*Nation, Ethnicity and Race on Russian Television* Stephen Hutchings, Vera Tolz, 2015-03-05 Russia, one of the most ethno-culturally diverse countries in the world, provides a rich case study on how globalisation and associated international trends are disrupting, and causing the radical rethinking of approaches to, inter-ethnic cohesion. The book highlights the importance of television broadcasting in shaping national discourse and the place of ethno-cultural diversity within it. It argues that television's role here has been reinforced, rather than diminished, by the rise of new media technologies. Through an analysis of a wide range of news and other television programmes, the book shows how the covert meanings of discourse on a particular issue can diverge from the overt significance attributed to it, just as the impact of that discourse may not conform with the original aims of the broadcasters. The book discusses the tension between the imperative to maintain security through centralised government and overall national cohesion that Russia shares with other European states, and the need to remain sensitive to, and to accommodate, the needs and perspectives of ethnic minorities and labour migrants. It compares the increasingly isolationist popular ethnonationalism in Russia, which harks back to old-fashioned values, with the similar rise of the Tea Party in the United States and the UK Independence Party in Britain. Throughout, this extremely rich, well-argued book complicates and challenges received wisdom on Russia's recent descent into authoritarianism. It points to a regime struggling to negotiate the dilemmas it faces, given its Soviet legacy of ethnic particularism, weak civil society, large native Muslim population and overbearing, yet far from entirely effective, state control of the media.

**Bonds of Community** Nancy Grey Osterud, 2018-08-06 Women held a central place in long-settled rural communities like the Nanticoke Valley in upstate New York during the late nineteenth century. Their lives were limited by the bonds of kinship and labor, but farm women found strength in these bonds as well. Although they lacked control over land and were second-class citizens, these rural women did not occupy a separate sphere. Individually and collectively, they responded to inequality by actively enlarging the dimensions of sharing in their relationships with men. Nancy Grey Osterud uses a rich store of diaries, letters, and other first-person documents, in addition to public and organizational records, to reconstruct the everyday lives of ordinary women of the past. Exploring large questions within the confines of a single community, she analyzes the ways in which notions of gender structured women's interactions with their families and neighbors, their place in the farm family economy, and their participation in organized community activities. Rare turn-of-the-century photographs of the rural landscape, formal and informal family portraits, and scenes of daily life and labor add a special dimension to Bonds of Community. It should find a ready audience among women's historians, labor historians, rural

historians, and historians of New York State.

**The Routledge Handbook of the Gig Economy** Immanuel Ness,2022-10-31 Research on the growth of the precarious economy is of significant interest as the economy increasingly becomes dependent on gig work. However, as platform and automated service work has grown, there remains a chasm in understanding the key aspects of digital labour. This handbook presents comprehensive theoretical, empirical, and historical accounts of the political economy of informal work from the late 20th century to the present. It examines the rich and varied analysis and critique of the informalisation of work, focusing on its most significant theories, intellectual traditions, and authors. It highlights the political, social, cultural, and developmental impact of the deterioration of employment in the Global North and Global South, as well as the extreme threat posed to the planet by the growth of contingent work, poverty, and enduring and increasing inequalities produced and reproduced by the reformation of capitalism in the contemporary age of neoliberal capitalism. The period from the 1980s to the present is marked by the expanded extraction of surplus value from workers through the creation of non-standard jobs and the restructuring of work. A central component of the restructuring of work is the extension of gig employment through the development of algorithmic platforms which direct labourers to perform discrete tasks. This is a definitive collection, representing the primary reference work, contributing to our understanding of the subject. The book is written and presented in a clear manner, accessible to scholars and researchers of international political economy, labour economics, and sociology who are eager for new research examining this phenomenon, as well as specialists in the field of labour relations.
