**Advanced Marathonning** Pete Pfitzinger, Scott Douglas, 2019-07-25 If you've set your sights on shaving minutes off your time, it's time to ramp up your training with *Advanced Marathonning, Third Edition*. Find the plan that works best for you from the detailed day-by-day training schedules by choosing between 18- and 12-week preparation and selecting weekly distances of 55, 55 to 70, 70 to 85, or 85-plus miles. If you run marathons close together, you'll find 6- to 12-week training plans to maximize your training time and recovery. For older marathoners, there is a full chapter dedicated to their unique training, nutrition, and recovery needs. Complement your running workouts with strength, core, and flexibility exercises to help keep injury at bay. Learn how current technologies such as GPS and online logs can help you analyze your training and performance and set goals for future races. Draw inspiration and insights from elite marathoners such as Galen Rupp, Eliud Kipchoge, and Molly Huddle. Implement cutting-edge nutrition and hydration strategies and recovery techniques to feel and run your best. *Advanced Marathonning* gives ambitious marathoners the information needed to train smarter, remain injury-free, and cross the next finish line stronger and faster than ever.

**Training Young Distance Runners-3rd Edition** Greene, Laurence S., Pate, Russell, 2014-12-13 Essential for coaches and parents of teen runners involved in cross country, distance track events, and road racing, *Training Young Distance Runners* draws on the latest scientific research to present easily understood and applied training plans plus guidelines for designing customized programs.

**Runner's World Run Less, Run Faster, Revised Edition** Bill Pierce, Scott Murr, Ray Moss, 2012-04-10 Advises on how to run faster by running less, providing a variety of training programs tailored to qualifying times for the Boston Marathon and an overview of the 3PLUS2 program aimed at improving endurance.

**Runner's World Guide to Cross-Training** Matt Fitzgerald, Editors of Runner's World Magazine, 2004-09-23 How to cross-train to improve running times and prevent overuse injuries--whether you are participating in your first 10-K or competing to win a marathon or triathlon If you want to enjoy a long, successful life of running, it's essential to incorporate non-running activities into your training program. Strength exercises will keep your muscles in balance. Flexibility exercises will keep them supple. And alternative endurance activities will help heal existing injuries while preventing future ones. In *Runner's World Guide to Cross-Training*, Matt Fitzgerald--seasoned runner, triathlete, sports and fitness journalist, and online coach to runners and triathletes--tells you everything you need to know about the very best cross-training exercises for runners, from the equipment you'll have to buy to the techniques you'll have to master. In addition to strength training and flexibility exercises, he recommends the six best non-impact cardiovascular activities for runners: pool running, elliptical training, bicycling, inline skating, swimming, and cross-country skiing. The book shows how to integrate running and cross-training, and features five complete sample programs that will train you to compete in a basic 10-K, advanced 10-K/half marathon, basic marathon, advanced marathon, and triathlon. Until now, there hasn't been a credible cross-training book designed especially for runners. With the imprimatur of *Runner's World* magazine-recognized everywhere as the most authoritative source of information on the sport--this excellent guide will be welcomed by runners at every level as the book to consult for advice on this vital topic.

**Marathon and Half Marathon** Graeme Hilditch, 2014-10-31 The popularity of the marathon and half marathon continues unabated. Up and down the country people are signing up in their thousands, many to raise money for their favourite charity, others simply as a means of getting fit. Whatever the motive, these are testing endurance events requiring serious preparation. Now in its second edition, *Marathon and Half Marathon - A Training Guide* is essential reading for anyone intending to enter a half or full marathon. Written by a highly experienced personal trainer who has helped hundreds of runners achieve their own personal goal, this acclaimed and best-selling book has everything you need, from advice on what to wear to staying fit during those long training sessions. This fully updated and revised edition features: New 'pre-hab' and core stability exercises to help prevent injury; the latest science on how, when and why to stretch; expert advice on how to use your time to train most effectively; a series of programmes aimed at beginner, intermediate and advanced runners and finally, inspirational real-life stories from runners. A fully updated second edition of this best-selling and highly acclaimed book, aimed at novices entering a full or half marathon for the first time in aid of their favourite charity and also aimed at the more experienced runners looking to improve their times. Fully illustrated with 126 colour images and diagrams.

*The Non-Runner's Marathon Trainer* David A. Whitsett, Forrest A. Dolgener, Tanjala Jo Kole, 1998-02-01 Athlete. Runner. Marathoner. Are these words you wouldn't exactly use to describe yourself? Do you consider yourself too old or too out of shape to run a marathon? But somewhere deep inside have you always admired the people who could reach down and come up with the mental and physical strength to complete such a daunting and rewarding accomplishment? It doesn't have to be somebody else crossing the finish line. You can be a marathoner. *The Non-Runner's Marathon Trainer* is based on the highly successful marathon class offered by the University of Northern Iowa, which was featured in a *Runner's World* article titled *Marathoning 101*. The class has been offered five times over 10 years, and all but one student finished the marathon. That is approximately 200 students -- all first time marathoners and many with absolutely no running background. This book follows the same 16-week, four-day-a-week workout plan. What makes the success rate of this program so much higher than any other? The special emphasis on the psychological aspects of endurance activities. You don't have to love to run -- you don't even have to like it -- but you have to realize that you are capable of more than you have ever thought possible. One participant in the program explained it like this: I'm doing this for me -- not for others or the time clock. I just feel better when I run, plus it helps me to cope with things in general. The skills we've learned in this class don't apply just to marathoning -- they apply to life! Just like you never know what the next step in a marathon will bring, so too, you never know what will happen next in life. But if you don't keep going, you're never going to find out. By staying relaxed, centered, and positive you handle just about anything that comes your way. This is marathon running for real people, people with jobs and families and obligations outside of running. *The Non-Runner's Marathon Trainer* has proven successful for men and women of all ages. Now let it work for you.

**Training for Young Distance Runners** Laurence S. Greene, Russell R. Pate, 2004 Race your best this season with science-based training specifically geared for teenage runners. Your performance will soar when you follow the proven guidelines on designing customized daily, weekly, and seasonal programs. Running experts Larry Greene and Russ Pate combine the latest research with what works in the most successful high school and college programs throughout the country. You'll learn how to optimize performance through tempo running, interval training, technique drills, circuit and weight training, and flexibility exercises. And you'll gain a competitive advantage by applying guidelines for choosing the best foods and nutritional supplements, developing mental fitness, and preventing injuries. *Training for Young Distance Runners* has everything you need to build a winning training program for cross country, track and field, and road racing events. Get this book and get ahead of the pack!

**Run:Walk Pace Tables in Minutes/Mile** Kirk Mahoney, 2012-07-01 I love the run:walk method. Hi, I'm Kirk Mahoney, the author of *Run:Walk Pace Tables in Minutes/Kilometer*. Why did I write this book? I love the run:walk method. I trained for my first marathon with the run:walk ratio of 5:1. I now train regularly with people who use ratios of 10:1, 5:1, and 3:1. My best average pace in training has been with the 1:1 ratio. And, my marathon personal best (PB) came by racing with the 2:1 ratio. But, before I wrote this book, I saw a HUGE gap in the run:walk community. This gap has been causing a lot of unnecessary confusion and unhappiness. This book closes that gap. Is the run:walk method driving you crazy? If you are like me, here is why you love the run:walk method: You get a better workout because you use your muscles differently. You get more variety during a workout or race. You get predictable milestones in a race or training session. You get more stamina. You get fewer injuries. Last but not least, you can get faster chip-times! All of this contributes to greater happiness as an endurance athlete, and I'm all about happier running and walking! Unfortunately, there has been a gap that has driven many of us run:walk athletes crazy. Let me talk more about that in a moment... Do you prefer guessing, folklore, driving directions, or a map? Seriously, how do you figure out just the right combination of running and walking on any given day and for any given race or training distance? Let's compare it to driving from point A to point B: You could guess. Some of us have done this, at least when we were younger. Well, let's see. If I want to go to the convention center, then I guess that I'll start by driving toward downtown and keep looking for the big building along the way. You could rely on folklore. Many of us have done this. A neighbor told me that I should take highway X to somewhere around street Y and then go left until I get to street Z ... and the convention center will be around there somewhere. You could use

driving directions. A lot of us do this now. We get driving directions from a GPS unit, which can work well ... until the unit dies suddenly or there is an unexpected obstacle. Or, we go online, enter our starting point and destination, and print the directions. Still, printed directions cannot handle unexpected detours, and they give you no sense of the greater territory around, say, the convention-center destination. You could use a map. I know - What's that?! Yes, you have to learn how to read maps. You have to locate on a map where you are now and where, say, the convention center is. But, a map eliminates guessing and folklore, never dies suddenly, and gives you options -- LOTS of options -- when one route or another is blocked. Pace calculators are like driving-directions websites. Yes, you could search the Web and find some run:walk pace calculators that will let you enter some variables to get some other variables. A pace calculator is like a driving-directions website. You enter some stuff, and it tells you what to do. That's fine, as far as it goes. But, what if you were to run into an obstacle? Would you know what to do? The fact is, you could poke and prod all day with a pace calculator and still not end up with the big picture about how YOU can best use the run:walk method. In contrast, pace tables are like maps. Now, think about a map. It gives you the big picture, and this gives you LOTS of options to achieve your goal. Pace tables are like maps. They give you the big picture and lots of options to achieve your goal. This book fills the gap of pace tables for the run:walk method!

The Run-Walk-Run Method Jeff Galloway, 2014 Jeff's quest for the injury-free marathon training program led him to develop group training programs in 1978, and to author Runner's World articles which have been used by hundreds of thousands of runners of all abilities. His training schedules have inspired the second wave of marathoners who follow the Galloway RUN-WALK-RUN, low mileage, three day, suggestions to an over 98% success rate. Jeff has worked with over 200,000 average people in training for specific goals and is the inventor of the Galloway RUN-WALK-RUN method. Jeff is an inspirational speaker to over 200 running and fitness sessions each year. His innovative ideas have opened up the possibility of running and completing a marathon to almost everyone. Philosophically, Jeff believes that we were all designed to run and walk, and he keeps finding ways to bring more people into the positive world of exercise.

Strength Training for Runners Mirsad Hasic, 2013-10-17 How to Strengthen a Runner's Body and Skyrocket Performance in Just a 30 Minutes? Are you looking for an easy, quick, and efficient strategy that will strengthen your body while at the same time increase your performance levels on the running track? If your answer is yes, then keep reading. You don't need to Spend Countless Hours Each Week in Order to improve your Running Strength. There is a huge misconception amongst runners that suggests the only way to improve running strength is to spend hours and hours at the gym each week. As a runner myself, I'm reporting this from personal experience. I also believed once that the only way to improve strength on the track meant lots of hours at the local gym. I can now say with confidence that this is NOT the case. In reality, all you need is to devote 2-3 days a week on your strength training. Better still, these workouts only require around 30 to 40 minutes per session. Get a Customized Strength Workout Plan in This Book. In this book, I am giving you three types of customized strength workouts; namely beginner, intermediate and advanced. This means that you too will be able to increase your strength simply by following the suggested exercises. All the movements presented within are carefully selected by me, a runner, for runners. This means you will not waste time working on muscles that do not contribute to your running performance; a common mistake made by so many. In my ignorance, I used to be one of those athletes that squandered away the hours working on all the wrong areas. Read my book and you will not have to make the same mistakes as I did - guaranteed! My extensive research and firsthand experience has enabled me to put together this practical How-To Guide on strength training. It's a book specifically for runners looking to improve their overall performance. Anyone can evolve with the right techniques, irrespective of their current level. Do You Really Want to Increase Your Strength and Skyrocket Your Running Performance? If you're serious about improving your running performance, then my book can help. Cut to the chase and start to increase your running strength without further delay. Prepare to move up to the next level by simply scrolling to the top of this page and clicking
