Introduction to Information Systems R. Kelly Rainer (Jr.), Casey G. Cegielski, Ingrid Splettstoesser-Hogeterp, Cristobal Sanchez-Rodriguez, 2013-08-30 The goal of Introduction to Information Systems,

3rd Canadian Edition remains the same: to teach all business majors, especially undergraduate ones, how to use information technology to master their current or future jobs and to help ensure the success of their organization. To accomplish this goal, this text helps students to become informed users; that is, persons knowledgeable about information systems and information technology. The focus is not on merely learning the concepts of IT but rather on applying those concepts to facilitate business processes. The authors concentrate on placing information systems in the context of business, so that students will more readily grasp the concepts presented in the text. The theme of this book is What's In IT for Me? This question is asked by all students who take this course. The book will show you that IT is the backbone of any business, whether a student is majoring in Accounting, Finance, Marketing, Human Resources, or Production/Operations Management. Information for the Management Information Systems (MIS) major is also included.

Managing E-commerce in Business J. Botha, C. H. Bothma, Pieter Geldenhuys, 2008-02-27

Information and Communication Technology (ICT) is becoming indispensable in the spheres of

business, government, education and entertainment. It makes Internet marketing, e-government, e-learning and online chat services possible. And its commercial aspect, e-commerce, is part of this trend. Today, no business training is complete without the inclusion of at least the basics of e-commerce. But although e-commerce has opened up new opportunities, it also presents threats and risks. The success of e-commerce hinges on security and trust. Every business manager should therefore have a fundamental awareness of the meaning of e-commerce and ICT security and risk management. This second edition provides guidelines for overcoming these challenges by exploring the ways in which entrepreneurs and managers should co-operate with IT experts to exploit opportunities and combat the threats imposed by new technologies.
