Developing Feeds with RSS and Atom Ben

Hammersley, 2005-04-13 This step-by-step guide offers bloggers, web developers and programmers an understanding of content syndication and the technologies that make it possible. It highlights all the new features of RSS 2.0, and offers complete coverage of its rival technology, Atom.

Content Syndication with RSS Ben Hammersley, 2003

Originally developed by Netscape in 1999, RSS (which can stand for RDF Site Summary, Rich Site Summary, or Really Simple Syndication) is an XML-based format that allows web developers to describe and syndicate web site content. Using RSS files allows developers to create a data feed that supplies headlines, links,

and article summaries from a web site. Other sites can then incorporate these elements into their pages automatically ... [this text] provides a comprehensive reference to the specifications and the tools that make syndication possible--Back cover.

What Are Syndication Feeds Shelley Powers,2006-01-17 When you enter the world of syndicated content, you're often faced with the question of what is the proper way to do syndication. While syndication feeds have become a standard tool on the Web--you've seen their signposts: a little orange button labeled XML in white letters, or maybe buttons that say Atom, RSS 2.0, RSS 1.0, or even Feed--it is important that your syndication feed be an extension of your site. It should reflect your interests, your concerns, and your choices. This edoc will help you learn about these pervasive little blobs of XML markup: their purpose, the elements that make up a feed, the different formats, and the tools for generating and consuming feeds. The tutorial starts with a succinct description of what a feed really is, then it covers: What Makes Up a Feed: A look at the common container and entry elements for a feed, and what they do. Industry Support: An overview of the major players and tools for syndication feeds. Discovering Feeds: How to make your site easy to subscribe to. Subscribing To and Reading Feeds: A look at various aggregators and how to use them. Which Feeds Work Best for You: Should you use RSS 1.0, RSS 2.0, or Atom? Or all of them? Here's how to decide. This tutorial will help you get your syndication feed up and running, so you can then forget about it and focus instead on what's really important at your site: the content you are providing to the world.

China Edward Rutherfurd, 2021-05-13 THE INTERNATIONAL BESTSELLER 'Bravo; this is a big, complex and utterly involving portrait of 19th-century China' THE TIMES The internationally bestselling author portrays the great clash of East and West in his new epic: China China in the nineteenth century: a proud and ancient empire forbidden to foreigners. The West desires Chinese tea above all other things but lacks the silver to buy it. Instead, western adventurers resort to smuggling opium in exchange. The Qing Emperor will not allow his people to sink into addiction. Viceroy Lin is sent to the epicentre of the opium trade, Canton, to stop it. The Opium Wars begin - heralding a period of bloody

military defeats, reparations, and one-sided treaties which will become known as the Century of Humiliation. From Hong Kong to Beijing to the Great Wall, from the exotic wonders of the Summer Palace and the Forbidden City, to squalid village huts, the dramatic struggle rages across the Celestial Kingdom. This is the story of the Chinese people, high and low, and the Westerners who came to exploit the riches of their ancient land and culture. We meet a young village wife struggling with the rigid traditions of her people, Manchu empresses and warriors, powerful eunuchs, fanatical Taiping and Boxer Rebels, savvy Chinese pirates, artists, concubines, scoundrels and heroes, well-intentioned missionaries and the rapacious merchants, diplomats and soldiers of the West. Fortunes will rise and fall, loves will be gained and lost. This is an unforgettable tale told from both sides of the divide. The clash of worldviews, of culture and heritage, is shown in a kaleidoscope of jaw-dropping set pieces. China is a feat of the imagination that will enthrall, instruct and excite, and show us how things once were, and how the turmoil of the nineteenth century led to modern China's revolution and rebirth.

Scheduled RSS Feeds for Streaming Multimedia Sheila McKinney, Kevin Curran, 2020-02-16 Viewing video in the Internet can be troublesome. Once a link is clicked on, there inevitably follows a delay while the stream is being buffered. People often get tired of waiting and move on to something else. The introduction of broadband has alleviated this problem to some extent but there exists still a large body of Internet users who do not have access to broadband. This book outlines a solution to the problem of streaming media through the use of Rich Site Summary (RSS) technology. RSS is a web content syndication

format, commonly used to organise news and the content of news-like sites, it is however, is not restricted to news items, indeed any information that can be broken down into 'discrete items' can be syndicated via RSS, for example lists, or weblogs. Once data about each element is established in an RSS format, an RSS-aware program, such as an aggregator, can check the feed frequently for changes and updates and act accordingly. This book describes the implementation of a system which utilises idle computer time (at night or during the day) to subscribe to media RSS channels in order to download audio and video content. Thus when the user arrives in the morning, there are fresh bits, news clips, a song of the day, whatever, provided by all kinds of content providers, from big TV networks like CNN and MSNBC, to a Dutch school where kids are taking a film class using inexpensive video recorders and iMacs. Here the benefits are that when a video link is now clicked, it starts playing immediately, because it is already on the local disk thus the wait is zero. The quality is limited only by the size of the local disk and not by the capacity of the connection.
