A Garden to Save the Birds Wendy McClure,2021-04-01 ALA Top 10 Sustainability-themed Children's Books 2022 A brother and sister learn that small changes can make a big difference. When a bird flies into their window by accident, Callum and his sister, Emmy, learn that from the outside, the glass looks just like the sky. They also learn that the United States has lost a lot of birds in recent years—and that there are lots of things their family can do to help. First, they set out feeders and make the windows safe. Then, for the winter, they build a little shelter and put out a heated birdbath. By springtime, all kinds of birds are visiting their yard! But with such a big problem, is there more they can do to make a difference?

12 Birds to Save Your Life Charlie Corbett,2021-06-10 Find solace, hope and happiness through 12 fascinating birds whose song is never far away - if only we know where to look . . . 'A lyrical and life-affirming book that teaches us as much about birds as it does ourselves - a balm for the soul' Raynor Winn, author of *The Salt Path* 'Charlie has opened my eyes to the constant joy of the sights and sounds of the birds that surround us. It is a book that really will save lives' Dr Richard Shepherd, author of *Unnatural Causes* _____ After the tragic loss of his mother, Charlie Corbett felt trapped by his pain. Having lost all hope and perspective he took to the countryside in search of solace. There, he heard the soaring, cascading song of the skylark - a sound that pulled him from the depths of despair and into the calm of the natural world. Weaving his journey through grief with a remarkable portrait of the birds living right on our doorstep, *12 Birds to Save Your Life* is an invitation to stop, step outside, and listen. By following Charlie's path, opening your eyes and ears to what has been there all along, you will discover how nature can set you free.

Saving Migrant Birds John Faaborg,2014-02-19 "Rigorous and well defended . . . Faaborg makes many fresh and, in some cases, provocative points regarding management guidelines for migrant birds." —Kenneth Able, Great Plains Research In the 1980s, numerous scientific surveys documented both declining bird populations, especially among Neotropical songbirds that winter in the tropics, and the loss of tropical rain forest habitat. Drawing the seemingly obvious conclusion, scientists and environmental activists linked songbird declines to loss of tropical habitats and alerted the world to an impending ecological catastrophe. Their warnings led to the establishment of the Neotropical Migratory Bird Conservation Program, also known as Partners in Flight, the self-proclaimed largest conservation effort in history. Looking back over more than a decade of efforts to save migrant birds, John Faaborg offers the first serious evaluation of the state of songbird populations today, the effectiveness of conservation programs such as Partners in Flight, and the reliability and completeness of scientific research on migrant birds. Taking neither an alarmist nor a complacent approach, he shows that many factors besides habitat loss affect bird populations and that Neotropical migrants as a group are not declining dramatically, though some species adapt to habitat alteration more successfully than others. Faaborg's state-of-the-art survey thus clarifies the kinds of information we will need and the conservation efforts we should undertake to ensure the long-term survival of Neotropical migrant birds. "Presents a carefully and closely reasoned argument about the magnitude of the conservation problems facing migrant birds, how we can reduce these problems, and how current conservation efforts have enormous value even if there is no immediate crisis." —Scott K. Robinson, Professor and Head, Department of Animal Biology, University of Illinois

Facing Extinction Paul Donald,Nigel Collar,Stuart Marsden,Deborah J. Pain,2013-12-19 Examines extinction in birds, with case studies of critically endangered species and the research initiatives designed to save them.

Etta Lemon Tessa Boase,2018-06-05 Read the fascinating story of one of the greatest unsung figures of the nature conservation movement, founder of the RSPB and icon of early animal rights activism, Etta Lemon. A heroine for our times, Etta Lemon campaigned for fifty years against the worldwide slaughter of birds for extravagantly feathered hats. Her legacy is the RSPB, grown from an all-female pressure group of 1889 with the splendidly simple pledge: Wear No Feathers. Etta's long battle against 'murderous millinery' triumphed with the Plumage Act of 1921 – but her legacy has been eclipsed by the more glamorous campaign for the vote, led by the elegantly plumed Emmeline Pankhurst. This gripping narrative explores two formidable heroines and their rival, overlapping campaigns. Moving from the feather workers' slums to high society, from the first female political rally to the rise of the eco-feminist, it restores Etta Lemon to her rightful place in history – the extraordinary woman who saved the birds. **ETTA LEMON** was originally published in hardback in 2018 under the title of **MRS PANKHURST'S PURPLE FEATHER**. 'A great story of pioneering conservation.' **KATE HUMBLE** 'Quite brilliant. Meticulous and perceptive. A triumph of a book.' **CHARLIE ELDER** 'Shocking and entertaining. The surprising story of the campaigning women who changed Britain.' **VIRGINIA NICHOLSON** 'A fascinating and moving story, vividly told.' **JOHN CAREY** 'A fascinating clash of two causes: rights for women and rights for birds to fly free not adorn suffragettes' hats. An illuminating story, provocative, well-researched and brilliantly told.' **DIANA SOUHAMI**

Strange Birds Celia C. Pérez,2019-09-03 From the award-winning author of *The First Rule of Punk* comes the story of four kids who form an alternative Scout troop that shakes up their sleepy Florida town. * Writing with wry restraint that's reminiscent of Kate DiCamillo... a beautiful tale. —Kirkus Reviews, starred review When three very different girls find a mysterious invitation to a lavish mansion, the promise of adventure and mischief is too intriguing to pass up. Ofelia Castillo (a budding journalist), Aster Douglas (a bookish foodie), and Cat Garcia (a rule-abiding birdwatcher) meet the kid behind the invite, Lane DiSanti, and it isn't love at first sight. But they soon bond over a shared mission to get the Floras, their local Scouts, to ditch an outdated tradition. In their quest for justice, independence, and an unforgettable summer, the girls form their own troop and find something they didn't know they needed: sisterhood.

Save the Birds ,1989 Describes the major natural environments of the earth from the tropics to the polar regions, the roles played in those ecosystems by birds, and the effects that humans have on them.

Cat Wars Peter P. Marra,Chris Santella,2016-09-20 Why our cats are a danger to species diversity and human health In 1894, a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles. In just over a year, the Stephens Island Wren, a rare bird endemic to the island, was rendered extinct. Mounting scientific evidence confirms what many conservationists have suspected for some time—that in the United States alone, free-ranging cats are killing birds and other animals by the billions. Equally alarming are the little-known but potentially devastating public health consequences of rabies and parasitic *Toxoplasma* passing from cats to humans at rising rates. *Cat Wars* tells the story of the threats free-ranging cats pose to biodiversity and public health throughout the world, and sheds new light on the controversies surrounding the management of the explosion of these cat populations. This compelling book traces the historical and cultural ties between humans and cats from early domestication to the current boom in pet ownership, along the way accessibly explaining the science of extinction, population modeling, and feline diseases. It charts the developments that have led to our present impasse—from Stan Temple's breakthrough studies on cat predation in Wisconsin to cat-eradication programs underway in Australia today. It describes how a small but vocal minority of cat advocates has campaigned successfully for no action in much the same way that special interest groups have stymied attempts to curtail smoking and climate change. *Cat Wars* paints a revealing picture of a complex global problem—and proposes solutions that foresee a time when wildlife and humans are no longer vulnerable to the impacts of free-ranging cats.

Solid Air Daniel Klem Jr,2021-10-06 Birds kill themselves striking all types and sizes of human-built structures the world over. This book describes the cause of this universal problem and how to solve it.

The Bird-Friendly City Timothy Beatley,2020-11-05 How does a bird experience a city? A backyard? A park? As the world has become more urban, noisier from increased traffic, and brighter from streetlights and office buildings, it has also become more dangerous for countless species of birds. Warblers become disoriented by nighttime lights and collide with buildings. Ground-feeding sparrows fall prey to feral cats. Hawks and other birds-of-prey are sickened by rat poison. These name just a few of the myriad hazards. How do our cities need to change in order to reduce the threats, often created unintentionally, that have resulted in nearly three billion birds lost in North America alone since the 1970s? In *The Bird-Friendly City*, Timothy Beatley, a longtime advocate for intertwining the built and natural environments, takes readers on a global tour of cities that are reinventing the status quo with birds in mind. Efforts span a fascinating breadth of approaches: public education, urban planning and design, habitat restoration, architecture, art, civil disobedience, and more. Beatley shares empowering examples, including: advocates for “catios,” enclosed outdoor spaces that allow cats to enjoy backyards without being able to catch birds; a public relations campaign for vultures; and innovations in building design that balance aesthetics with preventing bird strikes. Through these changes and the others Beatley describes, it is possible to make our urban environments more welcoming to many bird species. Readers will come away motivated to implement and advocate for bird-friendly changes, with inspiring examples to draw from. Whether birds are migrating and need a temporary shelter or are taking up permanent residence in a backyard, when the environment is safer for birds, humans are happier as well.
