**The Procrastination Economy** Ethan Tussey, 2020-04-01 2018 Outstanding Academic Title, given by Choice Magazine How mobile devices make our in-between moments valuable to media companies while also providing a sense of control and connection In moments of downtime – waiting for a friend to arrive or commuting to work – we pull out our phones for a few minutes of distraction. Just as television reoriented the way we think about living rooms, mobile devices have taken over the interstitial spaces of our everyday lives. Ethan Tussey argues that these in-between moments have created a procrastination economy, an opportunity for entertainment companies to create products, apps, platforms, subscription services, micropayments, and interactive opportunities that can colonize our everyday lives. But as businesses commoditize our free time, and mobile devices become essential tools for promotion, branding and distribution, consumers are using these devices as a means of navigating public and private space. These devices are not just changing the way we spend and value our time, but also how we interact with others and transform our sense of the politics of space. By examining the four main locations of the procrastination economy—the workplace, the commute, the waiting room, and the “connected” living room—Ethan Tussey illuminates the relationship between the entertainment industry and the digitally empowered public.

**Navigating the New Normal** Rodd Mann, 2021-03-08 This book is primarily focused on the post-

pandemic Gen Z and Millennial business opportunities, most of which didn't even exist a generation ago. No one will forget the year 2020. The year that a pandemic shut down social, work, and public contact. There are two particular changes that have had a pronounced effect on business and finance, which this book will provide the guidance currently lacking in traditional business school texts. The first is the change from commuting to work to sheltering-in-place, with students and professionals on videoconferencing apps such as Zoom. Likely a lasting change, we can expect many office spaces will remain empty and many businesses will stick with the new work-from-home change. The second change is that the younger generation is the first to suffer a setback in terms of the standard of living compared to their parents. Not only do more than half of Americans have less than \$1,000 in savings, but they eschew traditional corporate cubicles, preferring instead to juggle multiple and new 'hustles and side gigs.' This book is primarily focused on the post-pandemic Gen Z and Millennial business opportunities, most of which didn't even exist a generation ago.

Es reflektiert dabei aktuelle gesellschaftliche Entwicklungen und verleiht diese ein. Das Fernsehen mit seiner populären Anziehungskraft ist dabei sowohl nationales als auch transnationales Phänomen.
