Banking in the Age of the Platform Economy Giorgio Bou-Daher, 2023-05-22 The 2008 global financial crisis and the concurrent rise of the platform economy have had profound effects on the banking sector. Over the past decade and a half, banking leaders have had to contend with rapidly evolving regulatory, technological, and competitive forces. The pace of technological change has been formidable with advances in artificial intelligence, cloud computing, and blockchain technology. These forces have brought to the forefront new managerial imperatives that banking leaders have to make sense of as they strategise in light of these unfolding new realities. Banking in the Age of the Platform Economy explores the strategies that managers and leaders at banks and other financial institutions have adopted in response to the rise of the platform economy, the new forces of interdependence that it entails, and the risks/opportunities involved in cocreating value with external stakeholders. With its discussion of the strategies of interdependence and value cocreation that the top twenty banks in Europe adopted between 2008 and 2019, this book is essential reading for academics, banking and fintech professionals, and management consultants that advise banks and fintechs.

Mobile Multimedia Communications Jonathan Rodriguez, Rahim Tafazolli, Christos Verikoukis, 2012-10-29 This book constitutes the thoroughly refereed post-conference proceedings of the 6th International ICST Conference on Mobile Multimedia Communications (MOBIMEDIA 2010) held in Lisbon, Portugal, in September 2010, which was accompanied by the First International Workshop on Cognitive Radio and Cooperative Strategies for POWER Saving (C2POWER 2010), the Workshop on Impact of Scalable Video Coding on Multimedia Provisioning (SVCVision 2010), and the First International Workshop on Energy-efficient and Reconfigurable Transceivers (EERT 2010). Building the Hyperconnected Society- Internet of Things Research and Innovation Value Chains, Ecosystems and Markets Ovidiu Vermesan, Peter Friess, 2022-09-01 This book aims to provide a broad overview of various topics of Internet of Things (IoT), ranging from research, innovation and development priorities to enabling technologies, nanoelectronics, cyber-physical systems, architecture, interoperability and industrial applications. All this is happening in a global context, building towards intelligent, interconnected decision making as an essential driver

for new growth and co-competition across a wider set of markets. It is intended to be a standalone book in a series that covers the Internet of Things activities of the IERC – Internet of Things European Research Cluster from research to technological innovation, validation and deployment. The book builds on the ideas put forward by the European Research Cluster on the Internet of Things Strategic Research and Innovation Agenda, and presents global views and state of the art results on the challenges facing the research, innovation, development and deployment of IoT in future years. The concept of IoT could disrupt consumer and industrial product markets generating new revenues and serving as a growth driver for semiconductor, networking equipment, and service provider end-markets globally. This will create new application and product end-markets, change the value chain of companies that creates the IoT technology and deploy it in various end sectors, while impacting the business models of semiconductor, software, device, communication and service provider stakeholders. The proliferation of intelligent devices at the edge of the network with the introduction of embedded software and app-driven hardware into manufactured devices, and the ability, through embedded software/hardware developments, to monetize those device functions and features by offering novel solutions, could generate completely new types of revenue streams. Intelligent and IoT devices leverage software, software licensing, entitlement management, and Internet connectivity in ways that address many of the societal challenges that we will face in the next decade.

The Business of Europe is Politics Prof Dr Dimitris N Chorafas, 2012-09-01 It is no secret that Europe is currently undergoing a major economic and social crisis, so it is essential says Dimitris Chorafas that leaders of industry and finance within the EU, or doing business with the EU, know what is going on. What is it that threatens competitiveness and produces obstacles to providing a vibrant business landscape in the European Union? This book offers insight into the particular nature of the European cocktail of business and politics, explaining how that bears on trade and relations between, for example, continental Europe and the UK, across the Atlantic with the US, with Russia and with Asia. Dr Chorafas explains and critiques Europe's conflicting aims and what he describes as its wanting business plan. Case studies to illustrate the consequences for business of the deficiencies identified are included. With its mix of rigorously researched background and forthright argument, this timely book will satisfy those academics with an interest in the issues addressed and will also serve as a planning tool for business leaders and government executives trying to determine what they can do at enterprise level. The challenge is to survive and prosper in an environment where 'business is politics'.

The role of media in society will be explored from international, multidisciplinary perspectives via approximately 700 articles drawing on research from communication and media studies, sociology, anthropology, social psychology, politics, and business.

Blockchain Fundamentals for Web 3.0 Mary C. Lacity, Steven C. Lupien, 2022-08-08 Our book explains the movement to establish online trust through the decentralization of value, identity, and data ownership. This movement is part of 'Web 3.0', the idea that individuals rather than institutions will control and benefit from online social and economic activities. Blockchain technologies are the digital infrastructure for Web 3.0. While there are many books on blockchains, crypto, and digital assets, we focus on blockchain applications for Web 3.0. Our target audience is students, professionals, and managers who want to learn about the overall Web 3.0 landscape—the investments, the size of markets, major players, and the global reach—as well as the economic and social value of applications. We present applications that use Web 3.0 technologies to unlock value in DeFi, NFTs, supply chains, media, identity, credentials, metaverses, and more. Readers will learn about the underlying technologies, the maturity of Web 3.0 today, and the future of the space from thought-leaders. This textbook is used by undergraduate and graduate Blockchain Fundamentals courses at the University of Arkansas, the University of Wyoming, and other universities around the world. Professors interested in adopting this book for instructional purposes are welcome to contact the authors for supporting instructional materials.

Modern Spain Enrique Ávila López, 2015-12-07 Fulfilling the need for English-source material on contemporary Spain, this book supplies readers with an in-depth, interdisciplinary guide to the country of Spain and its intricate, diverse culture. Far from a usual reference book, Modern Spain takes the reader through the country's history, economy, and politics as well as topics that address Spain's popular culture, such as food, sports, and sexuality. Because of the interdisciplinary nature of its content, this book differs from the average typical English manuals that very rarely cover in depth the whole array of interesting issues that define Spain in the 21st century. The vast amount of information makes this book the perfect companion for any reader wishing to learn more about Spain. Packed with current facts and statistics, this book offers an unbiased view of a modern country, making it an ideal source for undergraduate students and scholars.

Modern Warfare in Spain James W. Cortada, 2014-05-27 During the Spanish Civil War, foreign military officers wrote highly elaborate reports of their experiences at the front. One was attaché Col. Stephen O. Fuqua of the U.S. Army, who had once held the rank of major general. His presence was highly unusual, for most military observers were less-experienced captains, majors, and lieutenant colonels. Fuqua's reports contained important observations about Spanish armament and troop movements, and he managed to acquire Nationalist propaganda and information despite being situated entirely within Republican military lines. His reporting was considered so valuable that during World War II, Fuqua was tapped to be Time's military commentator. Editor James W. Cortada brings Fuqua's—and others'—insightful observations to light. The result is a volume of such immediacy that the reader feels transported to a time of great historical uncertainty amid the twentieth century's great dress rehearsal" for fascism and the conflagration of World War II.

Dynamics of Big Internet Industry Groups and Future Trends Miguel Gómez-Uranga, Jon Mikel Zabala-Iturriagagoitia, Jon Barrutia, 2016-03-31 This book applies a new analytical framework to the study of the evolution of large Internet companies such as Apple, Google, Microsoft, Facebook, Amazon and Samsung. It sheds light on the dynamics of business groups, which are approached as 'business ecosystems,' and introduces the concept of Epigenetic Economic Dynamics (EED), which is defined as the study of the epigenetic dynamics generated as a result of the adaptation of organizations to major changes in their respective environments. The book augments the existing literature on evolutionary economic thinking with findings from epigenetics, which are proving increasingly useful in analyzing the workings of large organizations. It also details the theoretical and

conceptual nature of recent work based on evolutionary economics, mainly from the perspective of generalized Darwinism, resilience and related variety, and complements the work conducted on evolutionary economics by applying the analytical framework of EED. It makes it easier to forecast future dynamics on the Internet by proving that a sizable number of big business groups are veering from their initial paths to take unprecedented new directions as a result of competition pressure, and as such is a valuable resource for postgraduates and researchers as well as those involved in economics and innovation studies.

Latin America's Quest for Globalization Félix E. Martín, Pablo Toral, 2016-12-05 Investments by Spanish firms in Latin America have grown since the early 1990s by taking over many of the state-owned firms put out to tender. Second only to the United States, these investments make Spain one of the largest markets of foreign direct investment for Latin America. This multidisciplinary volume focuses on the emergence of Spanish multinational enterprises in this region. Furthermore, it analyzes the sociological and political consequences of these investments and exhibits several theoretical and methodological approaches that make the book a useful aid for teaching. It is essential reading for those who want to understand structural reforms, their consequences and the international impact of economic reform.
