The UN Guiding Principles on Business and Human Rights Radu

Mares,2011-12-09 The issue of corporate responsibilities has had a tumultuous history at the United Nations. When the Human Rights Council unanimously endorsed John Ruggie's Guiding Principles in June 2011, it was the first time that the UN stated authoritatively its expectations in the area of business and human rights. This volume captures this special moment in time: a moment of taking stock of a successfully concluded UN Special Representative mandate (2005-2011) and of preparing for the massive task of following up with more operational guidance, effective governance mechanisms and sound theoretical treatments.

Analysis of Power System Sub/Super-Synchronous Oscillations Caused by Grid-Connected Wind Power Generation Wenjuan Du,Haifeng Wang,2023-11-21 This book provides a systematic introduction to power system sub/super-synchronous oscillations caused by grid-connected wind power generation. The authors look at why oscillations occur and present methods for examining the risk of oscillations. Coverage includes state-space model based analysis and impedance model based analysis, which are the two main methods for examining the power system sub/super-synchronous oscillations. In addition, new methods for examining oscillations in wind farms are proposed. Analysis of Power System Sub/Super-Synchronous Oscillations Caused by Grid-connected Wind Power Generation provides researchers and students with a single-volume introduction to the subject and will be a valuable professional reference for practicing engineers looking for solutions to oscillation problems.

Research Challenges in Information Science: Information Science and the Connected World Selmin Nurcan,Andreas L. Opdahl,Haralambos

Mouratidis,Aggeliki Tsohou,2023-05-22 This book constitutes the proceedings of the 17th International Conference on Research Challenges in Information

Sciences, RCIS 2023, which took place in Corfu, Greece, during May 23-26, 2023. It focused on the special theme Information Science and the Connected World. The scope of RCIS is summarized by the thematic areas of information systems and their engineering; user-oriented approaches; data and information management; business process management; domain-specific information systems engineering; data science; information infrastructures, and reflective research and practice. The 28 full papers presented in this volume were carefully reviewed and selected from a total of 87 submissions. The book also includes 15 Forum papers and 6 Doctoral Consortium papers. The contributions were organized in topical sections named: Requirements; conceptual modeling and ontologies; machine learning and analytics; conceptual modeling and semantic networks; business process design and computing in the continuum; requirements and evaluation; monitoring and recommending; business process analysis and improvement; user interface and experience; forum papers; doctoral consortium papers. Two-page abstracts of the tutorials can be found in the back matter of the volume.

The Neutron Star-Black Hole Connection Chryssa Kouveliotou, J.E Ventura, E.P. van den Heuvel, Edward Peter Jacobus van den Heuvel, 2001-12-31 The foremost observers and theorists discuss the latest developments in the astrophysics of neutron stars, black holes and their interaction in the universe. Often found in compact, interacting binaries, these objects exhibit broadly similar behaviour. The determination of observational signatures that distinguish between these two types of objects is systematically explored. Supernovae and evolutionary scenarios leading to neutron stars and black holes, single or in binaries, are also discussed in detail. There is also a discussion of the decades old mystery of cosmic gamma ray bursts, currently thought to represent enormous stellar explosions at cosmological distances. These could be the result of mergers of a neutron star and its compact binary companion: a literal neutron star-black hole connection. A lucid series of lectures for the advanced graduate student. A unifying text that will appeal to the research astrophysicist and space physicist.

Grid-Connected Renewable Energy Sources Jesus C. Hernández, 2021-08-31 The use of renewable energy sources (RESs) is a need of global society. This editorial, and its associated Special Issue "Grid-Connected Renewable Energy Sources", offers a compilation of some of the recent advances in the analysis of current power systems that are composed after the high penetration of distributed generation (DG) with different RESs. The focus is on both new control configurations and on novel methodologies for the optimal placement and sizing of DG. The eleven accepted papers certainly provide a good contribution to control deployments and methodologies for the allocation and sizing of DG.

Ministries of Compassion among Russian Evangelicals, 1905-1929 Mary Raber, 2016-05-13 The present study fills a gap in the study of the evangelical movement in Russia by presenting a comprehensive picture of their compassionate ministry during their longest stretch of relative freedom before the 1980s. Better known for their energetic preaching and literature work, Russian evangelicals also gave attention to compassionate ministry, although it was never extensive because of their marginal status. They established assistance funds, organized charitable institutions, practiced urban rescue ministry, participated in the Russian temperance movement, and established economic communities. Each area is distinct, yet all were supported by the same set of theological convictions. The Russian

evangelicals were convinced that their witness should consist of good works as well as words, and that the gospel had the power to undo human suffering. While intentionally cultivating an attitude of concern for the needs of others, they taught that compassion was the concern of all members of the community, regardless of economic status or age. In their publications evangelicals devoted a good deal of teaching to the proper Christian attitude toward money and giving. They drew on Western models, but also their indigenous sectarian roots.

Application and Theory of Petri Nets 1999 Susanna Donatelli, Jetty Kleijn, 2003-07-31 This book constitutes the refereed proceedings of the 20th International Conference on Application and Theory of Petri Nets, ICATPN'99, held in Williamsburg, Virginia, USA, in June 1999. The 21 revised full papers presented were carefully selected from 45 submissions. Also included are three invited presentations. The book presents state-of-the-art research results on all current aspects of Petri nets as well as advanced applications in a variety of areas.

Channel Coding in Communication Networks Alain Glavieux, 2013-03-01 This book provides a comprehensive overview of the subject of channel coding. It starts with a description of information theory, focusing on the quantitative measurement of information and introducing two fundamental theorems on source and channel coding. The basics of channel coding in two chapters, block codes and convolutional codes, are then discussed, and for these the authors introduce weighted input and output decoding algorithms and recursive systematic convolutional codes, which are used in the rest of the book. Trellis coded modulations, which have their primary applications in high spectral efficiency transmissions, are then covered, before the discussion moves on to an advanced coding technique called turbo coding. These codes, invented in the 1990s by C. Berrou and A. Glavieux, show exceptional performance. The differences between convolutional turbo codes and block turbo codes are outlined, and for each family, the authors present the coding and decoding techniques, together with their performances. The book concludes with a chapter on the implementation of turbo codes in circuits. As such, anyone involved in the areas of channel coding and error correcting coding will find this book to be of invaluable assistance.

Security-Aware Systems Applications and Software Development Methods Khan, Khaled M., 2012-05-31 With the prevalence of cyber crime and cyber warfare, software developers must be vigilant in creating systems which are impervious to cyber attacks. Thus, security issues are an integral part of every phase of software development and an essential component of software design. Security-Aware Systems Applications and Software Development Methods facilitates the promotion and understanding of the technical as well as managerial issues related to secure software systems and their development practices. This book, targeted toward researchers, software engineers, and field experts, outlines cutting-edge industry solutions in software engineering and security research to help overcome contemporary challenges.

Electrical Technology N. P Subramaniam, 2017-08-04 ELECTRICAL TECHNOLOGY is systematically developed to meet the syllabus of undergraduate course in Electrical Engineering of various universities. The complicated concepts are explained in a lucid manner with the help of necessary diagrams and waveforms. Comprehensive coverage has been made to explain the concepts of application-level topics like Electric Traction and Power Electronics. Review questions have been added at the end of each chapter for better understanding of the subject apart from numerous numerical and design problems.

National Theatre Connections 2013 Howard Brenton, Jim Cartwright, Lucinda

Coxon, Ryan Craig, Stacey Gregg, Jonathan Harvey, Lenny Henry, Jemma Kennedy, Morna Pearson, Anya Reiss, 2013-03-28 Drawing together the work of ten leading playwrights – a mixture of established and current writers – National Theatre Connections 2013 offers young performers between the ages of thirteen and nineteen everywhere an engaging selection of plays to perform, read or study. Each play is specifically commissioned by the National Theatre's literary department and reflects the past year's programming at the venue in the plays' ideas, themes and styles. The plays are performed by approximately 200 schools and youth theatre companies across the UK and Ireland, in partnership with multiple professional regional theatres where the works are showcased. The volume features an introduction by Anthony Banks, Associate Director for the National Theatre Discover Programme, and each play includes notes from the writer and director addressing the themes and ideas behind the play, as well as production notes and exercises. Published to coincide with the 2013 Connections festival, and the 50th anniversary of the National Theatre, this year's collection features work from Howard Brenton, Jim Cartwright, Lucinda Coxon, Ryan Craig, Stacey Gregg, Jonathan Harvey, Lenny Henry, Jemma Kennedy, Morna Pearson, and Anya Reiss.
