Mobile Health (mHealth) Kota Kodama,Shintaro Sengoku,2022-10-18 This book examines the current status of mHealth development, regulations and the social background in Japan, South Korea and China, comparing it to the situation in the United States and the European Union and consider solutions to issues surrounding mHealth. The recent progress in mobile technology, represented by smartphones and smart watches, has been remarkable. A service called mobile health (mHealth), which uses such mobile technology to manage health, is also becoming a reality. Although the accuracy of medical devices is not as accurate as those used in medicine, the biometric information such as heart rate and SpO2 can already be monitored over a long period of time. Although the technology is maturing to the point where it can be implemented in society, it remains an unapproved service of medical care in most countries. The development and social implementation of mHealth is most active in the US, but social implementation is gradually progressing in other countries as well. In this book, we will first discuss what kind of global and harmonized regulations are desirable by comparing the regulatory reforms necessary for social implementation of mHealth. In addition, mHealth raises privacy concerns in the US because the usual behavior and biometric information of subjects is utilized by private companies. In addition, it is important to note that the behavior and biometric information of subjects collected by smart devices is automatically analyzed by AI technology, mainly machine learning, which makes the analysis a black box.

Human-Computer Interaction and Beyond: Advances Towards Smart and Interconnected Environments (Part II) Nirmalya Thakur,B.D. Parameshachari,2022-01-05 Human-Computer Interaction and Beyond: Advances Towards Smart and Interconnected Environments is a 2-part book set which presents discoveries, innovative ideas, concepts, practical solutions, and novel applications of Human-Computer Interaction (HCI) and related disciplines such as artificial intelligence, machine learning, data mining, computer vision, and natural language processing. The book provides readers with information about HCI trends which are shaping the future of smart, interconnected urban and industrial environments. This is the second of the two volumes of the edited books. The chapters of this volume cover topics like ERP usability in educational settings, the role of AI in enhancing HCI functionality, usability of local mobile healthcare apps, analyzing the usage of social media apps and a review of HCI systems for disaster management and systems for tracking traffic safety violations. Contributions are authored by experts and scientists in the field of HCI and its interrelated disciplines from 9 different countries – Albania, China, India, Indonesia, Nigeria, Pakistan, Spain, the United Kingdom, and the United States. Human-Computer Interaction and Beyond: Advances Towards Smart and Interconnected Environments is an informative reference for scientists, researchers, and developers in both academia and industry who wish to learn, design, implement, and apply these emerging technologies in HCI in different sectors, with the goal of realizing futuristic technology-driven living and functional smart cities and environments.

Labour in Global Value Chains in Asia Dev Nathan,Meenu Tewari,Sandip Sarkar,2016-10-13 This book brings together a set of studies on labour conditions in global value chains (GVCs) in a variety of sectors, ranging from labour-intensive sectors (garments, fresh fruits, tourism), to medium and high technology sectors (automobiles, electronics and telecom) and knowledge-intensive sectors (IT software services). The studies span a number of countries across Asia - Bangladesh, Cambodia, China, India, Indonesia, Sri Lanka and Vietnam. This book stands out for its grounded and detailed examination of both what is working and what is not working as Asian labour gets more embedded in global value chains. In trying to identify spaces for progressive action and policies in the current GVC-linked global work environment, the book goes against the grain in searching for an alternative to laissez faire forms of globalisation.

Galaxy Ring David Wilson,2024-02-28 With its elegant design and seamless integration of cutting-edge health tracking features with Samsung's array of products and services, the Samsung Galaxy Ring stands out as a trailblazing invention in the field of wearable health technology. The Galaxy Ring gives customers the tools to take charge of their health and wellness journey with features including heart rate monitoring, breathing rate tracking, sleep analysis, and detection of sleep apnea indicators. Features like the Vitality Score and Well-being Goals offer individualised insights and suggestions for enhancing general well-being, and its compatibility with Galaxy smartphones, the Samsung Health app, and its synergy with the Galaxy Watch series enhances 24/7 health and activity tracking. The Samsung Galaxy Ring is a potential advancement in wearable health technology that is expected to revolutionise how we monitor and manage our health in the modern era, as excitement for its official release grows.

Fourth Revolution and the Bottom Four Billion Nir Kshetri,2023-04-18 Products and services based on advanced technologies such as artificial intelligence and blockchain are normally considered to be for rich consumers in advanced countries. Fourth Revolution and the Bottom Four Billion demonstrates how marginalized and vulnerable groups with limited resources can also benefit from these technologies. Nir Kshetri suggests that the falling costs and the increased ease of developing and deploying applications based on these technologies are making them more accessible. He illustrates how key emerging technologies are transforming major industries and application areas such as healthcare and pandemic preparedness, agriculture, finance, banking, and insurance. The book also looks at how these transformations are affecting the lives of low-income people in low- and middle-income countries and highlights the areas needing regulatory attention to adequately protect marginalized and vulnerable groups from the abuse and misuse of these technologies. Kshetri discusses how various barriers such as the lack of data, low resource languages, underdeveloped technology infrastructures, lack of computing power and shortage of skill and talent have hindered the adoption of these technologies among marginalized and vulnerable groups. Fourth Revolution and the Bottom Four Billion suggests that it is the responsibility of diverse stakeholders—governments, NGOs, international development organizations, academic institutions, the private sector, and others—to ensure that marginal groups also benefit from these transformative innovations.

Advances in Computer Science and Ubiquitous Computing Ji Su Park,Laurence T. Yang,Yi Pan,Jong Hyuk Park,2023-07-04 This book presents the combined proceedings of the 14th International Conference on Computer Science and its Applications (CSA 2022) and the 16th KIPS International Conference on Ubiquitous Information Technologies and Applications (CUTE 2022), both held in Vientiane, Laos, December 19-21, 2022. The aim of these two meetings

was to promote discussion and interaction among academics, researchers and professionals in the field of ubiquitous computing technologies & Computer Science and its Applications. These proceedings reflect the state of the art in the development of computational methods, involving theory, algorithms, numerical simulation, error and uncertainty analysis and novel applications of new processing techniques in engineering, science and other disciplines related to ubiquitous computing.

Interesting applications will be shown in many sectors. Work design and productivity, robotics and intelligent systems are among this year's human-machine modeling and results reporting efforts.

Research Handbook on Digital Transformations F. Xavier Olleros, Majlinda Zhegu, 2016-09-30 The digital transition of our economies is now entering a phase of broad and deep societal impact. While there is one overall transition, there are many different sectoral transformations, from health and legal services to tax reports and taxi rides, as well as a rising number of transversal trends and policy issues, from widespread precarious employment and privacy concerns to market monopoly and cybercrime. They all are fertile ground for researchers, as established laws and regulations, organizational structures, business models, value networks and workflow routines are contested and displaced by newer alternatives. This Research Handbook offers a rich and interdisciplinary synthesis of some of the current thinking on the digital transformations underway.

Developing China: The Remarkable Impact of Foreign Direct Investment Michael J. Enright,2016-09-12 One of the most important features of China’s economic emergence has been the role of foreign investment and foreign companies. The importance goes well beyond the USD 1.6 trillion in foreign direct investment that China has received since it started opening its economy. Using the tools of economic impact analysis, the author estimates that around one-third of China’s GDP in recent years has been generated by the investments, operations, and supply chains of foreign invested companies. In addition, foreign companies have developed industries, created suppliers and distributors, introduced modern technologies, improved business practices, modernized management training, improved sustainability performance, and helped shape China’s legal and regulatory systems. These impacts have helped China become the world’s second largest economy, its leading exporter, and one of its leading destinations for inward investment. The book provides a powerful analysis of China’s policies toward foreign investment that can inform policy makers around the world, while giving foreign companies tools to demonstrate their contributions to host countries and showing the tremendous power of foreign investment to help transform economies.
