Gandhi Meets Primetime Shanti Kumar,2010-10-01 Shanti Kumar's Gandhi Meets Primetime examines how cultural imaginations of national identity have been transformed by the rapid growth of satellite and cable television in postcolonial India. To evaluate the growing influence of foreign and domestic satellite and cable channels since 1991, the book considers a wide range of materials including contemporary television programming, historical archives, legal documents, policy statements, academic writings and journalistic accounts. Kumar argues that India's hybrid national identity is manifested in the discourses found in this variety of empirical sources. He deconstructs representations of Mahatma Gandhi as the Father of the Nation on the state-sponsored network Doordarshan and those found on Rupert Murdoch's STAR TV network. The book closely analyzes print advertisements to trace the changing status of the television set as a cultural commodity in postcolonial India and examines publicity brochures, promotional materials and programming schedules of Indian-language networks to outline the role of vernacular media in the discourse of electronic capitalism. The empirical evidence is illuminated by theoretical analyses that combine diverse approaches such as cultural studies, poststructuralism and postcolonial criticism.

Research Handbook on the Law of Artificial Intelligence Woodrow Barfield,Ugo Pagallo,2018-12-28 The field of artificial intelligence (AI) has made tremendous advances in the last two decades, but as smart as AI is now, it is getting smarter and becoming more autonomous. This raises a host of challenges to current legal doctrine, including whether AI/algorithms should count as ‘speech’, whether AI should be regulated under antitrust and criminal law statutes, and whether AI should be considered as an agent under agency law or be held responsible for injuries under tort law. This book contains chapters from US and international law scholars on the role of law in an age of increasingly smart AI, addressing these and other issues that are critical to the evolution of the field.

Privacy is Power Carissa Veliz, 2021-04-06 An Economist Book of the Year Every minute of every day, our data is harvested and exploited... It is time to pull the plug on the surveillance economy. Governments and hundreds of corporations are spying on you, and everyone you know. They're not just selling your data. They're selling the power to influence you and decide for you. Even when you've explicitly asked them not to. Reclaiming privacy is the only way we can regain control of our lives and our societies. These governments and corporations have too much power, and their power stems from us—from our data. Privacy is as collective as it is personal, and it's time to take back control. Privacy Is Power tells you how to do exactly that. It calls for the end of the data economy and proposes concrete measures to bring that end about, offering practical solutions, both for policymakers and ordinary citizens.

Summary of Carissa Véliz's Privacy Is Power Milkyway Media, 2021-12-13 Buy now to get the main key ideas from Carissa Véliz's Privacy Is Power For years now, digital technologies have been exploiting our online data to control our decisions and thoughts, but enough harm has been done. To regain power, we must first protect our privacy. Carissa Véliz's Privacy Is Power (2020) is a wake-up call about the dangers of the digital age in which we live. Véliz highlights security breaches and privacy violations committed by tech giants, corporations, intelligence agencies, and governments, shedding light on the surveillance society and surveillance economy. Though she warns that the trade in private data is a ticking bomb that is likely to cause a global leak disaster sooner or later, she also sets out solutions to protect our user privacy and reclaim our personal data.
