International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Klasttrup, Matthew

Allen,2010-06-17 Internet research spans many disciplines. From the computer or information sciences, through engineering, and to social sciences, humanities and the arts, almost all of our disciplines have made contributions to internet research, whether in the effort to understand the effect of the internet on their area of study, or to investigate the social and political changes related to the internet, or to design and develop software and hardware for the network. The possibility and extent of contributions of internet research vary across disciplines, as do the purposes, methods, and outcomes. Even the epistemological underpinnings differ widely. The internet, then, does not have a discipline of study for itself: It is a field for research (Baym, 2005), an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other. There are, of course, some inhibitions that limit explorations in this field: research ethics, disciplinary conventions, local and national norms, customs, laws, borders, and so on. Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet. After nearly two decades of research and scholarship, the limits are a positive contribution, providing bases for discussion and interrogation of the contexts of our research, making internet research better for all. These 'limits,' challenges that constrain the theoretically limitless space for internet research, create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in

Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Media Programming Susan Tyler Eastman, Douglas A. Ferguson, 2009 This book is primarily about television and radio and it focuses on entertainment and informational programs coming to viewers as pre-produced units of content. -Pref. [This book] provides students with ... information on the techniques and strategies used in the programming industry. [This] text covers all aspects of media programming for broadcast and cable television, radio, and the Internet ... The authors explore how programs (units of content) are selected (or not selected), how programs are arranged in schedules of various kinds, how programs are evaluated by the industry, and how they are promoted to audiences and advertisers. The book also delves into the limits of media programming arising from technology, regulations, policies, and marketing needs, as well as how things like human attention spans, lifestyle patterns and economics determine the availability and arrangement of media entertainment content. -<http://www.wadsworth.com>.

Curriculum Models for the 21st Century Maree Gosper, Dirk Ifenthaler, 2013-08-28 Changing student profiles and the increasing availability of mainstream and specialized learning technologies are stretching the traditional face-to-face models of teaching and learning in higher education. Institutions, too, are facing far-reaching systemic changes which are placing strains on existing resources and physical infrastructure and calling into question traditional ways of teaching through lectures and tutorials. And, with an ever-increasing scrutiny on teaching and teachers' accountability for positive educational outcomes, the call for closer attention to learning, teaching and, most especially, to the design and delivery of the curriculum is given increasing relevance and importance. Research provides strong evidence of the potential for technologies to facilitate not only cognition and learning but also to become integral components in the redesign of current curriculum models. Some Universities and individual academics have moved along this

pathway, developing new and innovative curriculum, blending pedagogies and technologies to suit their circumstances. Yet, there are others, unsure of the possibilities, the opportunities and constraints in these changing times. Curriculum Models for the 21st Century gives insights into how teaching and learning can be done differently. The focus is on a whole of curriculum approach, looking at theoretical models and examples of practice which capitalize on the potential of technologies to deliver variations and alternatives to the more traditional lecture-based model of University teaching.

Mass Media James B. Martin, 2002 Mass media has become an integral part of the human experience. News travels around the world in a split second affecting people in other countries in untold ways. Although being on top of the news may be good, at least for news junkies, mass media also transmits values or the lack thereof, condenses complex events and thoughts to simplified sound bites and often ignores the essence of an event or story. The selective bibliography gathers the books and magazine literature over the previous ten years while providing access through author, title and subject indexes.

Kashmir and the Future of South Asia Sugata Bose,Ayesha Jalal,2020-12-30 This book uses an innovative people-centered approach to the Kashmir problem to shed new light on why postcolonial partitions remain unfinished and why the wounds of postcolonial nation-state formation in South Asia continue to fester. Kashmir is viewed as a metaphor for the permanent internal wars of partition that mark the South Asian experience. Chapters sensitively bring Kashmiri voices to the fore to examine Kashmir in the national discourses of India and Pakistan, resistance in the Kashmiri imagination and the Kashmir conflict in a global context. The book foregrounds how the space of Kashmir as a cultural, historical and political sphere persists and continues to haunt the postcolonial national present as the people of Kashmir and their cultural, literary and artistic productions cannot be contained within the regnant paradigms of the nations across which the region is partitioned. Additionally, the book explores how long-term resolution would demand engagement with historical forces, political actors and social formations that exceed the nation-state. An important contribution to the study of this troubled region, this book will be of interest to

academics and researchers of modern South Asian history and politics as well as comparative politics and international relations.
