Citizenship and Identity in a Multinational Commonwealth ,2008-10-31 This work is an attempt to change thinking not only on the political practice and the role of the Polish-Lithuanian Commonwealth in a European context (both East and West), but to also connect the early modern past with present notions of citizenship and participatory political systems.

**The Crimean Khanate and Poland-Lithuania** Dariusz Kolodziejczyk,2011-06-22 Drawing on rich source material in several languages and three scripts (Arabic, Cyrillic, and Latin), this book presents a broad picture of international relations in early modern Eastern Europe, at the crossing point of Genghisid, Islamic, Orthodox, and Latin traditions.

Anglo-Papal Relations in the Early Fourteenth Century Barbara Bombi,2019-07-23 This

volume is concerned with diplomacy between England and the papal curia during the first phase of the Anglo-French conflict known as the Hundred Years' War (1305-1360). On the one hand, Barbara Bombi compares how the practice of diplomacy, conducted through both official and unofficial diplomatic communications, developed in England and at the papal curia alongside the formation of bureaucratic systems. On the other hand, she questions how the Anglo-French conflict and political change during the reigns of Edward II and Edward III impacted on the growth of diplomatic services both in England and the papal curia. Through the careful examination of archival and manuscript sources preserved in English, French, and Italian archives, this book argues that the practice of diplomacy in fourteenth-century Europe nurtured the formation of a shared language of diplomacy. The latter emerged from the need to translate different traditions thanks to the adaptation of house-styles, formularies, and ceremonial practices as well as through the contribution of intermediaries and diplomatic agents acquainted with different diplomatic and legal traditions. This argument is mostly demonstrated in the second part of the book, where the author examines four relevant case studies: the papacy's move to France after the election of Pope Clement V (1305) and the succession of Edward II to the English throne (1307); Anglo-papal relations between the war of St Sardos (1324) and the deposition of Edward II in 1327; the outbreak of the Hundred Years' Wars in 1337; and lastly the conclusion of the first phase of the war, which was marked in 1360 by the agreement between England and France known as the Treaty of Brétigny-Calais.

**Visions of Ryukyu** Gregory Smits, 1999-01-01 Between 1609 and 1879, the geographical, political, and ideological status of the Kingdom of Ryukyu (modern Okinawa)

was characterized by its ambiguity. It was subordinate to its larger neighbors, China and Japan, yet an integral part of neither. A Japanese invasion force from Satsuma had conquered the kingdom in 1609, resulting in its partial incorporation into Tokugawa Japan's bakuhan state. Given Ryukyu's long-standing ties with China and East Asian foreign relations following the rise of the Qing dynasty, however, the bakufu maintained only an indirect link with Ryukyu from the mid-seventeenth century onward. Thus Ryukyu was able to exist as a quasi-independent kingdom for more than two centuries—albeit amidst a complex web of trade and diplomatic agreements involving the bakufu, Satsuma, Fujian, and Beijing. During this time, Ryukyu's ambiguous position relative to China and Japan prompted its elites to fashion their own visions of Ryukyuan identity. Created in a dialogic relationship to both a Chinese and Japanese Other, these visions informed political programs intended to remake Ryukyu. In this innovative and provocative study, Gregory Smits explores early modern perceptions of Ryukyu and their effect on its political culture and institutions. He describes the major historical circumstances that informed early modern discourses of Ryukyuan identity and examines the strategies used by leading intellectual and political figures to fashion, promote, and implement their visions of Ryukyu. Early modern visions of Ryukyu were based on Confucianism, Buddhism, and other ideologies of the time. Eventually one vision prevailed, becoming the theoretical basis of the early modern state by the middle of the eighteenth century. Employing elements of Confucianism, the scholar and government official Sai On (1682–1761) argued that the kingdom's destiny lay primarily with Ryukyuans themselves and that moral parity with Japan and China was within its grasp. Despite Satsuma's control over its diplomatic and

economic affairs, Sai envisioned Ryukyu as an ideal Confucian state with government and state rituals based on the Chinese model. In examining Sai's thought and political program, this volume sheds new light on Confucian praxis and, conversely, uncovers one variety of an East Asian "prenational" imagined political/cultural community.

*King Sigismund of Poland and Martin Luther* Natalia Nowakowska, 2018 The first major study of the early Reformation and the Polish monarchy for over a century, this volume asks why Crown and church in the reign of King Sigismund I (1506-1548) did not persecute Lutherans. It offers a new narrative of Luther's dramatic impact on this monarchy - which saw violent urban Reformations and the creation of Christendom's first Lutheran principality by 1525 - placing these events in their comparative European context. King Sigismund's realm appears to offer a major example of sixteenth-century religious toleration: the king tacitly allowed his Hanseatic ports to enact local Reformations, enjoyed excellent relations with his Lutheran vassal duke in Prussia, allied with pro-Luther princes across Europe, and declined to enforce his own heresy edicts. Polish church courts allowed dozens of suspected Lutherans to walk free. Examining these episodes in turn, this study does not treat toleration purely as the product of political calculation or pragmatism. Instead, through close analysis of language, it reconstructs the underlying cultural beliefs about religion and church (ecclesiology) held by the king, bishops, courtiers, literati, and clergy - asking what, at heart, did these elites understand 'Lutheranism' and 'catholicism' to be? It argues that the ruling elites of the Polish monarchy did not persecute Lutheranism because they did not perceive it as a dangerous Other - but as a variant form of catholic Christianity within an already variegated late medieval church, where social unity was much more important than

doctrinal differences between Christians. Building on John Bossy and borrowing from J.G.A. Pocock, it proposes a broader hypothesis on the Reformation as a shift in the languages and concept of orthodoxy.
