Combat in the Sky Dong Sy Hung,2023-10-15 Fought in the skies over North Vietnam, the air war between Vietnamese People's Air Force (VNPAF) and U.S. airpower lasted nearly eight years with hundreds of thousands of combat missions carried out and nearly four hundred dogfights. *Combat in the Sky: Airpower and the Defense of North Vietnam, 1965-1973* is the English edition of the definitive North Vietnamese work on Vietnam War airpower. In this book, Đồng Sỹ Hưng depicts the relevant events in chronological order from the first air battles such as the one at Dragon's Jaw Bridge (April 1965), to the Linebacker II Campaign—or as it was known by the North Vietnamese—the "Điện Biên Phủ in the Air Campaign" (December 1972). Dong then writes about the signing of the Paris Peace Accords (January 1973), and the VNPAF's attacks on Tân Sơn Nhất Airfield (April 1975). The air war in Vietnam was the first modern conflict in which the two opposing sides used jet combat aircraft equipped with air-to-air missiles. In addition to his analysis of the strategic calculations, especially by the North Vietnamese, and the operations carried out, the author also details the technical characteristics of the weaponry used, as well as the changes in tactics applied in each phase of the war. In doing so, Dong provides the most unique perspective of this aspect of the conflict available in the English language.

Advanced Game Design Michael Sellers,2017-10-30 In *Advanced Game Design*, pioneering game designer and instructor Michael Sellers situates game design practices in a strong theoretical framework of systems thinking, enabling designers to think more deeply and clearly about their work, so they can produce better, more engaging games for any device or platform. Sellers offers a deep unifying framework in which practical game design best practices and proven systems thinking theory reinforce each other, helping game designers understand what they are trying to accomplish and the best ways to achieve it. Drawing on 20+ years of experience designing games, launching game studios, and teaching game design, Sellers explains: What games are, and how systems thinking can help you think about them more clearly How to systematically promote engagement, interactivity, and fun What you can learn from MDA and other game design frameworks How to create gameplay and core loops How to design the entire player experience, and how to build game mechanics that work together to create that experience How to capture your game's "big idea" and Unique Selling Proposition How to establish high-level and background design and translate it into detailed design How to build, playtest, and iterate early prototypes How to build your game design career in a field that keeps changing at breakneck speed

Combat Modeling Alan Washburn,Moshe Kress,2009-08-14 *Combat Modeling* is a systematic learning resource and reference text for the quantitative analysis of combat. After a brief overview, authors Washburn and Kress present individual chapters on shooting without feedback; shooting with feedback; target defense; attrition models; game theory and wargames; search; unmanned aerial vehicles; and terror and insurgency. Three appendices provide a review of basic probability concepts, probability distributions, and Markov models; an introduction to optimization models; and a discussion of Monte-Carlo simulations. Drawing on their many years of experience at the Naval Postgraduate

School in Monterey, California, Washburn and Kress have created a reference that will provide the tools and techniques for analysts involved in the underpinnings of combat decisions. This is a book that can be used as a military manual, reference book, and textbook for military courses on this vital subject.

The U.S. Navy's "Interim" LSM(R)s in World War II Ron MacKay, Jr., 2016-04-12 The Interim LSM(R) or Landing Ship, Medium (Rocket) was a revolutionary development in rocket warfare in World War II and the U.S. Navy's first true rocket ship. An entirely new class of commissioned warship and the forerunners of today's missile-firing naval combatants, these ships began as improvised conversions

of conventional amphibious landing craft in South Carolina's Charleston Navy Yard during late 1944. They were rushed to the Pacific Theatre to support the U.S. Army and Marines with heavy rocket bombardments that devastated Japanese forces on Okinawa in 1945. Their primary mission was to deliver maximum firepower to enemy targets ashore. Yet LSM(R)s also repulsed explosive Japanese speed boats, rescued crippled warships, recovered hundreds of survivors at sea and were deployed as antisubmarine hunter-killers. Casualties were staggering: enemy gunfire blasted one, while kamikaze attacks sank three, crippled a fourth and grazed two more. This book provides a comprehensive operational history of the Navy's 12 original Interim LSM(R)s.
