Linda Pound, Trisha Lee

Prisoned Chickens, Poisoned Eggs Karen Davis, 2009 The original *Prisoned Chickens, Poisoned Eggs* became a blueprint for people seeking a coherent picture of the poultry industry as well as a handbook for animal rights advocates seeking to develop effective strategies to expose and relieve the plight of chickens. This new edition tells where things stand in a new century in which avian influenza, food poisoning, global warming, genetic engineering, and the expansion of poultry and egg production and consumption are growing concerns in the mainstream population.

Animal Liberation Peter Singer, 2015-10-01 How should we treat non-human animals? In this immensely powerful and influential book (now with a new introduction by Sapiens author Yuval Noah Harari), the renowned moral philosopher Peter Singer addresses this simple question with trenchant, dispassionate reasoning. Accompanied by the disturbing evidence of factory farms and laboratories, his answers triggered the birth of the animal rights movement. 'An extraordinary book which has had extraordinary effects... Widely known as the bible of the animal liberation movement' *Independent on Sunday* In the decades since this landmark classic first appeared, some public attitudes to animals may have changed but our continued abuse of animals in factory farms and as tools for research shows that the underlying ideas Singer exposes as ethically indefensible are still dominating the way we treat animals. As Yuval Harari's brilliantly argued introduction makes clear, this book is as relevant now as the day it was written.

Guidelines for the management of symptomatic sexually transmitted infections World Health Organization, 2021-07-15 The WHO global health sector strategy on sexually transmitted infections, 2016–2021, endorsed by the World Health Assembly in 2016, aims to

eliminate STIs as a public health threat by 2030. In 2019, WHO published estimates of new cases of chlamydia, gonorrhoea, syphilis and trichomoniasis. Recent changes in the epidemiology of STIs and progress in prevention, diagnosis and treatment of STIs and HIV have necessitated changes in approaches to STI prevention and management. To address these STIs, the most widely used approach in clinical settings is the syndromic management of STIs. In most resource-limited settings, the syndromic management flow charts are still the standard of care where laboratory diagnosis is not available or is hard to access. The objectives of these guidelines are to provide updated, evidence-informed clinical and practical recommendations on the case management of people with symptoms of STIs; and to support countries in updating their national guidelines for the case management of people with symptoms of STIs. These guidelines include the management of symptomatic infections related to urethral discharge syndrome, including persistent urethral discharge syndrome; vaginal discharge syndrome, including persistent vaginal discharge; anorectal infection; genital ulcer disease syndrome; and lower abdominal pain syndrome. These guidelines are intended for programme managers for STI prevention and control at the national level and the health-care providers at the frontline – primary, secondary and tertiary health care.

Teaching Mathematics Creatively Linda Pound,Trisha

Lee,2021-09-30 This revised and updated third edition offers a range of strategies, activities and ideas to bring mathematics to life in the primary classroom. Taking an innovative and playful approach to maths teaching, this book promotes creativity as a key element of practice and offers ideas to help your students develop knowledge, understanding and enjoyment of the subject. In the creative classroom, mathematics becomes a tool to build confidence, develop problem solving skills and motivate children. The fresh approaches explored in this book include a range of activities such as storytelling, music and construction, elevating maths learning beyond subject knowledge itself to enable students to see mathematics in a new way. Key chapters of this book explore: • Learning maths outdoors - make more noise, make more mess or work on a larger scale • Everyday maths - making sense of the numbers, patterns, shapes and measures children see around them • Music and maths – the role of rhythm in learning, and music and pattern in maths Stimulating, accessible and underpinned by the latest research and theory, this is essential reading for trainee and practising teachers who wish to embed creative approaches to maths teaching in their classroom.

Rumours Of Glory Bruce Cockburn, 2014-11-04 Award-winning songwriter and pioneering guitarist Bruce Cockburn has been shaped by politics, protest, romance and spiritual discovery. He has toured the globe, visiting far-flung places such as Guatemala, Mali, Mozambique, Afghanistan and Nepal, performing and speaking out on important issues, from native rights and land mines to the environment and Third World debt. His journeys have been reflected in his music and evolving styles: folk, jazz, blues, rock and world beat. Drawing from his experiences, he continues to create memorable songs about his ever-expanding universe of wonders. As an artist with thirty-one albums, Cockburn has won numerous awards and the devotion of legions of fans across Canada and around the world. Yet the man himself has remained a mystery. In this memoir, Cockburn invites us into his private world and takes us on a lively cultural and musical tour through the late twentieth century, sharing his Christian convictions, his personal relationships and the social and political activism that has defined him and has both invigorated and incited his fans.

AMETHYST COUNTRY Mary Lennon,2022-06-28 Devastated by the collapse of her marriage, Helen Bradshaw flees London for Achill Island on the West Coast of Ireland hoping that her new job researching painter, Grace Henry, will offer her an escape. Achill is wild and beautiful, but island life poses many challenges, she feels isolated, lonely.

The Romance of the Lace Pillow Thomas Wright,1919

Suspended Animation Robert Mills,2006-02-01 When Marsellus in the film PulpFiction asserts, I'm gonna git medieval on your ass, we know that he is about to bring down a fierce and exacting punishment. Yet is the violence of the Middle Ages that far removed from our modern society? Suspended Animation argues that not only is the stereotype of uncontrolled violence in the Middle Ages historically misleading, the gulf between modern society and the medieval era is not as immense as we might think. In fact, both medievals and moderns live within a social tension of suspended animation engendered by images and acts of violence. Just as in medieval times, Robert Mills argues, it is the threat of violence—not the reality—that continues to structure our lives. To illustrate this aesthetics of suspense, Mills draws on extensive and disturbing examples from medieval iconography, contemporary philosophy, and even pornography, ranging from the vivid depictions of Hell in Tuscan frescoes to Billie Holiday's famously wrenching song Strange Fruit. Mills reveals how these uncomfortable images and texts expose a modern self-deception, and he further explores how medieval images evoked a pleasure revealingly close to that found in modern

depictions of sexuality. *Suspended Animation* also makes a fresh contribution to theoretical debates on pre-modern gender and sexuality. Mills's comprehensive analysis demonstrates that—as wartime prisoner abuse incidents at Abu Ghraib and Guantánamo Bay have recently indicated—our notions of ourselves as not-medieval (that is, civilized) not only fail to prepare us for modern torture and warfare but also lead us into complicity with self-proclaimed moral and civic leaders. Whether considering a medieval painting of a Christian martyr or the immense popularity of grotesque historical tourist attractions such as the London Dungeons, *Suspended Animation* argues that images of death and violence are as pervasive today as they were in the Middle Ages, serving as potent reminders of the link between the modern and the medieval era.

Carbon Capture and Storage Mai Bui, Niall Mac Dowell, 2019-11-29

This book will provide the latest global perspective on the role and value of carbon capture and storage (CCS) in delivering temperature targets and reducing the impact of global warming. As well as providing a comprehensive, up-to-date overview of the major sources of carbon dioxide emission and negative emissions technologies, the book also discusses technical, economic and political issues associated with CCS along with strategies to enable commercialisation.
