may serve as models both for those interested in gender studies and the history of archaeology because in fact, they broke ground both as women and as archaeologists. The interest inherent in these biographies will reach well beyond defined disciplines and subdisciplines, for the life of each of these exciting and accomplished individuals is an adventure story in itself

The Remains of Ancient Rome John Henry Middleton,1892

The Legacy of Rome Cyril Bailey,1923 This book is an endeavour to trace in many fields the extent of the inheritance which the modern world owes to Ancient Rome. The chapters have been written independently, and it will be seen that they are not all on the same plan. Some writers have described the contribution of Rome to civilization, and have left it to the reader to infer the extent of the legacy; others have traced the steps by which the legacy has come to us, and to this subject Professor Foligno has devoted a valuable chapter. - Editor's note.

Roman Building Jean-Pierre Adam,2005-11-01 With over 750 illustrations, Roman Buildings is a thorough and systematic examination of Roman architecture and building practice, looking at large-scale public buildings as well as more modest homes and shops. Placing emphasis on the technical aspects of the subject, the author follows the process of building through each stage -- from quarry to standing wall, from tree to roof timbers -- and describes how these materials were obtained or manufactured. The author also discusses interior decoration and looks at the practical aspects of water supply, heating and roads.
