Mapping Decline Colin Gordon,2014-09-12 Once a thriving metropolis on the banks of the Mississippi, St. Louis, Missouri, is now a ghostly landscape of vacant houses, boarded-up storefronts, and abandoned factories. The Gateway City is, by any measure, one of the most depopulated, deindustrialized, and deeply segregated examples of American urban decay. Not a typical city, as one observer noted in the late 1970s, but, like a Eugene O'Neill play, it shows a general condition in a stark and dramatic form. *Mapping Decline* examines the causes and consequences of St. Louis's urban crisis. It traces the complicity of private real estate restrictions, local planning and zoning, and federal housing policies in the white flight of people and wealth from the central city. And it traces the inadequacy—and often sheer folly—of a generation of urban renewal, in which even programs and resources aimed at eradicating blight in the city ended up encouraging flight to the suburbs. The urban crisis, as this study of St. Louis makes clear, is not just a consequence of economic and demographic change; it is also the most profound political failure of our recent history. *Mapping Decline* is the first history of a modern American city to combine extensive local archival research with the latest geographic information system (GIS) digital mapping techniques. More than 75 full-color maps—rendered from census data, archival sources, case law, and local planning and property records—illustrate, in often stark and dramatic ways, the still-unfolding political history of our neglected cities.

PICTORIAL ST. LOUIS: a Topographical Survey, Drawn from Perspective 1875 Rich. J.

Compton,2021-03 **PICTORIAL ST. LOUIS: The Great Metropolis of the Mississippi Valley A Topographical Survey, Drawn From Perspective 1875.** Illustrations by Camille N. Dry and designed & edited by Rich. J. Compton. Over 220 pages of illustrations and descriptions of life in St. Louis in the late 1800's. The preliminary drawings for this work were made early in the spring of 1874. After a careful consideration of the subject, it was determined to locate the point of view so that the city would be seen from the southeast, believing that to be the most advantageous in all respects. Accordingly, the point of site was established on the Illinois side of the river, looking to the northwest, and at sufficient altitude to overlook the roofs of ordinary houses into the streets. A careful perspective, which required a surface of three hundred square feet, was then erected from a correct survey of the city, extending northward from Arsenal Island to the Water Works, a distance of about ten miles, on the river front; and from the Insane Asylum on the southwest to the Cemeteries on the northwest. Every

foot of the vast territory within these limits has been carefully examined and topographically drawn in perspective, by Mr. C. N. Dry and his assistants, and the faithfulness and accuracy with which this work has been done an examination of the pages will attest. Absolute truth and accuracy in the representation of the territory has been the standard and in no cases have additions or alterations been made unless the same were actually in course of construction. In a few cases, important public and private edifices that are not yet finished are shown completed, and as they will appear when done. All the buildings within the limits of the survey in July, 1875, are shown; and a very large number of those executed or commenced since that date have been also introduced, the pages having been constantly corrected up to the last possible moment before publication.

Judgmental Maps Trent Gillaspie, 2016-11-08 Your City. Judged A sharp tongued and fierce witted full-color collection of maps of America's greatest cities in all their brutally honest glory. When you move to a new city you look at a map to get you where you need to be, but a Google Map of San Francisco won't tell you where you can get "Real Dim Sum" or where "The Worst Trader Joes Ever" is. Or if you're visiting Chicago, you might want to see the Magnificent Mile, but not know it's right next to where "Suburbanites Buy Drugs" and "Retired Mafioso." This is where Judgmental Maps comes in

– a no holds barred look at city life that is at once a love letter and hate mail from the very people who live there. What started as a joke between comedian Trent Gillaspie and his friends in Denver, quickly grew into a viral sensation with a rabid and enthusiastic community labeling maps of their cities with names and descriptions we all think of, but are a bit too shy to say out loud. Collected here in a full color, beautifully packaged book with all new, never before published material, Judgmental Maps is laugh out loud funny from New York to Los Angeles, Minneapolis to Atlanta and offending everyone else in between.
