Pushing Boundaries in Southwestern Archaeology Stephen E. Nash, Erin L. Baxter, 2023-04-07

*Pushing Boundaries in Southwestern Archaeology* draws together the proceedings from the sixteenth biennial Southwest Symposium. In exploring the conference theme, contributors consider topics ranging from the resuscitation of archaeomagnetic dating to the issue of Athapaskan origins, from collections-based studies of social identity, foodways, and obsidian trade to the origins of a rock art tradition and the challenges of a deeply buried archaeological record. The first of the volume's four sections examines the status, history, and prospects of Bears Ears National Monument, the broader regulatory and political boundaries that complicate the nature and integrity of the archaeological record, and the cultural contexts and legal stakes of archaeological inquiry. The second section focuses on chronological "big data" in the context of pre-Columbian history and the potential and limits of what can be empirically derived from chronometric analysis of the past. The chapters in the third section advocate for advancing collections-based research, focusing on the vast and often untapped research potential of archives, previously excavated museum collections, and legacy data. The final section examines the permeable boundaries involved in Plains-Pueblo interactions, obvious in the archaeological record but long in need of analysis, interpretation, and explanation.

Are You an Ostrich Or a Llama? Larry Mogelonsky, 2012-07 *Are You an Ostrich or a Llama?* Written by one of the world's most published authors in the field of hospitality, this book represents a radical departure from traditional texts in the industry. Targeted at hotel management, this book is intended to serve as a platform for discussion on current issues relating to the performance of hotels and resorts. Through a combination of real life examples and an examination of current challenges facing the hotel industry, the book comprises approximately one hundred individual segments each dedicated to a single thought or concept. These stand alone articles are then combined into ten chapters, each dedicated to a specific topic. The book has been written so that hoteliers of any level, from apprentice to seasoned general manager will be able to gain value from the contents. While the bulk of articles deal with marketing aspects, many of the items relate to core operational issues. A theme common throughout is to recognize the importance of guest service as it relates to the industry. For those who are not involved in the hotel industry, but have careers that involve customer service, the practical hints provided throughout the text, serve as excellent training pointers. So, why the title? Ostriches are classically known as avoiding conflict by putting their head in the sand. While probably not true, the stigma remains, and those who are considered an ostrich, are living in

the past. Llamas, on the other hand, are considered utilitarian, hardworking and reliable. This is what you want to strive for. By reading this book, and digesting the contents, the hope is to move from ostrich to llama.

Ancient Communities in the Mimbres Valley Roger Anyon, Steven A. LeBlanc, 2024-04-09 In the Mimbres Valley of southwestern New Mexico, archaeologists have been working for decades to meticulously excavate archaeological sites. Expanding beyond studies that focus on a single pueblo, this volume represents the final report on the excavations of the Mimbres Foundation. It brings together data from a range of pithouse and pueblo sites of different sizes and histories in diverse locations—to refine the current understandings of Mimbres region archaeology in the context of the Greater Southwest. From the end of the Late Pithouse period through the Black Mountain phase, the

book provides excellent documentation of the artifacts and data recovered from the sites, addresses models of Mimbres community, and tracks change and continuity in the valley over centuries. In addition, the authors consider the nature of the relationship between the Classic Mimbres period population of the valley and the people of the succeeding Black Mountain phase, as well as relationships among the Black Mountain phase people and those of neighboring parts of the region, including the Casas Grandes world and the Jornada Mogollon area. In *Ancient Communities in the Mimbres Valley* two leading archaeologists bring together a trove of unpublished investigations, expanding understandings and setting a course for the future.

*Polymer Fracture* H. - H. Kausch, 2012-12-06 This book on Polymer Fracture might as well have been called Kinetic Theory of Polymer Fracture. The term kinetic theory, however, needs some definition or, at least, some explanation. A kinetic theory deals with and particularly considers the effect of the existence and discrete size, of the motion and of the physical properties of molecules on the macroscopic behavior of an ensemble, gaseous or other. A kinetic theory of strength does have to consider additional aspects such as elastic and anelastic deformations, chemical and physical reactions, and the sequence and distribution of different disintegration steps. In the last fifteen years considerable progress has been made in the latter domains. The deformation and rupture of molecular chains, crystals, and morphological structures have been intensively investigated. The understanding of the effect of those processes on the strength of polymeric materials has especially been furthered by the development and application of spectroscopical methods (ESR, IR) and of the tools of fracture mechanics. It is the aim of this book to relate the conventional and successful

statistical, parametrical, and continuum mechanical treatment of fracture phenomena to new results on the behavior of highly stressed molecular chains.

**Cypro-Minoan Inscriptions** Silvia Ferrara, 2012-01-19 Ferrara offers the first comprehensive examination of an ancient writing system from Cyprus and Syria known as Cypro-Minoan, and presents an analysis of all the inscriptions through a multidisciplinary perspective that embraces aspects of archaeology, epigraphy, and palaeography.

*The Palace of Nestor at Pylos in Western Messenia, Vol. 1* Carl William Blegen, Marion Rawson, 2015-12-08 Homer's King Nestor of sandy Pylas passes from legend into history in this first volume of the report of excavations on a hill called Englianos in Messenia, conducted by the Archaeological Expedition of the University of Cincinnati. The palace with its contents and the surrounding lower town indicate that this was an administrative center and the capital of a prosperous Mycenaean kingdom. The name Pylos appears on more than fifty tablets, and there can be no doubt that this was the Messenian abode of the Nestor of Greek tradition. Destroyed by fire at the end of the 13th century B.C., and never reoccupied, the palace has lain for more than 3,000 years in ruins. During the annual campaigns of the Expedition between 1952 and 1964, it emerged as a complex of four separate structures of considerable size. The floors, stumps of wall bearing plaster with painted decorations, doorways, and other evidence helped to identify gateways, courts, porticoes, vestibules, corridors, a great throne room, storerooms, a wine magazine, pantries filled with pottery, a bathroom, stairways, and a repair shop. Except for the tablets, seals, and frescoes, which will be described in other volumes, all the finds are recorded and illustrated with plans, drawings, and photographs. Originally published in 1966. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of
