The Future of Decentralized Electricity Distribution Networks
Fereidoon Sioshansi,2023-05-23 The Future of Decentralized Electricity Distribution Networks assesses the evolution of the services delivered by the distribution network as demands placed on it proliferates from distributed, self-generating, power storing and power sharing ‘consumers’ – which Sioshansi terms ‘prosumagers’. The work outlines the processes by which passive and homogeneous electricity consumers become prosumers and prosumagers, the nature of their service needs, and dependence on the services delivered by the distribution network diverges. Contributors assess how consumers are discovering and exercising options to migrate away from total reliance on upstream generators to produce electricity and on the delivery network for its transmission. As they do so, the utilities – be they distributors or retailers – must rethink the traditional utility business model. How

will they find sufficient revenues to cover their fixed and variable costs as volumetric consumption declines when some consumers become prosumers – or go a step further and become prosumagers? This work argues that new service, business models and new methods for collecting sufficient revenues to maintain the network are mandatory for the survival of modern utilities.

Examines the future of services demanded by electricity customers as some diverge from their traditional total reliance on the network for delivery of all their service needs Reviews the emergence of new business models to meet the diverging needs of customers Explores the costs imposed by new types of customers on the delivery network and how to collect sufficient revenues from all to maintain it in ways that are efficient, equitable and fair

Silicon Alleys Gary Singh,2020-11-16 In 2005, the editors of Metro Silicon Valley, San Jose's alternative weekly newspaper, gave Gary Singh his own column, Silicon Alleys, to explore the underbelly of San Jose from a perspective only a creative native could offer. To this day, he still writes the column every week. Now a selection of Gary's greatest hits, over 250 columns in

chronological order, is available in one mammoth volume, hand-picked by the columnist. Following a gnarly foreword by cyberpunk science fiction pioneer Rudy Rucker, a glorious mishmash of humanity emerges. UFO researchers sit right alongside rock stars, repo men and professional wrestlers. Buddhist scholars hold column space with women's drinking clubs. Abandoned strip malls return to life. From punk rock to high art, from dive bars to luxury digs, from literary vibes to forgotten history, no other body of work more aptly sorts out the guts of America's 10th largest city than Gary's weekly column.

Hazardous Waste Contamination of Water Resources

Chinese in San Jose and the Santa Clara Valley Lillian Gong-Guy, Gerry Wong, 2007 The fertile Santa Clara Valley--once called the Valley of Heart's Delight and later Silicon Valley--has long been home to a substantial Chinese population. Like other immigrants, they arrived seeking opportunity and armed with survival instincts and the ability to persevere, but the struggles they faced were

unique. From 1866 to 1931, five distinct Chinatowns existed in San Jose, each one devastated by mysterious fires or stifled by unjust laws. Early Chinese in the region labored relentlessly, building railroads and levees and toiling as laundrymen, grocers, cooks, servants, field hands, and factory workers. In the 20th century, new industries replaced agriculture, and an influx of Chinese invigorated the valley with innovative ideas, helping it emerge as a leader in technology.

Energy Democracy Denise Fairchild, Al Weinrub, 2017-10-12
The near-unanimous consensus among climate scientists is that the massive burning of gas, oil, and coal is having cataclysmic impacts on our atmosphere and climate. These climate and environmental impacts are particularly magnified and debilitating for low-income communities and communities of color. Energy democracy tenders a response and joins the environmental and climate movement with broader movements for social and economic change in this country and around the world. Energy Democracy brings together racial, cultural, and generational

perspectives to show what an alternative, democratized energy future can look like. The book will inspire others to take up the struggle to build the energy democracy movement.

Increasing Access to Clean Cooking in the Philippines Asian Development Bank, 2021-02-01 In Asia and the Pacific, 1.8 billion people still rely on traditional cooking methods using fires and solid fuels. The wider uptake of cleaner cooking solutions is vital for achieving the Sustainable Development Goal 7 objective of universal access to modern, affordable, reliable, and sustainable modern energy. It is also important for the environment and human health. This publication presents the results of a study on household cooking practices in the Philippines and provides insights and recommendations to encourage clean cooking in the country. The findings identify policy, information, technology, and financing gaps that must be addressed to boost the development and market expansion of clean cooking technologies.
