Principles of VLSI RTL Design Sanjay Churiwala,Sapan Garg,2011-05-04 Since register transfer level (RTL) design is less about being a bright engineer, and more about knowing the downstream implications of your work, this book explains the impact of design decisions taken that may give rise later in the product lifecycle to issues related to testability, data synchronization across clock domains, synthesizability, power consumption, routability, etc., all which are a function of the way the RTL was originally written. Readers will benefit from a highly practical approach to the fundamentals of these topics, and will be given clear guidance regarding necessary safeguards to observe during RTL design.

SUPERHUBS Sandra Navidi,2017-01-24 ONE OF BLOOMBERG'S BEST BOOKS, 2016 FOREWORD BY NOURIEL ROUBINI \$UPERHUBS is a rare, behind-the-scenes look at how the world's most powerful titans, the -superhubs- pull the levers of our global financial system. Combining insider's knowledge with principles of network science, Sandra Navidi offers a startling new perspective on how superhubs build their powerful networks and how their decisions impact all our lives. \$UPERHUBS reveals what happens at the exclusive, invitation-only platforms - The World Economic Forum in Davos, the meetings of the International Monetary Fund, think-tank gatherings and exclusive galas. This is the

most vivid portrait to date of the global elite: the bank CEOs, fund managers, billionaire financiers and politicians who, through their interlocking relationships and collective influence are transforming our increasingly fragile financial system, economy and society.

High Above Chris Forrester, 2011-08-28 Frequently it is suggested that the 'golden age' of television was during the period 1950-1960. It is true that television almost ruined Hollywood's fortunes during this period. But if this was the authentic golden age, then it was an age of black and white, somewhat limited creativity, poor reception, lack of competition (except in the United States) and – by and large – public service broadcasting. However, if we take 1950 as a generic 'starting point' for modern television broadcasting, then we talk about a kind of prehistoric stage of the medium – in which it remained for the best part of three decades. The younger days of broadcasting were the 1980s; the time when commercial television started on a large scale and, in this youth, was getting younger in terms of programming. Luxembourg-based SES Astra appeared on the scene at exactly this time. Astra was instrumental in the dramatic developments in television that we have witnessed since then. This is the story we want to tell in this book. Without satellite technology and the success of satellite reception, without the resulting mass-market penetration of television sets and general economic prosperity we would not have the necessary base ingredients to make the great leap forward into digital, into HDTV, 3D-television, and the prospects of Ultra High Definition now in sight.

Everything I Need to Know, I Learned from Cartoons! Arthur Brown, 2010-12 Brown--actor, singer, comedian, and author--did not have parents. Instead, he was raised by an assortment of wise-aleck bunnies, lisping ducks, one-eyed sailors, friendly ghosts, future-men, cave-men, six-year-old robots, and mice. Throughout his childhood, these Kartoon-Karetakers generously imparted their experience, strength, and hope, such that Brown could stride boldly into adulthood and go on to lead a balanced and well-adjusted life. 132 pp.

Playing for More Case Keenum, Andrew Perloff, 2018-09-04 Case Keenum has traveled one of the most unique paths in the NFL. Recruited by just one college, undrafted, and released three times, Case has overcome every obstacle to become a successful starting quarterback. In 2017, Keenum captured America's imagination by leading the Minnesota Vikings to a 13-3 record and an NFC North title. His game-winning touchdown in the final seconds of their divisional playoff game against the Saints, the Minneapolis Miracle, made Case part of NFL history. Keenum shares stories from every stage of his life, starting out as a ball boy for his father's college team in West Texas, going on to win a state title in high school, and rewriting the NCAA record book at the University of Houston. A devastating knee injury almost derailed his football career, but helped him get closer to the woman who would soon become his wife. Throughout his story, Case will explain how being a Christian helped him navigate the winding path to success. No matter what obstacle has been placed in front of him, Case believes God has a plan for him. That's why he plays football and that's why he's writing this book: To glorify God and to help others who face

adversity in their everyday life. "Am I a football player who happens to be a Christian?" Case writes, No, I'm a Christian who happens to be a football player. That's my calling. That's my defining characteristic. Once I realized that, everything else fell into place. I became a better football player and, more importantly, a better person."

Mind Your Mindset Michael Hyatt, Megan Hyatt Miller, 2023-01-31 Do you trust the voice in your head? Our brains are remarkable. They subconsciously translate the events around us into meaningful storylines that inform what we think and how we live. The problem is, the stories our minds feed us as facts aren't always true. Worse, these stories turn into false beliefs about others, the world, and ourselves that keep us from our true potential. These limiting beliefs confront us all. But what if you could harness your brain's operating system to tell a new story? Not just any story. A true story that empowers you to overcome limitations and surpass your goals. Drawing upon the latest insights in performance psychology, neuroscience, and cognitive science, as well as case studies from their own clients, New York Times bestselling author Michael Hyatt and Megan Hyatt Miller outline a framework

anyone can follow to test their own assumptions and start living better, truer stories that shape superior outcomes in business and life.
