**Atherosclerosis, Hypertension and Diabetes** Grant N. Pierce, Makoto Nagano, Peter Zahradka, 2003-04-30 This volume is devoted to atherosclerosis, hypertension, and diabetes, three of the most important disease conditions in the world today. Nutritional intervention, cholesterol lowering agents, lipid themselves, particularly oxidized LDL, protein modification by ADP-ribose, bone marrow study, endothelial cell dysfunction, angiotensin, and the role of infection and inflammation are all discussed in the context of atherosclerotic cardiovascular disease. The hypertension section focuses on factors that may be responsible for high blood pressure, such as genetic predisposition, vascular hyperplasia and remodeling, insulin resistance, neurological aspects such as hypothalamic peptides. Also discussed are the possible contributions of the cellular function of the endothelium, nutrition, kidney dysfunction, leptin, and the brain. Novel routes of drug delivery for treatment of hypertension is also a focus. As for diabetes, the risk factors and mechanisms responsible for diabetic vascular and cardiac dysfunction are discussed. Lipid profile changes and fibrinolysis in diabetic patients is detailed, along with adipogenesis, diabetic cardiomyopathy, energy metabolism in the diabetic heart, vanadate as an alternative to insulin, insulin resistance mechanisms, and neurotransmitters as targets for the prevention of cardiovascular disease and diabetes. These manuscripts were invited from scientists who presented state of the art lectures at the XVII World Congress of the International Society for Heart Research held in Winnipeg in July 2001.

**The Right to Dress** Giorgio Riello, Ulinka Rublack, 2019-01-31 This is the first global history of dress regulation and its place in broader debates around how human life and societies should be visualised and materialised. Sumptuary laws were a tool on the part of states to regulate not only manufacturing systems and moral economies via the medium of expenditure and consumption of clothing but also banquets, festivities and funerals. Leading scholars on Asian, Latin American, Ottoman and European history shed new light on how and why items of dress became key aspirational goods across society, how they were lobbied for and marketed, and whether or not sumptuary laws were implemented by cities, states and empires to restrict or channel trade and consumption. Their findings reveal the significance of sumptuary laws in medieval and early modern societies as a site of contestation between individuals and states and how dress as an expression of identity developed as a modern 'human right'.

**Otaku and the Struggle for Imagination in Japan** Patrick W. Galbraith, 2019-12-06 From computer games to figurines and maid cafes, men called "otaku" develop intense fan relationships with "cute girl" characters from manga, anime, and related media and material in contemporary Japan. While much of the Japanese public considers the forms of character love associated with "otaku" to be weird and perverse, the Japanese government has endeavored to incorporate "otaku" culture into its branding of "Cool Japan." In *Otaku and the Struggle for Imagination in Japan*, Patrick W. Galbraith explores the conflicting meanings of "otaku" culture and its significance to Japanese popular culture, masculinity, and the nation. Tracing the history of "otaku" and "cute girl" characters from their origins in the 1970s to his recent fieldwork in Akihabara, Tokyo ("the Holy Land of Otaku"), Galbraith contends that the discourse surrounding "otaku" reveals tensions around contested notions of gender, sexuality, and ways of imagining the nation that extend far beyond Japan. At the same time, in their relationships with characters and one another, "otaku" are imagining and creating alternative social worlds.

**Field-Assisted Sintering** Eugene A. Olevsky, Dina V. Dudina, 2018-08-09 This book represents the first ever scientific monograph including an in-depth analysis of all major field-assisted sintering techniques. Until now, the electromagnetic field-assisted technologies of materials processing were lacking a systematic and generalized description in one fundamental publication; this work promotes the development of generalized concepts and of comparative analyses in this emerging area of materials fabrication. This book describes modern technologies for the powder processing-based fabrication of advanced materials. New approaches for the development of well-tailored and stable structures are thoroughly discussed. Since the potential of traditional thermo-mechanical methods of material treatment is limited due to inadequate control during processing, the book addresses ways to more accurately control the resultant material's structure and properties by an assisting application of electromagnetic fields. The book describes resistance sintering, high-voltage consolidation, sintering by low-voltage electric pulses (including spark plasma sintering), flash sintering, microwave sintering, induction heating sintering, magnetic pulse compaction and other field-assisted sintering techniques. Includes an in-depth analysis of all major field-assisted sintering techniques; Explains new techniques and approaches for material treatment; Provides detailed descriptions of spark plasma sintering, microwave sintering, high-voltage consolidation, magnetic pulse compaction, and various other approaches when field-assisted treatment is applied.

**Advanced Organic Solid State Materials: Volume 173** Long Y. Chiang, Paul M. Chaikin, Dwaine O. Cowan, 1990-04-11 The MRS Symposium Proceeding series is an internationally recognised reference suitable for researchers and practitioners.

**The Little Book of Tom. Military Men** Dian Hanson, 2023-01-10 Stand at attention with this pocket-sized army of free, proud, masculine fantasy men committed to pleasure and male camaraderie. With multi-panel comics and single-panel drawings and paintings, as well as personal photographs and sketches, *The Little Book of Tom: Military Men* celebrates the artist's most iconic vision of masculine perfection.

**Bubbly Flows** Martin Sommerfeld, 2012-12-06 The book summarises the outcome of a priority research programme: 'Analysis, Modelling and Computation of Multiphase Flows'. The results of 24 individual research projects are presented. The main objective of the research programme was to provide a better understanding of the physical basis for multiphase gas-liquid flows as they are found in numerous chemical and biochemical reactors. The research comprises steady and unsteady multiphase flows in three frequently found reactor configurations, namely bubble columns without internals, airlift loop reactors, and aerated stirred vessels. For this purpose new and improved measurement techniques were developed. From the resulting knowledge and data, new and refined models for describing the underlying physical processes were developed, which were used for the establishment and improvement of analytic as well as numerical methods for predicting multiphase reactors. Thereby, the development, lay-out and scale-up of such processes should be possible on a more reliable basis.

**Real Life Magazine** Miriam Katzeff, Thomas Lawson, Susan Morgan, 2006 Introduction by Thomas Lawson, Susan Morgan.

**Anne Collier: Women with Cameras (Self Portrait)**, 2018-08-28 This book collects images that New York-based artist Anne Collier (born 1970) originally presented as a slideshow of 80 35mm slides depicting found images of female subjects in the act of taking self-portraits. Dating from the 1970s to the early 2000s, these relics of the

pre-digital age were collected by Collier, each image discarded by its original owner but finding its way back to relevance in Collier's work. The slideshow consists of amateur snapshots of women photographing themselves with film cameras prior to the advent of the digital selfie. Instead of circulating on social media, these abandoned images once existed for a private audience. The resulting work is steeped in a deep sense of loneliness, illustrating photography's contentious relationship to memory, loss and self-representation. The book represents a kind of sequel to Collier's 2017 book *Women with Cameras* (Anonymous).

*The Original Bondage Fairies* Kondom, 2006-07-12 The story continues...The Bondage Fairies are called Hunters. They have to be at least 100 years old to become a Hunter and are caretakers of the forest. It is their duty to protect and nurture all the little critters in the woods be it mammal, fowl, reptilian, or insectoid. Meet Pamila and Pfil. These two horny little Bondage Fairies have no restraint and along with their care for all-things-natural usually wind up having crazy wild sex with all the creatures of the woods including themselves. In this volume...3 evil fairies have given imprisoned Pfil a powerful aphrodisiac to sexually torture our favorite fairie girl. It is here that Pfil finds a new friend in a male fairie that helps Pfil get through her insanely lustful ordeal. Meanwhile Pamila is off in another part of the forest making it with a bat. If she only knew how much Pfil needed her help right now. Creator Kondom brings us into his fetishistic world of love, lusty graphic sex, and two darn cute little fairies.

Mathematical Demography David P. Smith, Nathan Keyfitz, 2013-07-23 Mathematical demography is the centerpiece of quantitative social science. The founding works of this field from Roman times to the late Twentieth Century are collected here, in a new edition of a classic work by David R. Smith and Nathan Keyfitz. Commentaries by Smith and Keyfitz have been brought up to date and extended by Kenneth Wachter and Hervé Le Bras, giving a synoptic picture of the leading achievements in formal population studies. Like the original collection, this new edition constitutes an indispensable source for students and scientists alike, and illustrates the deep roots and continuing vitality of mathematical demography.

Demography of Aging National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1994-02-01 As the United States and the rest of the world face the unprecedented challenge of aging populations, this volume draws together for the first time state-of-the-art work from the emerging field of the demography of aging. The nine chapters, written by experts from a variety of disciplines, highlight data sources and research approaches, results, and proposed strategies on a topic with major policy implications for labor forces, economic well-being, health care, and the need for social and family supports.

Ozone Edward Lynch, 2004 Recent technical advances have made it possible to use ozone to small areas of dental hard tissues in the treatment of dental caries. This volume provides an overview of the technique, covering, among other topics, the history of ozone clinical applications, mechanisms of action, safety aspects, required equipment, evidence-based research on the treatment.

**Cardiovascular Biomarkers** David A. Morrow, 2010-04-28 In the four pages committed to a discussion of myocardial infarction in the first edition of Harrison's Principles of Internal Medicine, published in 1950, there was no mention of use of the laboratory for management of patients. Thirty years later, when the first edition of Braunwald's Heart Disease, A Textbook of Cardiovascular Medicine was published, 2 out of the 1943 pages in the text contained a discussion of the laboratory examinations in acute myocardial infarction. Our knowledge base of the multitude of ways that physicians can and should use the clinical chemistry laboratory has expanded dramatically since these classic texts were published. The nomenclature has changed: terms such as "cardiac enzymes" have given way to "cardiac biomarkers." The number of assays has multiplied, and the operating characteristics of available assays are improving at a gratifying but dizzying rate. We now use biomarkers to diagnose cardiovascular diseases and also to frame our treatment strategies. Thus, there is a clear need for a scholarly compilation of the state of the art of cardiac biomarkers. Dr. David Morrow has expertly edited an authoritative book that answers this need. The 34 chapters in Cardiovascular Biomarkers: Pathophysiology and Disease Management were written by a group of individuals who are internationally recognized thought leaders and experts in clinical and laboratory medicine.

*Magnesium in Human Health and Disease* Ronald Ross Watson, Victor R. Preedy, Sherma Zibadi, 2012-09-14 Magnesium is an essential mineral which is required for growth and survival of humans. Since magnesium is a mineral and not synthesizable it must be obtained through dietary foods and/or supplements. Magnesium in Human Health and Disease reviews the benefits of magnesium supplementation to reach recommended intakes as well as provides new research that suggests how reaching levels above the recommended intakes can promote health and treat various diseases. Magnesium deficiency can cause low serum potassium and calcium levels, retention of sodium, and low circulating levels of regulatory hormones. These changes in nutrients cause neurological and muscular symptoms such as tremor and muscle spasms. Further magnesium deficiency causes loss of appetite, nausea, vomiting, personality changes and death from heart failure. Causes of magnesium deficiency include alcohol abuse, poorly controlled diabetes, excessive or chronic vomiting and/or diarrhea. Thus the effects of inadequate and deficient intakes or levels of magnesium is critical to health and are reviewed by the expert clinicians in this book. Magnesium in Human Health and Disease provides the most current research to support the potential benefits or lack thereof for normal and high supplementation with magnesium. Animal model research and early human trials are reviewed to document other disease states such as hypertension, cholesterol level, type 2 diabetes and cardiovascular disease that would benefit from increased magnesium.

**The Amphibians Came to Conquer: The Story of Richmond Kelly Turner** Vice Admiral George C. Dyer, 2015-11-06 Includes over 110 maps, charts and illustrations. His nickname was "Terrible Turner." He was, according to one ensign who served with him prior to World War II, "the meanest man I ever saw, and the most competent naval officer I ever served with." He led the successful amphibious attacks on Guadalcanal, Makin, Kwajalein, Roi-Namur, Saipan, Tinian, and Guam. He was Admiral Richmond Kelly Turner, one of the key figures in America's defeat of Japan. In this fascinating and comprehensive biography, Vice Admiral George C. Dyer documents the tough and fearless leadership of Admiral Turner, his astonishing success in meeting some of the toughest challenges in the history of amphibious warfare, and detailed descriptions of the ships and men who fought under him. More than just

a biography, The Amphibians Came to Conquer is a carefully documented history, both strategic and tactical, of the major campaigns in the Pacific from Guadalcanal to Okinawa, providing a wealth of information on how Terrible Turner and the men he commanded conquered island after island against a tough and determined foe. In an astonishing tribute to the tenacity of Turner and his men, a February 21, 1945 Japanese broadcast said: “The true nature of an alligator is that once he bites into something, he will not let go. Turner’s nature is also like this.” This remarkable book belongs in the library of any serious student of the war in the Pacific.
