Lao Tzu and the Bible Yuan Zhiming, 2010 Lao Tzu and The Bible: A Meeting Transcending Time and Space Yuan Zhiming Translated by Chen Shangyu Has God's light ever shone on the vast land of China-Land of God, 'so named by her ancient ancestors? This book vividly recaptures God's universal light shown to the Chinese sage Lao Tzu 600 years before Jesus was born. By comparing Lao Tzu's Tao Te Ching with the Bible, Yuan Zhiming offers a ground-breaking interpretation of Lao Tzu's Tao in light of the Word, or Logos. Yuan Zhiming juxtaposes Lao Tzu's Holy One with Jesus Christ, systematically and thoroughly unveiling the nature and characteristics of the mysterious Tao in a concrete and understandable manner, resolving a riddle of 2,600 years. The text speaks to our time, because so many people believe that mere secular teaching of morality, such as Confucius taught, is sufficient, and because what we really need is a deep spiritual awakening, such as Lao Tzu announced. The profound teaching in Lao Tzu and the Bible enriches the spirit of not only the Chinese people but also the people of the West. -Dr. Paul de Vries, president of New York Divinity School and author of The Taming of the Shrewd Lao Tzu and the Bible offers not only a spiritual feast to the analytical minds about Tao/Word/Logos, illustrating Tao in a tangible form, the Holy One/Jesus Christ, but also provides helpful advice about how to follow and be united with Tao. A work of great erudition and wisdom, it contains deep insight, opening up the secrets of the Tao while also illuminating the Bible. This book will surely delight the hearts and minds of seekers of Tao.

*Environmental Assessment of Ogoniland*, 2011 A major new independent scientific assessment, carried out by the United Nations Environment Programme (UNEP), shows that pollution from over 50 years of oil operations in the region has penetrated further and deeper than many may have supposed. The assessment has been unprecedented. Over a 14-month period, the UNEP team examined more than 200 locations, surveyed 122 kilometres of pipeline rights of way, reviewed more than 5,000 medical records and engaged over 23,000 people at local community meetings. The environmental restoration of Ogoniland could prove to be the world's most wide-ranging and long term oil clean-up exercise ever undertaken if contaminated drinking water, land, creeks and important ecosystems such as mangroves are to be brought back to full, productive health. The report key findings are alarming both in terms of human health protection and environmental protection: some areas, which appear unaffected at the surface, are in reality severely contaminated underground; at least 10 Ogoni communities where drinking contaminated water; control and maintenance of oilfield infrastructure in Ogoniland has been and remains inadequate; the impact of oil on mangrove vegetation has been disastrous. The report recommends direct actions in order to address the Niger Delta contamination by oil and warns that the restoration of the area could take up years.

*For the Maintenance of Landscape* Mia Lecomte, 2012 Most contemporary poets wear their cultural and artistic influences on their sleeve. Picking up a book in an English language bookstore, it is easy to see where the poet is coming from, either geographically, or culturally (ironic and formal; confessional and free etc). This may seem reductive until you read a book like the one you have in your hands. Put simply, Mia Lecomte is a quietly dazzling poet on her own terms. She is fed by multiple cultures, she is widely read, but her writing is unique and absolutely genuine. You won't have read anything like this.

**Homo Sapiens** University Press, 2020-06-17 University Press returns with another short and captivating book - a brief history of our human

species: Homo sapiens. All the humans who ever lived are extinct - except for Homo sapiens. We are, in Latin, the wise humans. We are the sole survivors of a long and deadly battle against the forces of nature and time. The first humans - hominids - diverged from the other primates and began to walk upright on two legs some 3 million years ago. The first modern humans - Homo sapiens - diverged from the other hominids some 250,000 years ago. Since then, modern humans and our big brains migrated out of Africa, developed the capacity for language, domesticated animals, became farmers, learned to write, got religious, built cities, invented money, expanded empires, harnessed the scientific method, tried enlightenment, challenged authority, created machines, conquered the air, weaponized the atom, eliminated disease, walked on the moon, did the internet, made artificial intelligence, fed seven billion people, and speculated about the future of our species. This short book provides a captivating account of the noble, savage, sacred, mundane, heroic and heart-warming events that connect us with our earliest ancestors - an account that you can read in about an hour.
